TECHNICAL TRAINING CATALOGUE 2026

OUR COMMITMENT:

TO ASSIST YOU IN DEVELOPING THE COMPETENCE AND PERFORMANCE OF YOUR EMPLOYEES AND YOUR SERVICE.

(Version of October 27, 2025)

EDITO

Dear Subsidiary,

The Group Academy is pleased to present its catalogue of services for 2026 and to inform you of our commitments for all subsidiaries:

- ✓ **To support you in developing the skills and performance of your employees and your service,**
- ✓ **To support you in resolving technical problems on customer vehicles,**
- ✓ **To standardize and normalize the skill levels of the group's technicians.**

The diversity of brands deployed by CFAO is a real asset for the development of our skills development offers to subsidiaries throughout the company's territories. This diversity challenges us to ensure a high level of service quality within the after-sales service, the parts service, the sales department and the financial and legal service.

To improve the quality of your employees' services, we recommend deploying the following technical skills acquisition cycle:

- ✓ **Measure** the current skills of technicians and teams,
- ✓ **Exploit** the results to guide the skills development strategy,
- ✓ **Define** individual and collective skills development plans,
- ✓ **Acquire** new skills through face-to-face or remote trainings,
- ✓ **Certify** the new skills acquired,
- ✓ **Apply** new skills in a professional environment,
- ✓ **Perform** in a professional environment.

We also offer to **assist** you in **resolving technical problems** that you encounter in your workshops, with **technical support integrated** into the Academy.

The development of new skills is carried out by certified experts each in their areas of expertise, using innovative training methods.

Thank you for your commitment to developing the skills of your employees. We look forward to hearing from you.

Laurent GONIN

TEAM EQUIPMENT

The Douala Academy for EQUIPMNET is dedicated to the **RENAULT TRUCKS, JCB, LOVOL, TOYOTA FORKLIFT, BT, FUSO, HINO, SINOTRUK, SHACMAN and KING LONG** brands and is equipped with:

- A reception and a restaurant,
- Two training rooms (board, video projector, others),
- A 200 m² workshop,
- Didactic equipment for engines, transmissions and others,
- A RENAULT TRUCKS K Range truck

Our training courses are delivered at the Douala Academy and at all our subsidiaries. We also provide training at our customers' sites. Training sessions are made up of a maximum of twelve trainees.

Training Contact service:

cfaoacademydouala@cfao.com

Laurent GONIN
CFAO Training Director

André Yves BOKALLY
Training Coordinator & Project Manager

Claudia EYINGA
Training Assistant

Lucien GAGNE
Technical Trainer Expert (RENAULT TRUCKS, HINO, FUSO)

Idris NKOA
Technical Trainer Expert (TOYOTA BT, KING LONG, SINOTRUK)

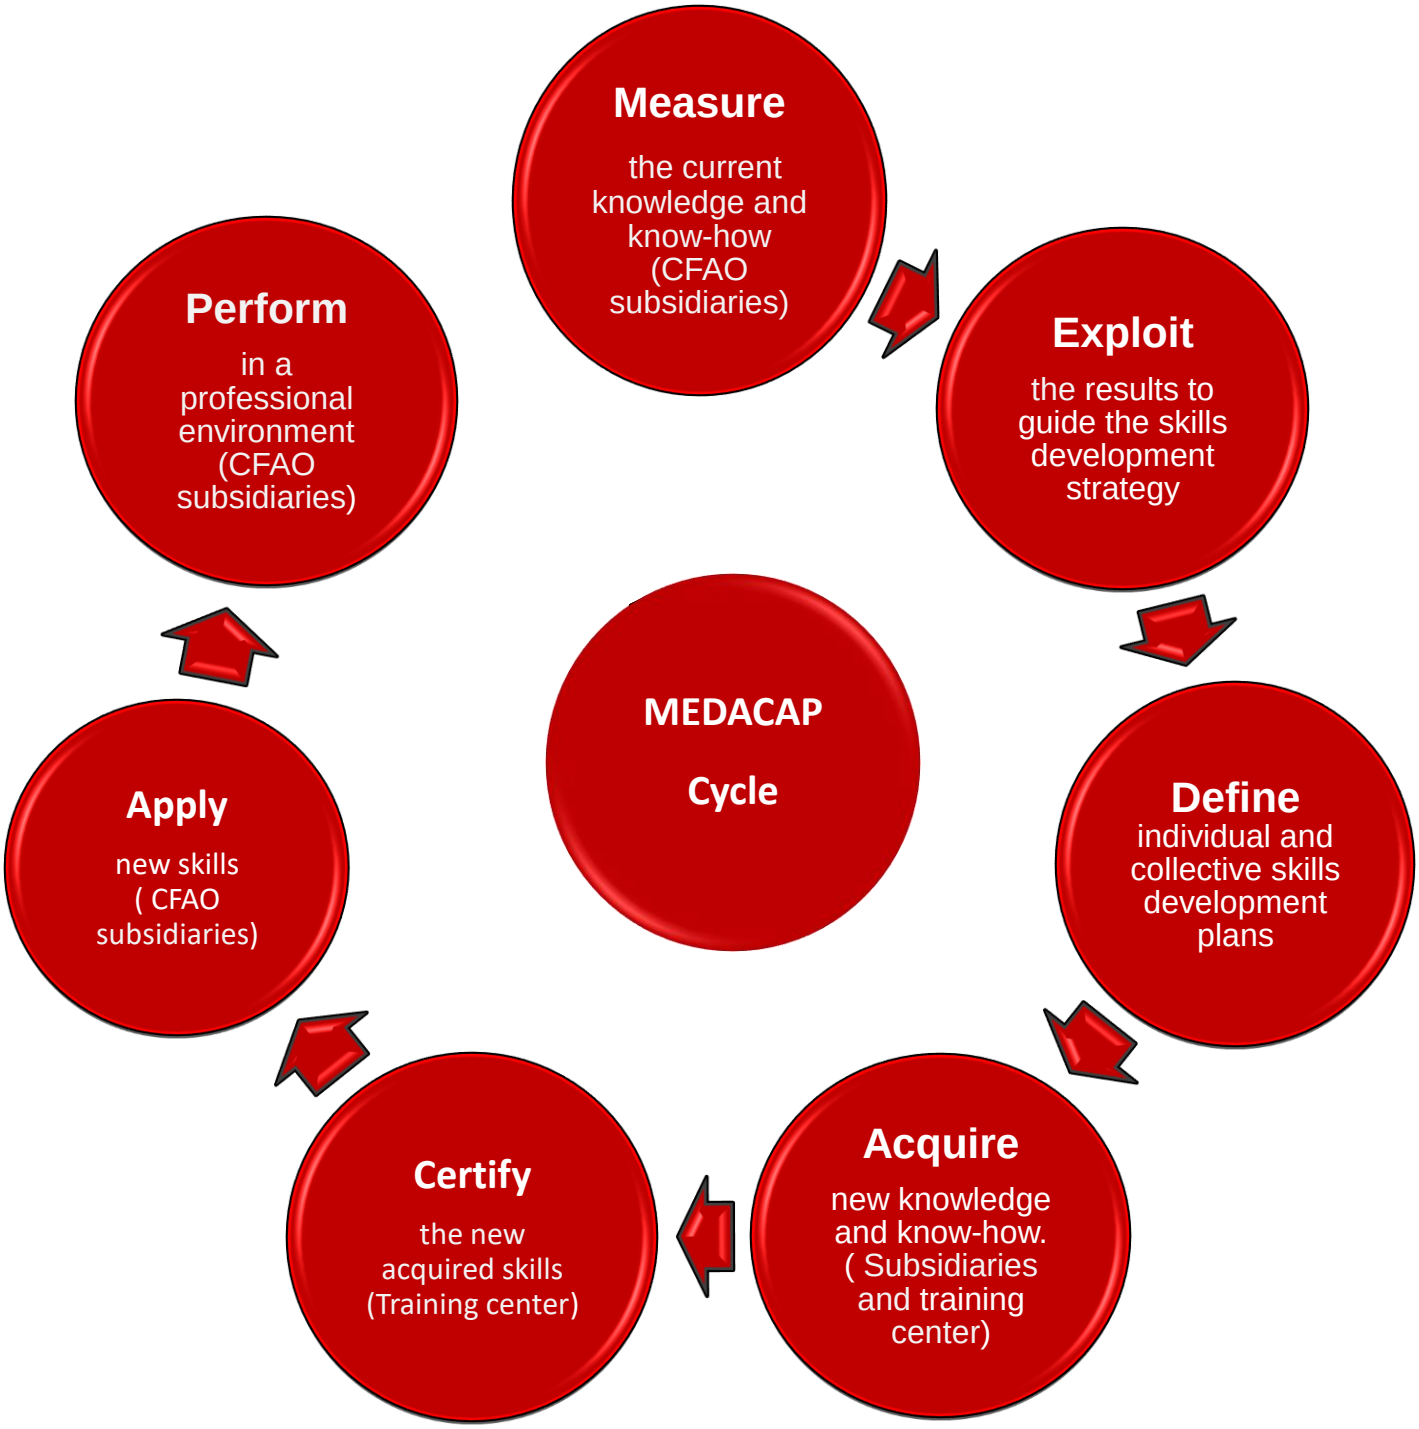

Thierry KOUGHA
Technical Trainer Expert (TOYOTA FORKLIFT, JCB, LOVOL)

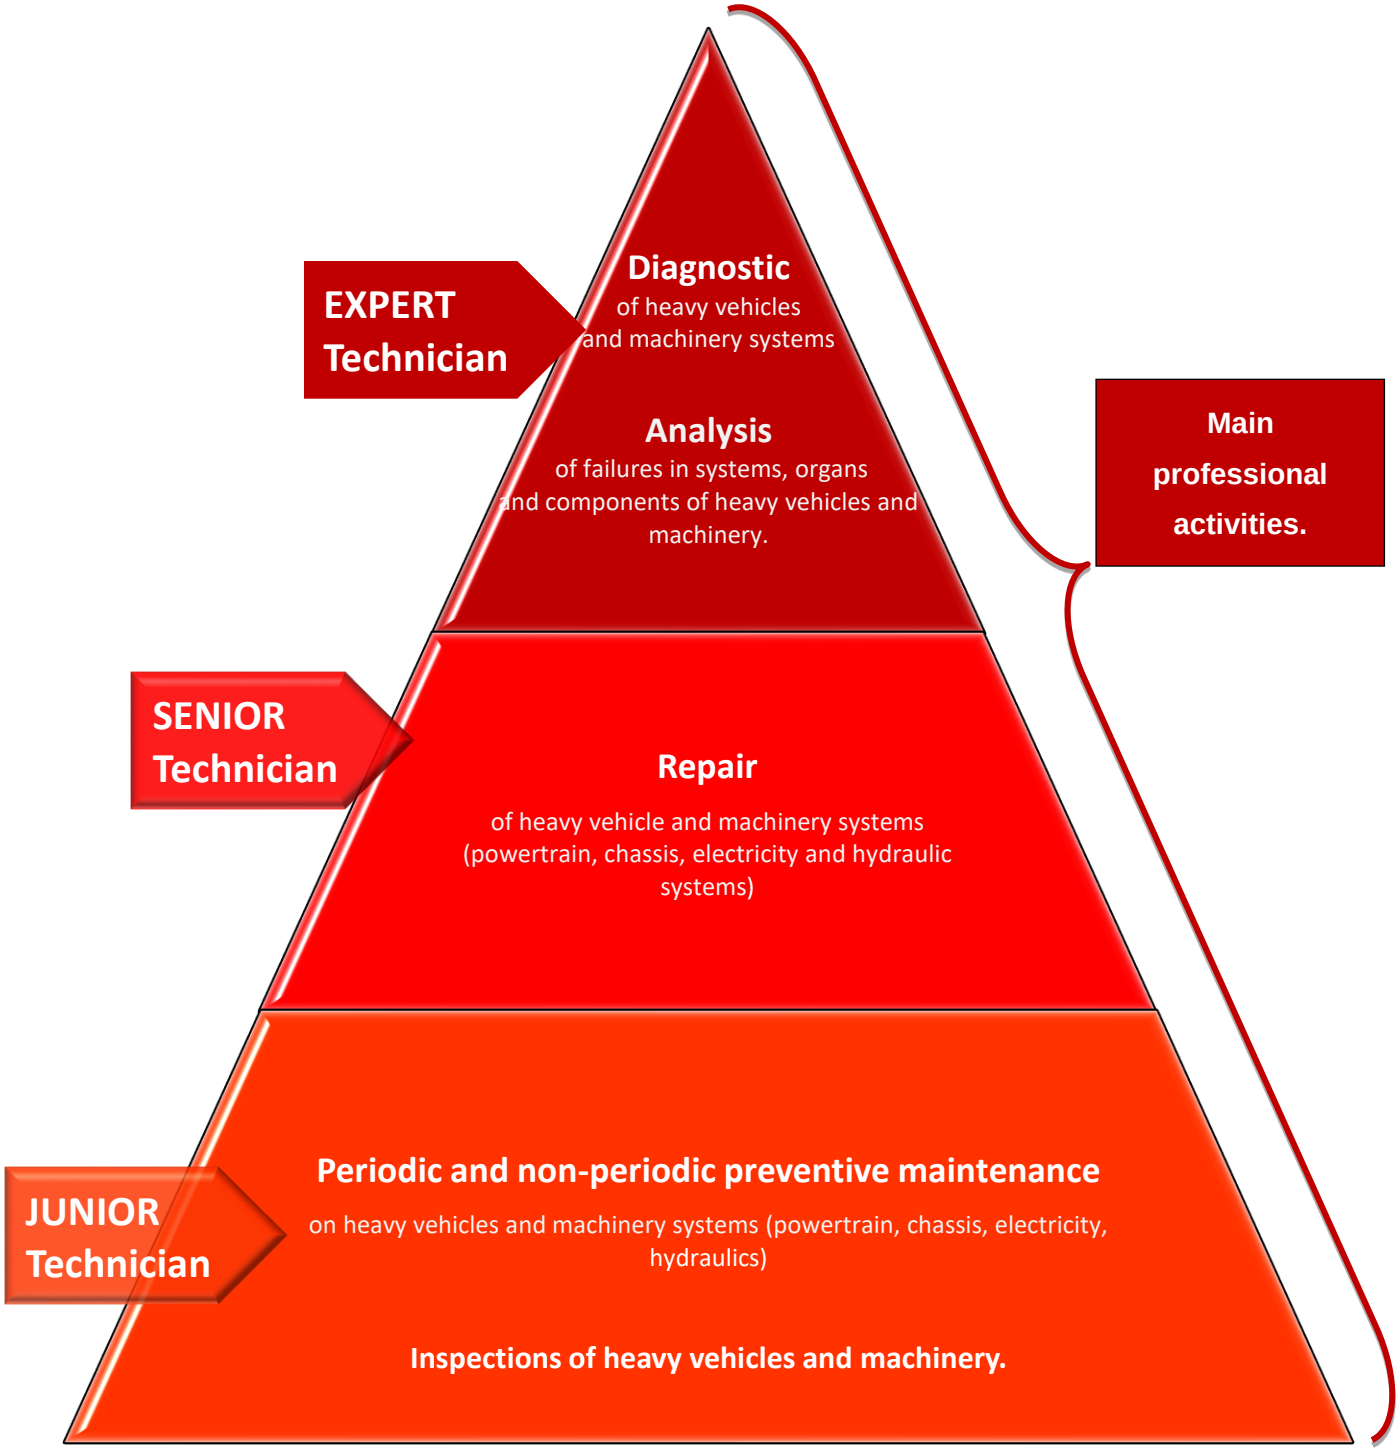

Roland NENDA
Operator Trainer
All- brands expert (Trucks and Heavy Equipment)

DEVELOPING TECHNICIANS' PROFESSIONAL EXPERTISE

SKILL LEVELS OF TECHNICIANS

TRAINING BY TECHNICIAN LEVEL

	Theoretical training (Knowledge - > E-Learning)		Practical training (Know-how -> Face-to-face)	
	Thématics	**Duration (days)**	**Thématics**	**Duration (days)**
EXPERT Technician	❖ The 7 stages of diagnostics applied to different machine systems (powertrain, chassis, electricity), ❖ Features of the Diag tool ❖ Technical Certification TOYOTA-BT STEP 2	35	❖ Diagnostic of Electrical/electronic systems for BT LEVIO electric pallet trucks ❖ Diagnostic of Electrical/Electronic Systems for BT STAXIO Stacker Trucks ❖ Diagnostic of Electrical/Electronic Systems for Toyota BT REFLEX Reach Trucks ❖ Diagnostic of Electrical/electronic systems for RRE-H2 high performance reach trucks ❖ Diagnostic of Electrical/electronic systems for narrow aisle trucks (VNA) BT VECTOR	5 5 5 5 5
SENIOR Technician	❖ Technological knowledge of the various cart systems (powertrain, chassis, electricity, hydraulics). ❖ Manufacturer-compliant removal and refit procedure, ❖ Manufacturer-compliant disassembly and reassembly procedures. ❖ Manufacturer-compliant component check procedure, ❖ Technical Certification TOYOTA-BT STEP 1	25	❖ Repair of electrical and electronic systems for electric pallet trucks (BT LEVIO) ❖ Repair of electrical and electronic systems for stackers (BT STAXIO) ❖ Repairs of Electrical and electronic systems for reach trucks (BT REFLEX) ❖ Repair of Electrical and electronic systems for reach trucks (high performance RRE-H2) ❖ Repair of Electrical and electronic systems for narrow aisle trucks (BT VECTOR)	5 5 5 5 5
JUNIOR Technician	❖ Brand history (BT ranges, features, etc.), ❖ Description of the BT structure and role of the different machines systems (powertrain, chassis, electricity, hydraulics). ❖ Principle of use of metrology tools, ❖ Periodic and non-periodic preventive maintenance of BT machines, ❖ The Fundamentals of electricity...	25	❖ Preventive maintenance of electric pallet trucks (BT LEVIO) ❖ Preventive maintenance of stackers (BT STAXIO) ❖ Preventive maintenance of reach trucks (BT REFLEX) ❖ Preventive maintenance of reach trucks (high performance RRE-H2) ❖ Preventive maintenance of narrow aisle trucks (BT VECTOR)	5 5 5 5 5

CONTENTS

Page	Code	Training designation	Date	Place
8 to 13		JUNIOR TECHNICIAN (PREVENTIVE MAINTENANCE OF ELECTRIC FORKLIFT)		
9	BT01	Preventive maintenance of pallet trucks (BT LEVIO)	To be defined	To be defined
10	BT02	Preventive maintenance of stackers (BT STAXIO)	To be defined	To be defined
11	BT03	Preventive maintenance of reach trucks (BT REFLEX)	To be defined	To be defined
12	BT04	Preventive maintenance of reach trucks (high performance RRE-H2)	To be defined	To be defined
13	BT05	Preventive maintenance of "narrow aisle" forklifts	To be defined	To be defined
14 to 19		SENIOR TECHNICIAN (ELECTRIC FORKLIFT REPAIR)		
15	BT06	Repair of electric pallet trucks (BT LEVIO)	To be defined	To be defined
16	BT07	Repari of Stacker (BT STAXIO)	To be defined	To be defined
17	BT08	Repair of reach trucks (Reach Trucks BT REFLEX)	To be defined	To be defined
18	BT09	Repair of reach trucks (high performance RRE-H2)	To be defined	To be defined
19	BT10	Repair of narrow aisle trolleys	To be defined	To be defined
20 to 25		EXPERT TECHNICIAN (ELECTRIC FORKLIFT DIAGNOSTICS)		
21	BT11	Diagnostics of electric pallet trucks (BT LEVIO)	To be defined	To be defined
22	BT12	Diagnosis of Stacker (BT STAXIO)	To be defined	To be defined

BT REFLEX

TOYOTA BT FORKLIFT TRUCKS – STAXIO BT Range

TOYOTA BT FORKLIFT TRUCKS – BT LEVIO range

BT01	PREVENTIVE MAINTENANCE OF PALLET TRUCKS (BT LEVIO)

Level, mode and duration	JUNIOR	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Maintain** the machine's systems (AC motors, hydraulics, batteries, transmission, etc.) in operation according to the manufacturer's recommendations. • **Inspect** the systems (AC motors, hydraulics, electricity, batteries, steering, brakes, mast, …) of the machine according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Part Theoretical :** • Description and Characteristics of BT LEVIO Pallet Trucks • Battery Architecture and Operation • Battery charging systems and equipment, • Review of the BT LEVIO pallet truck maintenance schedule, • Characteristics of machine consumables: Oils, greases, filters, ... • The different types of maintenance applied to forklifts and maintenance periods in accordance with the manufacturer's specifications, • Principles for using metrology tools, • Periodic and Non-periodic Preventive Maintenance of systems and components in accordance with the manufacturer. ► **Part Practical** : • Implement safety measures for the use and maintenance of BT LEVIO pallet trucks according to the manufacturer's instructions. • Charge batteries according to the manufacturer's instructions. • Control the machine parameters with TRUCKCOM BT (and TRUCKCOM WH) • Verify that the components (dimensions, capacity, voltage, current, state of charge, etc.) conform to the manufacturer's specifications. • Remove and reinstall the components (filters, battery module, battery pack, etc.) according to the manufacturer's recommendations. • Reset the Maintenance alert signal after work is completed. ► **Part Assessment** : • Initial Test (Prerequisite Assessment) • Final Test (Evaluation of Acquired Skills)		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	Having completed basic training in Mechanics, Electricity and Electronics		
Language	French		
Equipment	Training room and equipped workshop(s), computers with TRUCKCOM installed, suitable machine(s) available.		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation		
Date and Place	To be defined with the client	To be defined	

BT02	PREVENTIVE MAINTENANCE OF BT STAXIO STACKERS

Level, mode and duration	JUNIOR	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Maintain** the machine's systems (AC motors, hydraulics, batteries, transmission, etc.) in operation according to the manufacturer's recommendations. • **Inspect** the systems (AC motors, hydraulics, electricity, batteries, steering, brakes, mast, …) of the machine according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Part Theoretical :** • Description and Characteristics of BT STAXIO Stackers, • Battery Architecture and Operation • Battery charging systems and equipment, • BT STAXIO Stacker Maintenance Calendar Review • Characteristics of machine consumables: Oils, greases, filters, ... • The different types of maintenance applied to forklifts and maintenance periods in accordance with the manufacturer's specifications, • Principles for using metrology tools, • Preventive, periodic and non-periodic maintenance of systems and components in accordance with the manufacturer . ► **Part Practical :** • Implement safety measures for the use and maintenance of BT STAXIO stackers with batteries, following the manufacturer's instructions. • Charge batteries according to the manufacturer's instructions. • Control the machine parameters with TRUCKCOM BT (and TRUCKCOM WH) • Verify that the components (dimensions, capacity, voltage, current, state of charge, etc.) conform to the manufacturer's specifications. • Remove and reinstall the components (filters, battery module, etc.) according to the manufacturer's recommendations. • Reset the Maintenance alert signal after work is completed. ► **Part Assessment :** • Initial Test (Prerequisite Assessment) • Final Test (Evaluation of Acquired Skills)		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	Having completed basic training in Mechanics, Electricity and Hydraulics		
Language	French		
Equipment	Training room and equipped workshop(s), computers with TRUCKCOM installed, suitable machine(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Certificate of participation.		
Date and Place	To be defined with the client	To be defined	

BT03	PREVENTIVE MAINTENANCE OF RETRACTABLE MAST TRUCKS (REACH TRUCKS BT REFLEX)

Level, mode and duration	JUNIOR	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Maintain** the machine's systems (AC motors, hydraulics, batteries, transmission, etc.) in operation according to the manufacturer's recommendations. • **Inspect** the systems (AC motors, hydraulics, electricity, batteries, steering, brakes, mast, …) of the machine according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Part Theoretical :** • Description and Characteristics of BT REFLEX Reach Trucks • Battery Architecture and Operation • Battery charging systems and equipment, • BT REFLEX Reach Truck Maintenance Schedule • Characteristics of machine consumables: Oils, greases, filters, … • The different types of maintenance applied to forklifts and maintenance periods in accordance with the manufacturer's specifications, • Principles for using metrology tools, • Periodic and Non-periodic Preventive Maintenance of systems and components in accordance with the manufacturer. ► **Part Practical :** • Implement safety measures for the use and maintenance of BT REFLEX Reach trucks according to the manufacturer's instructions. • Install the batteries according to the manufacturer's instructions. • Control the machine parameters with TRUCKCOM BT (and TRUCKCOM WH), • Remove and reinstall the components (filters, battery module, battery pack, etc.) according to the manufacturer's recommendations. • Verify that the components (dimensions, capacity, voltage, current, state of charge, etc.) conform to the manufacturer's specifications. • Reset the Maintenance alert signal after work is completed. ► **Part Assessment :** • Initial Test (Prerequisite Assessment) • Final Test (Evaluation of Acquired Skills)		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	Having completed basic training in Mechanics, Electricity and Electronics		
Language	French		
Equipment	Training room and equipped workshop(s), computers with TRUCKCOM installed, suitable machine(s) available.		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation		
Date and Place	To be defined with the client	To be defined	

BT04	PREVENTIVE MAINTENANCE OF RETRACTABLE MAST TRUCKS (HIGH PERFORMANCE RRE-H2 BT REFLEX)

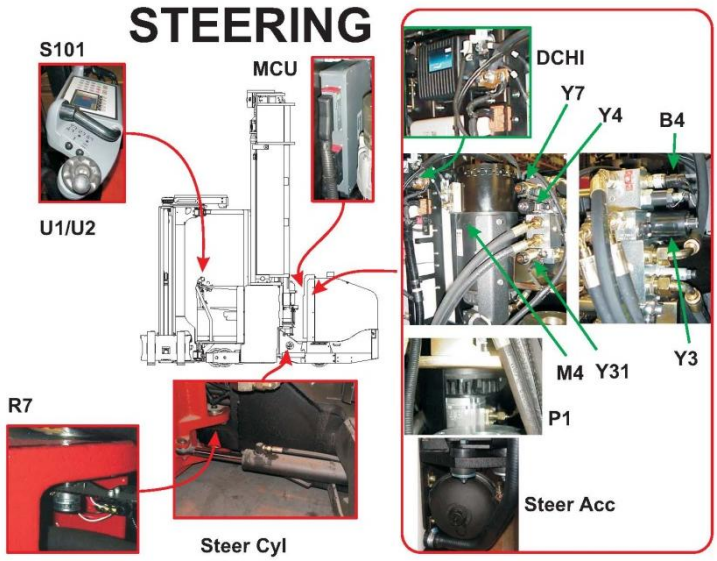

Level, mode and duration	JUNIOR	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Maintain** the machine's systems (AC motors, hydraulics, batteries, transmission, etc.) in operation according to the manufacturer's recommendations. • **Inspect** the systems (AC motors, hydraulics, electricity, batteries, steering, brakes, mast, …) of the machine according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Part Theoretical :** • Description and Characteristics of the RRE-H2 BT REFLEX high-performance reach trucks, • Battery Architecture and Operation • Battery charging systems and equipment, • Review of the Maintenance Schedule for RRE-H2 BT REFLEX High-Performance Reach Trucks, • Characteristics of machine consumables: Oils, greases, filters, ... • The different types of maintenance applied to forklifts and maintenance periods in accordance with the manufacturer's specifications, • Principles for using metrology tools, • Periodic and Non-periodic Preventive Maintenance of systems and components in accordance with the manufacturer. ► **Part Practical :** • Implement safety measures for the use and maintenance of Toyota BT REFLEX high-performance reach trucks (RRE-H2) according to the manufacturer's instructions. • Charge the batteries according to the manufacturer's instructions. • Control the machine parameters with TRUCKCOM BT (and TRUCKCOM WH), • Verify that the components (dimensions, capacity, voltage, current, state of charge, etc.) conform to the manufacturer's specifications. • Remove and reinstall the components (filters, battery module, battery pack, etc.) according to the manufacturer's recommendations. • Reset the Maintenance alert signal after work is completed. ► **Part Assessment :** • Initial Test (Prerequisite Assessment) • Final Test (Evaluation of Acquired Skills)		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	Having completed basic training in Mechanics, Electricity and Electronics		
Language	French		
Equipment	Training room and equipped workshop(s), computers with TRUCKCOM installed, suitable machine(s) available.		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation		
Date and Place	To be defined with the client	To be defined	

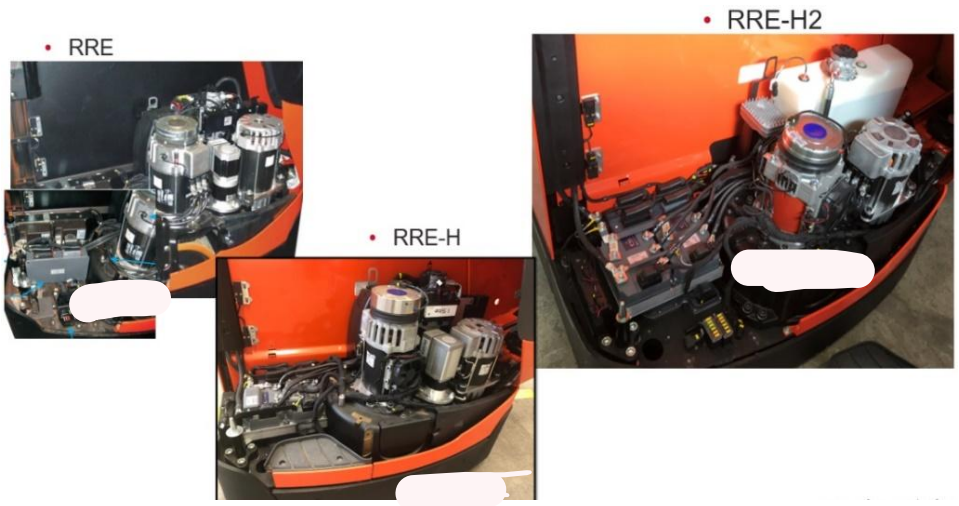

BT05	PREVENTIVE MAINTENANCE OF "NARROW AISLE" FORKS

Level, mode and duration	JUNIOR	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Maintain** the machine's systems (AC motors, hydraulics, batteries, transmission, etc.) in operation according to the manufacturer's recommendations. • **Inspect** the systems (AC motors, hydraulics, electricity, batteries, steering, brakes, mast, …) of the machine according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Part Theoretical :** • Description and Characteristics of the VECTOR BT VNA • Battery Architecture and Operation • Battery charging systems and equipment, • Review of the VECTOR BT VNA Maintenance Schedule, • Characteristics of machine consumables: Oils, greases, filters, ... • The different types of maintenance applied to forklifts and maintenance periods in accordance with the manufacturer's specifications, • Principles for using metrology tools, • Periodic and Non-periodic Preventive Maintenance of systems and components in accordance with the manufacturer. ► **Part Practical :** • Implement safety measures for the use and maintenance of VECTOR BT VNAs according to the manufacturer's instructions. • Charge the batteries according to the manufacturer's instructions. • Control the machine parameters with TRUCKCOM BT (and TRUCKCOM WH), • Verify that the components (dimensions, capacity, voltage, current, state of charge, etc.) conform to the manufacturer's specifications. • Remove and reinstall the components (filters, battery module, battery pack, etc.) according to the manufacturer's recommendations. • Reset the Maintenance alert signal after work is completed. ► **Part Assessment :** • Initial Test (Prerequisite Assessment) • Final Test (Evaluation of Acquired Skills)		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	Having completed basic training in Mechanics, Electricity and Electronics		
Language	French		
Equipment	Training room and equipped workshop(s), computers with TRUCKCOM installed, suitable machine(s) available.		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation		
Date and Place	To be defined with the client	To be defined	

SENIOR TECHNICIAN

REPAIR

BT 06	REPAIRS OF BT LEVIO ELECTRIC PALLET TRUCK

Level, mode and duration	SENIOR	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Remove** and **reinstall** the various components of the pallet truck's electrical systems according to the manufacturer's instructions . • **Disassemble** and **Reassemble** the electrical system components of the BT LEVIO electric pallet trucks according to the manufacturer's instructions . • **Checking** for compliance electrical and electronic system components that meet the manufacturer 's expectations • **Test and adjust** the various components according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Part Theoretical :** • Description of the characteristics of the components (AC motor, hydraulic drawbar system, electromagnetic brakes, electrical controllers, etc.) of the BT LEVIO, • Architecture and operation of battery charging equipment, • Description of the electronic and electrical management systems of the various components of the BT LEVIO electric pallet trucks. • Removal and refitting procedure for the various components of the electrical system, following the manufacturer's instructions. • Disassembly and reassembly procedure for the electrical, electronic and hydraulic system components of BT LEVIO according to the manufacturer's instructions. ► **Part Practical :** • Remove the electrical system components according to the manufacturer's instructions. • Disassemble the electrical and hydraulic system components according to the manufacturer's instructions. • Clean and verify the conformity of the electrical system components of the BT LEVIO pallet trucks. • Replace electrical system components that do not meet the manufacturer's specifications. • Reassemble the electrical system components according to the manufacturer's instructions. • Reinstall the electrical system components according to the manufacturer's instructions. • Test and adjust electrical and electronic system components on BT LEVIO pallet trucks to the manufacturer's specifications. ► **section :** • Theory (prerequisites and knowledge) • Practical skills (prerequisites and know-how)		
Target audience	Technician performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French		
Equipment	Training room and equipped workshop(s), LEVIO BT electric pallet truck, adapted machine(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Certificate of participation.		
Date and place	To be defined with the client	To be defined	

BT 07	REPAIR OF BT STAXIO STACKER

Level, mode and duration	SENIOR	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Remove** and **reinstall** the various components (AC motor, hydraulic system, brakes, batteries, mast, etc.) of the BT STAXIO stackers according to the manufacturer's instructions . • **Disassemble** and **Reassemble** the electrical, electronic and hydraulic system components of the BT STAXIO stackers according to the manufacturer's instructions . • **Checking** for compliance electrical and electronic system components to the manufacturer's expectations . • **Test and adjust** the various components according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Part Theoretical :** • Description of the characteristics of the components (AC motor, hydraulic tiller system, electromagnetic brakes, electrical controllers, etc.) of the BT STAXIO stackers, • Architecture and operation of battery charging equipment, • Description of the electrical and electronic management system of the BT STAXIO stacker, • Procedure for removing and reinstalling the various components of the stacker according to the manufacturer's instructions. • Disassembly and reassembly procedure for the electrical, electronic and hydraulic system components of BT STAXIO stackers according to the manufacturer's instructions. ► **Part Practical :** • Remove the stacker components according to the manufacturer's instructions. • Disassemble the electrical and hydraulic system components according to the manufacturer's instructions. • Clean and verify the conformity of the electrical and hydraulic system components of the BT STAXIO stackers. • Replace components/parts that do not meet the manufacturer's specifications. • Reassemble the electrical and hydraulic system components according to the manufacturer's instructions. • Reinstall the stacker components according to the manufacturer's instructions. • Test and adjust the components of the electrical, electronic and hydraulic systems on the BT STAXIO stacker to the manufacturer's specifications. ► **section :** • Theory (prerequisites and knowledge) • Practical skills (prerequisites and know-how)		
Target audience	Technician performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French		
Equipment	Training room and equipped workshop(s), computers with TRUCKCOM installed, suitable machine(s) available.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation.		
Date and place	To be defined with the client	To be defined	

BT 08	REPAIR OF RETRACTABLE MAST CARTS (REACH TRUCKS) BT REFLEX

Level, mode and duration	SENIOR	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Remove** and **reinstall** the various components of the electrical system of Toyota BT REFLEX reach trucks according to the manufacturer's instructions . • **Disassemble** and **Reassemble** the components of the electrical (AC motor, electro-hydraulic, brakes, batteries, etc.) and electronic systems of the BT REFLEX Reach trucks according to the manufacturer's instructions . • **Checking** for compliance electrical and electronic system components that meet the manufacturer 's expectations • **Test and adjust** the various components according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Part Theoretical :** • Description of the characteristics of the components (AC motor, electro-hydraulic system, brakes, chassis, etc.) Reach trucks Toyota BT REFLEX, • Description of the electro-hydraulic system and battery charging equipment, • Description of the electrical and electronic management system of Reach trucks Toyota BT REFLEX, • Removal and refitting procedure for the various components of the electrical system, following the manufacturer's instructions. • Disassembly and reassembly procedure for the various components of the electrical system of Toyota BT REFLEX Reach trucks according to the manufacturer's instructions . ► **Part Practical :** • Remove the electrical system components according to the manufacturer's instructions. • Disassemble the electrical system components according to the manufacturer's instructions. • Clean and verify the conformity of the electrical system components according to the manufacturer's specifications. • Replace electrical system components that do not meet the manufacturer's specifications. • Reassemble the electrical system components according to the manufacturer's instructions. • Reinstall the electrical system components according to the manufacturer's instructions. • Test and adjust the electrical system components on the BT REFLEX Reach trucks according to the manufacturer's specifications. ► **section :** • Theory (prerequisites and knowledge) • Practical skills (prerequisites and know-how)		
Target audience	Technician performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French		
Equipment	Training room and equipped workshop(s), computers with TRUCKCOM installed, suitable machine(s) available.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation.		
Date and place	To be defined with the client	To be defined	

BT 09	REPAIR OF RETRACTABLE MAST CARTS (HIGH PERFORMANCE RRE-H2)

Level, mode and duration	SENIOR	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Remove** and **reinstall** the various components of the RRE-H2 high-performance forklift's electrical system according to the manufacturer's instructions . • **Disassemble** and **Reassemble** the components of the electrical (AC motor, electro-hydraulic, brakes, batteries, etc.) and electronic systems of the RRE-H2 high-performance forklifts according to the manufacturer's instructions . • **Checking** for compliance electrical and electronic system components that meet the manufacturer 's expectations • **Test and adjust** the components according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Part Theoretical :** • Description of the characteristics of the components (AC motor, electro-hydraulic system, chassis, etc.) of the RRE-H2 high-performance forklifts. • Description of the electro-hydraulic system and battery charging equipment, • Description of the electrical and electronic management system of the RRE-H2 high-performance forklifts, • Removal and refitting procedure for the various components of the electrical system, following the manufacturer's instructions. • Disassembly and reassembly procedure for the various components of the electrical system of the RRE-H2 high performance trolleys according to the manufacturer's instructions . ► **Part Practical :** • Remove the electrical system components according to the manufacturer's instructions. • Disassemble the electrical system components according to the manufacturer's instructions. • Clean and verify the conformity of the electrical system components according to the manufacturer's specifications. • Replace electrical system components that do not meet the manufacturer's specifications. • Reassemble the electrical system components according to the manufacturer's instructions. • Reinstall the electrical system components according to the manufacturer's instructions. • Test and adjust the electrical system components on the RRE-H2 high-performance forklift to the manufacturer's specifications . ► **section :** • Theory (prerequisites and knowledge) • Practical skills (prerequisites and know-how)		
Target audience	Technician performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French		
Equipment	Training room and equipped workshop(s), computers with TRUCKCOM installed, suitable machine(s) available.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation.		
Date and place	To be defined with the client	To be defined	

BT 10	REPAIR OF "NARROW AISLE" CARTS

Level, mode and duration	SENIOR	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Remove** and **reinstall** the various components of the BT VECTOR narrow aisle (NA) trolley electrical system according to the manufacturer's instructions . • **Disassemble** and **Reassemble** the components of the electrical (AC motor, electro-hydraulic system, brakes, batteries, …) and electronic systems of the VNA BT VECTOR according to the manufacturer's instructions. • **Checking** for compliance electrical and electronic system components to the manufacturer's expectations . • **Test and adjust** the various components according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Part Theoretical :** • Description of the characteristics of the components (AC motor, electro-hydraulic system, brakes, chassis, …) of the VNA BT VECTOR . • Description of the electro-hydraulic system and battery charging equipment • Description of the electrical and electronic management system of the VECTOR BT VNA • Removal and reinstallation procedure for the various components of the electrical system, following the manufacturer's instructions. • Disassembly and reassembly procedure for the various components of the VNA BT VECTOR electrical system, following the manufacturer's instructions. ► **Part Practical :** • Remove the electrical system components according to the manufacturer's instructions. • Disassemble the electrical system components according to the manufacturer's instructions. • Clean and verify the conformity of the electrical system components according to the manufacturer's specifications. • Replace electrical system components that do not meet the manufacturer's specifications. • Reassemble the electrical system components according to the manufacturer's instructions. • Reinstall the electrical system components according to the manufacturer's instructions. • Test and adjust the electrical system components on the Toyota BT VECTOR VNA to the manufacturer's specifications . ► **section :** • Theory (prerequisites and knowledge) • Practical skills (prerequisites and know-how)		
Target audience	Technician required to have operational skills in Low Voltage Equipment Repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French		
Equipment	Training room and equipped workshop(s), computers with TRUCKCOM installed, suitable machine(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Certificate of participation.		
Date and place	To be defined with the client	To be defined	

TECHNICIEN EXPERT

DIAGNOSTIC CHARIOT ELECTRIQUE

BT11	DIAGNOSIS OF ELECTRIC PALLET TRUCKS (BT LEVIO)

Level, mode and duration	EXPERT	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Objective	• **Diagnosing** faults related to the electrical and electronic equipment of BT LEVIO Electric Pallet Trucks, • **Recommend** Repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part** : • Technical Description of the BT LEVIO Range of Electric Pallet Trucks, • Description of the Electrical/Electronic Architecture of LEVIO BT Trolleys, • Electrical system malfunctions (ICH, EPS, ACH/T, BCU, DHU) • Diagnostic steps and features of the TRUCKCOM BT Diagnostic tool (Installation of Packages on the TRUCKCOM BT Diagnostic tool, Programming of electronic modules, Testing and Calibration of Actuators and Sensors, Machine parameterization, …). ► **Practical Section:** 1. Collect the various symptoms of the forklift malfunction/breakdown and the history of forklift breakdowns and repairs (client + TRUCKCOM tool), 2. Formulate hypotheses regarding the cause of the trolley malfunction/breakdown. 3. Test or check the conformity of the truck's system and components (TRUCKCOM), 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components/parts to be changed or repaired, 6. Carry out the repair of the defective component or organ, 7. Test and adjust the system concerned by the repair (TRUCKCOM tool). ► **Part Assessment** : •Initial Test (Prerequisite Assessment) •Final Test (Evaluation of Acquired Skills)		
Target audience	Technician performing diagnostics		
Prerequisites	Have acquired the skills of the SENIOR Technician Level (Repair)		
Language	French		
Equipment	Training room and equipped workshop(s), adapted computer(s), BT LWE trolley (and/or LPE, LRE), AC and DC electric motors on bench, electrical/electronic simulation training bench.		
Documentation	Satisfaction report, Attendance sheet, Certificate of participation		
Date and Place	To be defined with the client	To be defined	

BT12	DIAGNOSIS OF STACKERS (BT STAXIO)

Level, mode and duration	EXPERT	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Diagnosing** faults related to the electrical and electronic equipment of STAXIO BT stackers • **Recommend** Repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part** : • Description and maintenance reminder for systems related to the chassis of the forklift (Brakes, Steering, Traction gearbox, masts, …), • Description of the autonomous navigation systems of the BT STAXIO stackers, • Electrical/Electronic Architecture of Toyota BT STAXIO Stackers, • Malfunctions of electrical systems (MCU/ICH, IPM, ACT/H, etc.), • Diagnostic steps and functionalities of the TRUCKCOM BT/WH Diagnostic tool (Installation of TRUCKCOM BT&WH Diagnostic Packages, Diagnostics, Component Calibration, Machine Parameter Setting, Module Programming), • Diagnostics from CID/LID displays using the CAN maintenance key. ► **Practical Section:** 1. Collect the various symptoms of the forklift malfunction/breakdown and the history of forklift breakdowns and repairs (customer + TRUCKCOM BT&WH tool), 2. Formulate hypotheses regarding the cause of the trolley malfunction/breakdown. 3. Test or check the conformity of the truck's system and components (TRUCKCOM), 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components/parts to be changed or repaired, 6. Carry out the repair of the defective component or organ, 7. Test and adjust the system concerned by the repair (TRUCKCOM BT&WH tool). ► **Part Assessment** : •Initial Test (Prerequisite Assessment) •Final Test (Evaluation of Acquired Skills)		
Target audience	Technician performing diagnostics		
Prerequisites	Have acquired the skills of the SENIOR Technician Level (Repair)		
Language	French		
Equipment	Training room and equipped workshop(s), adapted computer(s), VNA forklifts, CASTOR diagnostic tool.		
Documentation	Satisfaction report, Attendance sheet, Certificate of participation		
Date and Place	To be defined with the client	To be defined	

BT13	DIAGNOSIS OF RETRACTABLE MAST FORKS (REACH TRUCKS BT REFLEX)

Level, mode and duration	EXPERT	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Diagnosing** faults related to the electrical and electronic equipment of TMH-BT STACKERS (REACH TRUCKS (BT REFLEX RRE Retractable Mast Trucks)) • **Recommend** Repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part :** • Description and maintenance reminder for systems related to the chassis of the forklift (Brakes, Steering, Traction gearbox, masts, …), • Description and maintenance reminder for the electro-hydraulic system of Reach trucks , • Electrical/Electronic Architecture of BT Reach Trucks (Descriptions of the different CAN networks and sub-networks of the trucks), • Malfunctions of electrical systems (MCU, SCU, EPS, ACH, ACT, DHU, CID, LID, etc.), • Diagnostic steps and functionalities of the TRUCKCOM BT/WH Diagnostic tool (Installation of TRUCKCOM BT&WH Diagnostic Packages, Diagnosis, Testing and Calibration of Actuators and Sensors, Machine Parameterization, …), • Replacement and programming of MCU/SCU, ACH/T, CID modules, … • Forklift diagnostics from the CID with the CAN maintenance key. ► **Section :** 1. Collect the various symptoms of the forklift malfunction/breakdown and the history of forklift breakdowns and repairs (customer + TRUCKCOM BT&WH tool) 2. Formulate hypotheses regarding the cause of the trolley malfunction/breakdown. 3. Test or check the conformity of the truck's system and components (TRUCKCOM) 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components/parts to be changed or repaired, 6. Carry out the repair of the defective component or organ, 7. Test and adjust the system concerned by the repair (TRUCKCOM BT&WH tool) ► **Part Assessment :** •Initial Test (Prerequisite Assessment) •Final Test (Evaluation of Acquired Skills)		
Target audience	Technician performing diagnostics		
Prerequisites	Have acquired the skills of the SENIOR Technician Level (Repair)		
Language	French		
Equipment	Training room and equipped workshop(s), adapted computer(s), BT LWE/LPE pallet trucks, SWE/SPE/SRE stackers , RRE/RRE-H2 reach trucks, CASTOR diagnostic tool		
Documentation	Satisfaction report, Attendance sheet, Certificate of participation		
Date and Place	To be defined with the client	To be defined	

BT14	DIAGNOSIS OF RETRACTABLE MAST FORKS (HIGH PERFORMANCE RRE-H2)

Level, mode and duration	EXPERT	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Diagnosing** faults related to the electrical and electronic equipment of TMH-BT RRE-H2 forklifts • **Recommend** Repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part** : • Description and maintenance reminder for systems related to the forklift chassis (Brakes, Steering, Traction gearbox, masts, etc.) • New Electrical/Electronic Architecture (500kbits/s CAN) of the RRE-H2 Reach Trucks • Description and Operation of Gateway MCU and SCU Modules, • Malfunctions of electrical systems (DHU, DID, SWU, REU, CCH, DCHI, ACTL, ACTR, BDI, etc.) • Diagnostic steps and features of the TRUCKCOM WH/ Core Diagnostic tool (Installation of TRUCKCOM WH/ Core Packages , Diagnostics, Component Calibration, Machine Parameterization, Module Programming) • MID diagnosis by CAN maintenance key simulation in TRUCKCOM BT. ► **Practical Section:** 1. Collect the various symptoms of the forklift malfunction/breakdown and the history of forklift breakdowns and repairs (client + TRUCKCOM WH/ Core tool), 2. Formulate hypotheses regarding the cause of the trolley malfunction/breakdown. 3. Test or check the conformity of the truck's system and components (TRUCKCOM), 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components/parts to be changed or repaired, 6. Carry out the repair of the defective component or organ, 7. Test and adjust the system concerned by the repair (TRUCKCOM WH tool). ► **Part Assessment :** •Initial Test (Prerequisite Assessment) •Final Test (Evaluation of Acquired Skills)		
Target audience	Technician performing diagnostics

BT15	DIAGNOSIS OF "NARROW AISLE" FORKLIFT CARTS

Level, mode and duration	EXPERT	In-person	05 days
Presenter	**BT Expert Technical Trainer**		
Goals	• **Diagnosing** faults related to the electrical and electronic equipment of TMH-BT VECTOR narrow aisle forklifts of type VCE, • **Recommend** Repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part** : • Description and maintenance reminder for systems related to the chassis of the forklift (Brakes, Steering, Traction gearbox, masts, …), • Description of the autonomous navigation systems for TMH-BT VECTOR narrow aisle trolleys of type VCE, • Electrical/Electronic Architecture of BT Trolleys, narrow aisle trolleys TMH-BT VECTOR type VCE, • Malfunctions of electrical systems (MCU/SCU, DCHI, ICP, FCU, etc.), • Diagnostic steps and functionalities of the TRUCKCOM BT/WH Diagnostic tool (Installation of TRUCKCOM BT&WH Diagnostic Packages, Diagnostics, Component Calibration, Machine Parameter Setting, Module Programming), • Truck diagnostics from CID/LID displays with CAN maintenance key. ► **Practical Section:** 1. Collect the various symptoms of the forklift malfunction/breakdown and the history of forklift breakdowns and repairs (customer + TRUCKCOM BT&WH tool), 2. Formulate hypotheses regarding the cause of the trolley malfunction/breakdown. 3. Test or check the conformity of the truck's system and components (TRUCKCOM), 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components/parts to be changed or repaired, 6. Carry out the repair of the defective component or organ, 7. Test and adjust the system concerned by the repair (TRUCKCOM BT&WH tool). ► **Part Assessment** : •Initial Test (Prerequisite Assessment) •Final Test (Evaluation of Acquired Skills)		
Target audience	Technician performing diagnostics		
Prerequisites	Have acquired the skills of the SENIOR Technician Level (Repair)		
Language	French		
Equipment	Training room and equipped workshop(s), adapted computer(s), VNA forklifts, CASTOR diagnostic tool		
Documentation	Satisfaction report, Attendance sheet, Certificate of participation
