BODYWORK TRAINING CATALOGUE 2026

OUR COMMITMENT:

SUPPORT YOU IN DEVELOPING THE SKILLS AND PERFORMANCE OF YOUR EMPLOYEES AND YOUR DEPARTMENT.

Version dated January 3, 2026

EDITO

Dear Subsidiary,

The Academy is pleased to present you with its 2026 Bodywork catalog and informs you of our commitments to all subsidiaries:

- ✓ **Supporting you in developing the skills and performance of your employees and your department,**
- ✓ **Assisting you in resolving customer vehicle issues,**
- ✓ **Offering you standards for your employees' skill levels.**

The diversity of brands deployed by CFAO is a real asset in the development of our skills development offerings for subsidiaries across all the company's territories. This diversity challenges us to ensure a quality level of service within the After-Sales Service department, the Parts department, and others.

To meet the quality of your employees' performance, we propose deploying the following skills acquisition cycle:

- ✓ **Measuring** the current skills of the technicians on your teams,
- ✓ **Analyzing** the measurement data and deploying the skills development strategy,
- ✓ **Defining** individual and collective skills development plans,
- ✓ **Acquiring** knowledge and know-how through E-learning, face-to-face, and remote training,
- ✓ C**ertifying the** knowledge and know-how acquired,
- ✓ **Applying** new knowledge in the professional environment,
- ✓ **Performing** in the professional environment.

The development of new skills and technical services are carried out by **certified experts in their respective fields of expertise**, using innovative facilitation methods and effective diagnostic methods.

Thank you for your involvement in developing your employees' skills, and we remain at your disposal for any further information.

Best regards,

Laurent GONIN

TEAM CARROSSERIE ACADEMY

The Douala Academy covers 18 vehicle brands from 35 countries and serves 6 different target groups, including bodywork specialists and painters.

Regarding bodywork, the Academy has workshops in Douala that allow it to deliver training on all the topics offered in this catalog. The facilities include:

- A reception area and a restaurant,
- Three training rooms (equipped with a whiteboard, video projector, etc.),
- A 400 m² workshop,
- Training equipment including cars, hoods, fenders, and other parts,
- A parts store.

These training courses are offered at the Douala Academy as well as at its branches, depending on their capacity in terms of equipment, tools, and trainee accommodations.

DEVELOPING THE PROFESSIONAL EXPERTISE OF BODYWORKERS

BODYWORK SKILL LEVELS

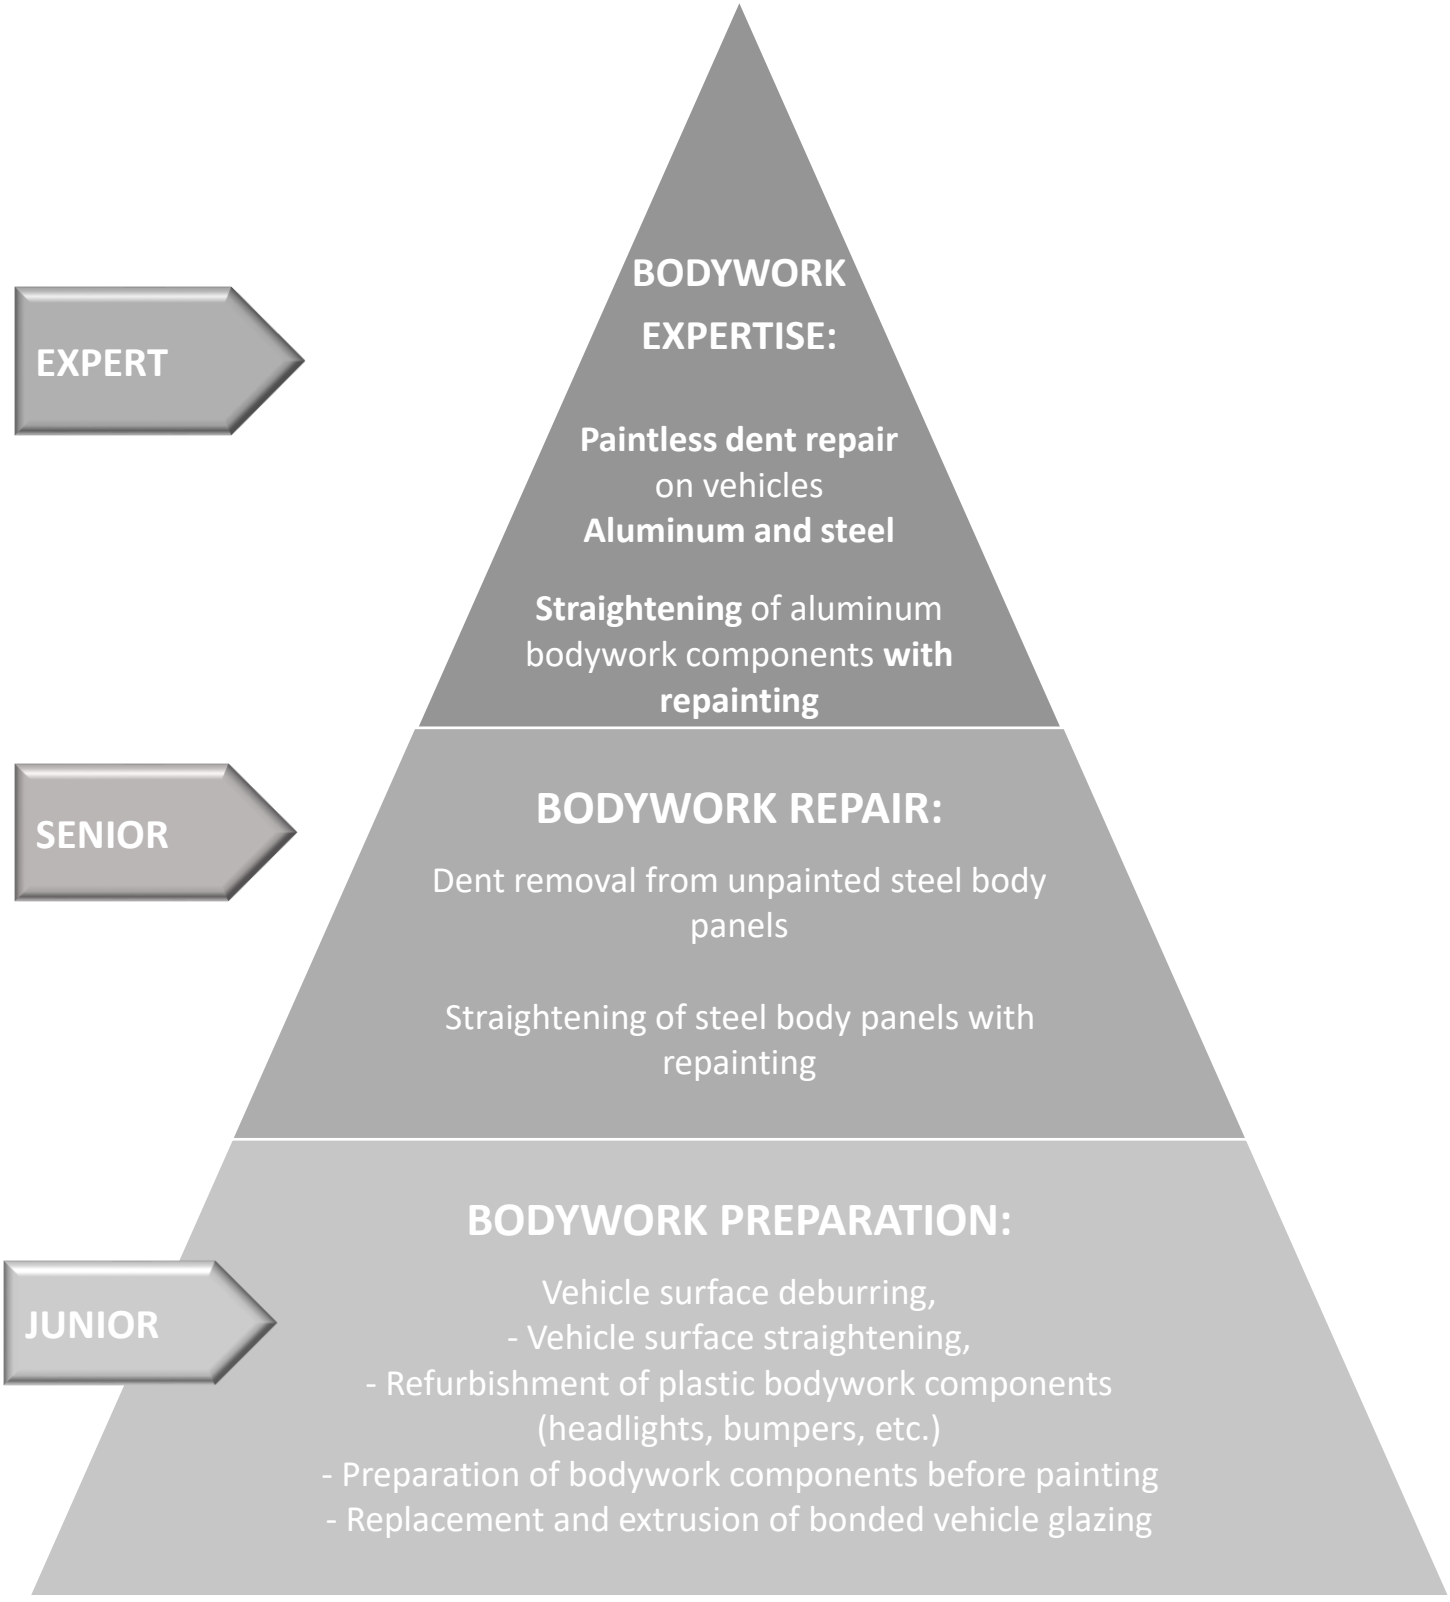

TABLE OF CONTENTS

Page	Code	Training Title	Duration	Location
		Junior		
7	01N1	**Rough Dent Removal** the elements **flat** bodywork elements **steel** of vehicles	5 days	In-Person
8	02N1	**Straightening** the elements **flat** bodywork elements **steel** of vehicles before painting	5 days	In-Person
9	03N1	**Renovation** the bodywork elements in **plastic** (headlights, bumpers...) on vehicles	5 days	In-Person
10	04N1	**Preparating** bodywork components before applying paint products	5 days	In-Person
11	05N1	**Replacement and Extrusion** the bonded glazing of the vehicle	5 days	In-Person
		SENIOR		
12	01N2	**Paintless Dent Removal** the elements bodywork elements steel **without paint**	5 days	In-Person
13	02N2	**Straightening** bodywork elements steel	5 days	In-Person
		EXPERT		
14	01N3	**Paintless Dent Removal** on vehicle **aluminium and steel** without paint	5 days	In-Person
15		**Straightening** bodywork elements **aluminium with paint refinishing**	5 days	In-Person

01N1	**Rough Dent Removal** the elements **flat** bodywork elements **steel** of vehicles

Level, Mode and Duration	**Junior**	**In-Person**	**05 days**
Trainer	**Expert Bodywork Trainer**		
Objectives	**Restore** to their original state the deformed flat sections of the steel bodywork (hoods, doors and roofs, ...) of vehicles.		
Description **Theory (50%)** **Practice (50%)**	► **Theoretical section:** • Composition of steel • Elastic limit of steel, • Risks of steel tearing, • Steel stamping technique, • Methods for identifying vehicle bodywork defects (light positioning and reflection control, ...), • Rough dent removal methods and tools (rods, suction cups, ...) based on the types of deformation of hoods and roofs of the vehicles, ► **Practical section:** • Identify and classify the various deformations of bodywork elements (hood, roof, ...) on vehicles, • Choose rough dent removal methods for vehicle bodywork elements, • Choose rough dent removal tools based on the type of deformation and method, • Rough dent removal using rods and suction cups for various detraining courses, • Visual inspection of rough dent removal with lamp. ► **Assessment:** • Initial theory test, • Practical test during training, • Final theory and practical test.		
Target Audience	Light Vehicle Technician		
Prerequisites	Knowledge of panel beating work		
Language	French		
Equipment	Equipped training room, computers, damaged vehicles, dent removal kits, inspection lamps		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation, Training report.		

02N1	**Straightening** the elements **flat** bodywork elements **steel** of vehicles before painting

Level, Mode and Duration	Junior	In-Person	05 days
Trainer	**Expert Bodywork Trainer**		
Objectives	**Restore** to their original state the deformed flat sections of the bodywork of the vehicle (hood, front wing, door, ...) with **paint refinishing**.		
Description **Theory (50%)** **Practice (50%)**	► **Theoretical section:** • Composition of steel, • Elastic limit of steel, • Risks of steel tearing, • Steel stamping technique, • Methods for identifying vehicle bodywork defects, • Straightening methods and tools (dollies, hammers, mallets, nail pullers, ...) based on the types of deformation of hoods and roofs of the vehicles, ► **Practical section:** • Identify and classify the various deformations of bodywork elements (hood and roof) on vehicles, • Choose straightening methods for bodywork elements (hood and roof) on vehicles, • Choose straightening tools based on the type of deformation and method, • Straightening using dollies/slapping files/mallets/nail pullers for various deformations • Visual and tactile inspection of the straightening. ► **Assessment:** • Initial theory test, • Practical test during training, • Final theory and practical test.		
Target Audience	Light Vehicle Technician		
Prerequisites	Knowledge of panel beating work		
Language	French		
Equipment	Equipped training room, computers, damaged vehicles, dent removal kits, inspection lamps		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation, Training report.		

03N1	**Renovation** the bodywork elements in plastic (headlights, bumpers...) on vehicles

Level, Mode and Duration	Junior	In-Person	05 days
Trainer	**Expert Bodywork – Panel Beating – Paint Trainer**		
Objectives	• **Repair of plastic** vehicle bumpers **by bonding and welding** • **Repair of defective plastic** headlight mounting brackets by **bonding** • **Repair** of faded plastic headlight lenses		
Description **Theory (50%)** **Practice (50%)**	► **Theoretical section:** • Characteristics of plastics (thermoplastics, composites) • Identification of plastic types used in bodywork • Repair products and methods (bonding, welding) • Surface preparation • Composition and behavior of plastics • Technical processes for repair by welding and bonding • Technical processes for refurbishing plastic headlight lenses • Preparation for painting • Safety instructions ► **Practical section:** • Bonding defective plastic headlight mounting brackets on vehicles. Complete repair of a plastic element, • Restoration of faded plastic headlight lenses on vehicles. Application of a specific plastic primer. • Finishing and quality control. ► **Assessment:** • Initial theory test, • Practical test during training, • Final theory and practical test.		
Target Audience	Light Vehicle Technician		
Prerequisites	Knowledge of panel beating work		
Language	French		
Equipment	Equipped training room, computers, damaged vehicles, dent removal kits, inspection lamps		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation, Training report.		

04N1	**Preparing** bodywork components before applying paint products

Level, Mode and Duration	Junior	In-Person	05 days
Trainer	**Expert Bodywork – Panel Beating – Paint Trainer**		
Objectives	- **Apply body filler to** les elements straightened of vehicles, - **Sand** the filled bodywork elements. - **Degrease** the elements straightened of vehicles, - **Mask** les elements of vehicles non involved par la paint, - **Mise en primer** bodywork elements**.**		
Description **Theory (50%)** **Practice (50%)**	► **Theoretical section:** • Identification les supports to traiter (Acier, plastic, aluminium, autres), • Identification the products de degreasing, • Identification of protection products for areas not involved in sanding or painting, • Choosing the appropriate body fillers, • Identification of sanding equipment for elements to be corrected, • Bodywork component preparation process. ► **Practical section:** • Apply body filler to les elements straightened of vehicles, • Fill straightened vehicle parts, • Sand filled vehicle parts. • Degrease straightened vehicle parts, • Mask off vehicle parts not to be painted, • Prime body parts, • Finishing and quality control before painting. ► **Assessment:** • Initial theory test, • Practical test during training, • Final theory and practical test.		
Target Audience	Light Vehicle Technician		
Prerequisites	Knowledge of panel beating work		
Language	French		
Equipment	Equipped training room, computers, damaged vehicles, dent removal kits, inspection lamps		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation, Training report.		

05N1	**Replacement and extrusion** of bonded and removable vehicle glazing

Level, Mode and Duration	Junior	In-Person	05 Days
Trainer	**Expert Bodywork – Panel Beating – Paint Trainer**		
Objectives	• **Replacing** bonded glazing (windshield, quarter window, removable glazing, rear window, etc.) • **Extruding** bonded vehicle glazing.		
Description **Theory (50%)** **Practice (50%)**	► **Theoretical section:** • Types of glazing (laminated, tempered and others), • Repairability regulations (size, position, type of impact) • Repair products and tools (resin, UV lamp) • Differences between bonded vs mechanical glazing • Adhesives and primers used • Calibration of **ADAS** (camera, radar) after replacement. ► **Practical section:** • **Replacement** the glazing panels (parebrise, glazing amovible, …) : • Removal and reinstallation of the bonded glazing, • Cutting of the bonded windshield, • Installation with polyurethane adhesive, • Leak test, • Configuration of peripheral equipment (camera, sensors, etc.) • **Extrude** the bonded glazing of the vehicle • Analysis of the impact • Repair with injected resin • Polishing and visual inspection. ► **Assessment:** • Initial theory test, • Practical test during training, • Final theory and practical test.		
Target Audience	Bodywork painter, panel beater, mechanic		
Prerequisites	Have completed the introductory training or practice regularly		
Language	French		
Equipment	Equipped training room, computers, glass repair kits, UV lamp, test windscreen		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation.		

01N2	**Paintless Dent Removal** the elements bodywork elements steel of vehicles **without paint**

Level, Mode and Duration	Senior	In-Person	05 Days
Trainer	**Expert Bodywork Trainer**		
Objectives	**Remove dents from non-flat bodywork elements** without damaging the paintwork and without repainting.		
Description **Theory (50%)** **Practice (50%)**	► **Theoretical section:** • Steel composition, • Steel yield strength, • Steel tearing risks, • Steel stamping techniques, • Dent removal methods and tools (rods, suction cups) depending on the type of deformation of vehicle components, • Methods for identifying vehicle bodywork defects (light positioning and reflection control, etc.), • Sanding and polishing methods after dent removal, ► **Practical section:** • Identify and classify the different types of dent repair on vehicle body panels, • Choose the appropriate dent repair methods for vehicle body panels, • Select the appropriate dent repair tools based on the type of dent and the chosen repair method, • Dent repair using rods and suction cups for various types of dent repair, • Visual inspection of the dent repair using a lamp. • Removal of trim from the parts to be repaired. • Finishing and quality control, • Sanding and polishing after dent repair of the body panels. ► **Assessment:** • Initial theory test, • Practical test during training, • Final theory and practical test.		
Target Audience	Light and Heavy Vehicle Technician		
Prerequisites	Knowledge of panel beating work		
Language	French		
Equipment	Equipped training room, computers, damaged vehicles, dent removal kits, inspection lamps		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation, Training report.		

02N2	**Straightening** bodywork elements steel of vehicles

Level, Mode and Duration	Senior	In-Person	05 Days
Trainer	**Expert Bodywork – Panel Beating – Paint Trainer**		
Objectives	• **Straightening** steel components on vehicles with paint touch-ups. • **Welding** torn body panels using MIG/MAG welding.		
Description **Theory (50%)** **Practice (50%)**	► **Theoretical section:** • Composition of steel, • Elastic limit of steel • Risks of steel tearing, • Steel stamping techniques, • Straightening methods and tools (rods, suction cups) depending on the types of deformation of vehicle hoods and roofs, • Methods for identifying vehicle bodywork defects, • The principle and settings of MAG welding. ► **Practical section:** • Identify and classify the different deformations of vehicle body panels (hood and roof), • MAG welding of torn body panels, • Select methods for straightening vehicle body panels, • Select straightening tools based on the type of deformation, • Selection of straightening tools, • Application of straightening methods, • Visual and tactile inspection of the straightening. ► **Assessment:** • Initial theory test, • Practical test during training, • Final theory and practical test.		
Target Audience	Light and Heavy Vehicle Technician		
Prerequisites	Knowledge of panel beating work		
Language	French		
Equipment	Equipped training room, computers, damaged vehicles, dent removal kits, inspection lamps		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation, Training report.		

01N3	**Paintless Dent Removal** sur vehicle **aluminium and steel** without paint

Level, Mode and Duration	**Expert**	**In-Person**	**05 Days**
Trainer	**Expert Bodywork Trainer**		
Objectives	**Dent removal** from aluminum and steel bodywork on vehicles without repainting.		
Description **Theory (50%)** **Practice (50%)**	► **Theoretical section:** • Dent removal methods and tools (rods, suction cups) depending on the type of deformation of vehicle components, • Methods for identifying vehicle bodywork defects (light positioning and reflection control, etc.), • Sanding and polishing methods after dent removal. ► **Practical section:** • Identify and classify the different types of denting on aluminum and steel vehicle body panels, • Choose the appropriate dent removal methods for vehicle body panels, • Select the appropriate dent removal tools based on the type of dent and the chosen repair method, • Perform dent removal using rods and suction cups to correct various dents, • Visually inspect the dent repair using a lamp. • Remove trim from the areas to be repaired. • Finishing and quality control, • Sanding and polishing after dent removal on body panels. ► **Assessment:** • Initial theory test, • Practical test during training, • Final theory and practical test.		
Target Audience	Light Vehicle Technician et		
Prerequisites	Knowledge of panel beating work		
Language	French		
Equipment	Equipped training room, computers, damaged vehicles, dent removal kits, inspection lamps		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation, Training report.		

02N3	**Straightening** bodywork elements **aluminium** with paint refinishing

Level, Mode and Duration	**Expert**	**In-Person**	**05 Days**
Trainer	**Expert Bodywork – Panel Beating – Paint Trainer**		
Objectives	• **Straighten** bodywork elements **aluminium** with paint refinishing. • **Weld** bodywork elements **aluminium** torn au MIG		
Description **Theory (50%)** **Practice (50%)**	► **Theoretical section:** • Composition of aluminum, • Elastic limit of aluminum • Risks of aluminum tearing, • Aluminum stamping techniques, • Straightening methods and tools (rods, suction cups) depending on the types of deformation of vehicle hoods and roofs, • Methods for identifying vehicle bodywork defects, • The principle and settings of MAG welding. ► **Practical section:** • Identify and classify the different deformations of vehicle body panels (hood and roof), • MAG welding of torn body panels, • Select methods for straightening vehicle body panels, • Select straightening tools based on the type of deformation, • Selection of straightening tools, • Application of straightening methods, • Visual and tactile inspection of the straightening. ► **Assessment:** • Initial theory test, • Practical test during training, • Final theory and practical test.		
Target Audience	Light and Heavy Vehicle Technician		
Prerequisites	Knowledge of panel beating work		
Language	French		
Equipment	Equipped training room, computers, damaged vehicles, dent removal kits, inspection lamps		
Documentation	Attendance sheet, Satisfaction form, Certificate of participation, Training report.
