TECHNICAL TRAINING CATALOGUE 2026

OUR COMMITMENT:
TO ASSIST YOU IN DEVELOPING THE COMPETENCE AND PERFORMANCE OF YOUR EMPLOYEES AND YOUR SERVICE.

Version of October 27, 2025

EDITO

Dear Subsidiary,

The Group Academy is pleased to present its catalogue of services for 2026 and to inform you of our commitments for all subsidiaries:

- ✓ **To support you in developing the skills and performance of your employees and your service,**
- ✓ **To support you in resolving technical problems on customer vehicles,**
- ✓ **To standardize and normalize the skill levels of the group's technicians.**

The diversity of brands deployed by CFAO is a real asset for the development of our skills development offers to subsidiaries throughout the company's territories. This diversity challenges us to ensure a high level of service quality within the after-sales service, the parts service, the sales department and the financial and legal service.

To improve the quality of your employees' services, we recommend deploying the following technical skills acquisition cycle:

- ✓ **Measure** the current skills of technicians and teams,
- ✓ **Exploit** the results to guide the skills development strategy,
- ✓ **Define** individual and collective skills development plans,
- ✓ **Acquire** new skills through face-to-face or remote trainings,
- ✓ **Certify** the new skills acquired,
- ✓ **Apply** new skills in a professional environment,
- ✓ **Perform** in a professional environment.

We also offer to **assist** you in **resolving technical problems** that you encounter in your workshops, with **technical support integrated** into the Academy.

The development of new skills is carried out by certified experts each in their areas of expertise, using innovative training methods.

Thank you for your commitment to developing the skills of your employees. We look forward to hearing from you.

Laurent GONIN

TEAM EQUIPMENT

The Douala Academy for EQUIPMENT is dedicated to the **RENAULT TRUCKS, JCB, LOVOL, TOYOTA FORKLIFT, BT, FUSO, HINO, SINOTRUK, SHACMAN and KING LONG** brands and is equipped with:

- A reception and a restaurant,
- Two training rooms (board, video projector, others),
- A 200 m² workshop,
- Didactic equipment for engines, transmissions and others,
- A RENAULT TRUCKS K Range truck

Our training courses are delivered at the Douala Academy and at all our subsidiaries. We also provide training at our customers' sites. Training sessions are made up of a maximum of twelve trainees.

Laurent GONIN
CFAO Training Director

André Yves BOKALLY
Training Coordinator & Project Manager

Claudia EYINGA
Training Assistant

Lucien GAGNE
Technical Trainer Expert (RENAULT TRUCKS, HINO, FUSO)

Idris NKOA
Technical Trainer Expert (TOYOTA BT, KING LONG, SINOTRUK)

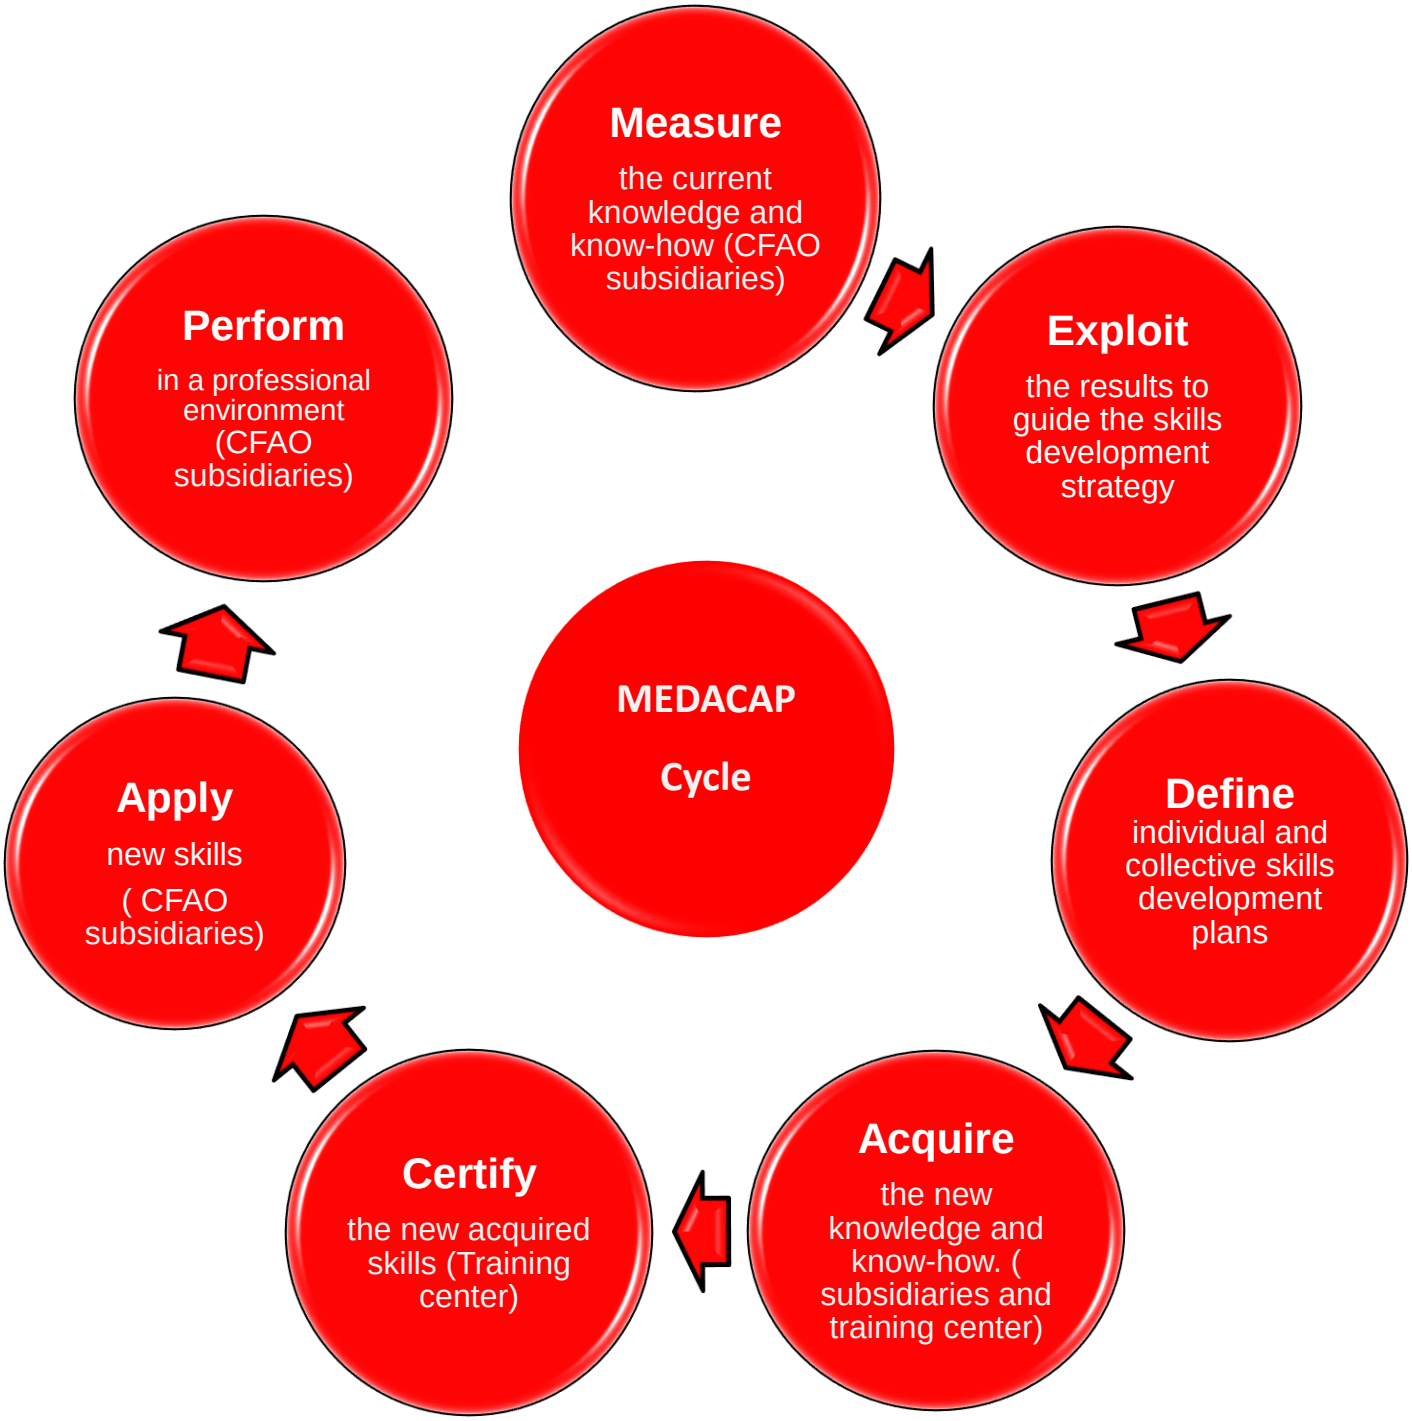

Thierry KOUGHA
Technical Trainer Expert (TOYOTA FORKLIFT, JCB, LOVOL)

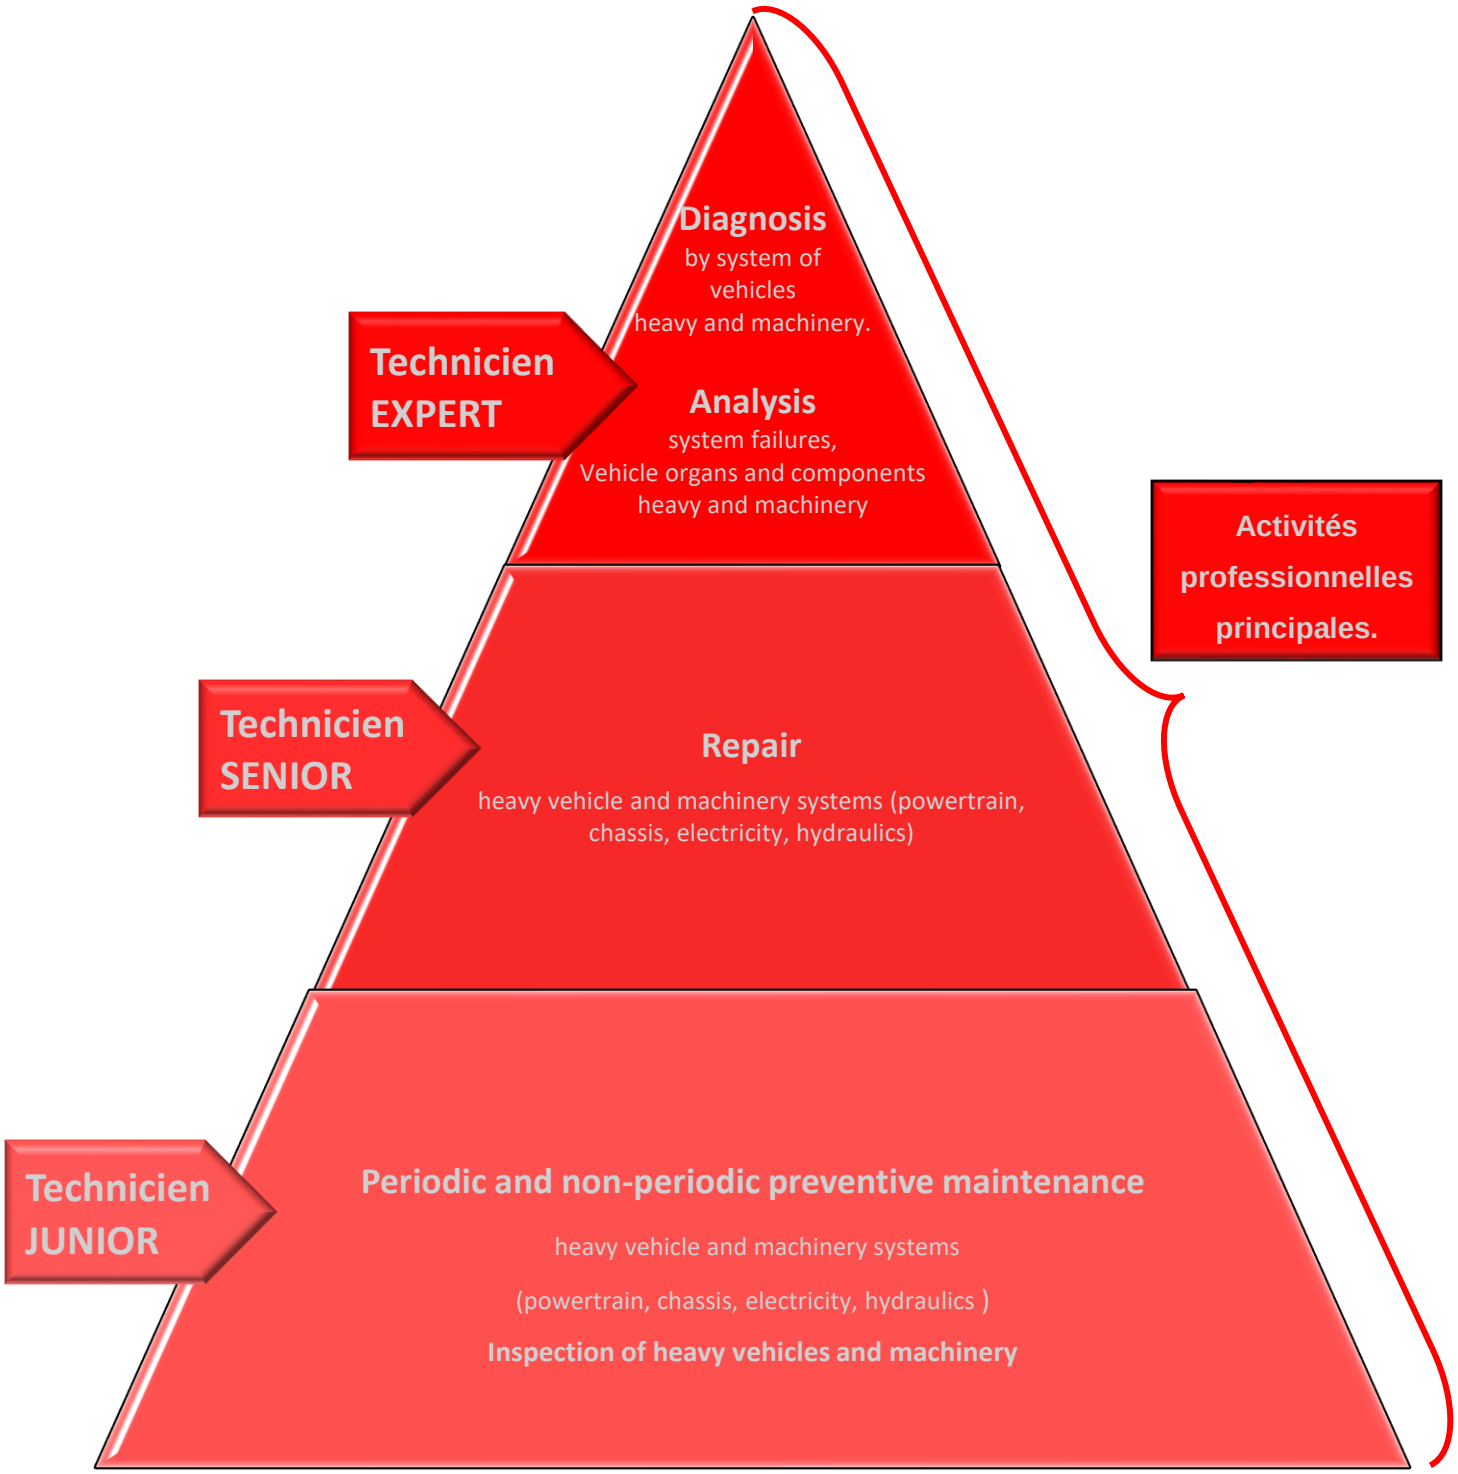

Roland NENDA
Operator Trainer
All- brands expert (Trucks and Heavy Equipment)

DEVELOPING TECHNICIANS' PROFESSIONAL EXPERTISE

SKILL LEVELS OF TECHNICIANS

TRAINING BY TECHNICIAN LEVEL

	Theoretical Training (Knowledge -> E-Learning/Distance Learning)		Practical training (Know-how -> Face-to-face)	
	Themes	Duration (days)	Themes	Duration (days)
Technicien EXPERT	❖ The 7 stages of diagnosis applied to the different systems of the heavy vehicle (powertrain, chassis, electricity), ❖ Diag Tool Features	20	❖ Engine Diagnosis 4D37 (FUSO FI), ❖ 6S20 Engine Diagnosis (FUSO FJ), ❖ G85 Gearbox Diagnosis, ❖ G131 Gearbox Diagnosis, ❖ Electrical System Diagnosis ❖ Conventional braking system diagnosis (with ABS)	5 5 5 5 5 5
Technicien SENIOR	❖ Technological knowledge of the various heavy vehicle systems (powertrain, chassis, electricity). ❖ Removal and installation procedure in accordance with the manufacturer, ❖ Disassembly and reassembly procedure in accordance with the manufacturer ❖ Manufacturer-compliant component inspection procedure	20	❖ 4D37 Engine Repair (FUSO FI), ❖ 6S20 Engine Repair (FUSO FJ), ❖ G85 Gearbox Repair, ❖ Gearbox repair 131, ❖ Electrical Repair ❖ Repair Conventional braking system (with ABS)	5 5 5 5 5 5
Technicien JUNIOR	❖ Brand history (ranges of heavy vehicles, characteristics, etc.), ❖ Description of the structure of the heavy vehicle and the roles of its different systems (powertrain, chassis, electricity). ❖ Role of liquids and lubricants. ❖ Principle of use of metrology tools, ❖ Periodic and non-periodic preventive maintenance of heavy vehicles, ❖ The fundamentals of engine, transmission, electricity, hydraulics, ❖ Others.	25	❖ Preventive maintenance of FI/FJ Truck systems	5

CONTENTS

Page	Code	Training designation	Date	Number of days	Place
8 to 9	JUNIOR TECHNICIAN (PREVENTIVE MAINTENANCE)				
9	F01	Preventive maintenance of FI/FJ truck systems	To be defined	5 days	To be defined
10 to 16	SENIOR TECHNICIAN (REPAIR)				
11	F02	4D37 Engine Repai (FUSO FI)	To be defined	5 days	To be defined
12	F03	6S20 Engine Repair (FUSO FJ)	To be defined	5 days	To be defined
13	F04	G85 Gearbox Repair	To be defined	5 days	To be defined
14	F05	G131 Gearbox Repair	To be defined	5 days	To be defined
15	F06	Electrical Repair	To be defined	5 days	To be defined
16	F07	Conventional Braking System Repair	To be defined	5 days	To be defined
17 to 23	EXPERT TECHNICIAN (DIAGNOSTICS)				
18	F08	4D37 Engine Diagnosis (FUSO FI)	To be defined	5 days	To be defined
19	F09	6S20 Engine Diagnosis (FUSO FJ)	To be defined	5 days	To be defined
20	F10	G85 Gearbox Diagnosis	To be defined	5 days	To be defined
21	F11	G131 Gearbox Diagnosis	To be defined	5 days	To be defined
22	F12	Electrical System Diagnosis	To be defined	5 days	To be defined
23	F13	Conventional Braking System Diagnosis	To be defined	5 days	To be defined

JUNIOR TECHNICIAN

PREVENTIVE MAINTENANCE

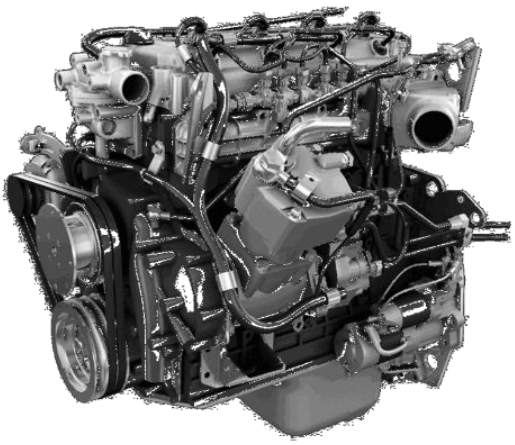

F 01	PREVENTIVE MAINTENANCE OF FI/FJ TRUCK SYSTEMS

Level, Mode and Duration	JUNIOR	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Maintain** the systems (powertrain, chassis, electricity) in operation according to the manufacturer's recommendations, • **Inspect** the systems (engine, chassis, electricity) of the heavy goods vehicle according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part :** • Truck ranges and their characteristics, • Description of the vehicle structure and role of the different truck systems (Powertrain, Chassis, Electricity), • Roles of liquids and lubricants, • Principle of use of metrology tools, • The different types of maintenance applied to FUSO trucks and maintenance periods in accordance with the manufacturer, • Periodic and Non-periodic Preventive Maintenance of systems and components in accordance with the manufacturer. ► **Practical Part:** • Replace oils and fluids (Engine, Gearbox, axles, others), • Top up oils and fluids (Engine, Gearbox, Axles, Others), • Remove and replace the components (belt and accessories, pads or linings, etc.) according to the manufacturer's recommendations, • Check the conformity of the components (dimensional, flatness, voltage, intensity, etc.) to the manufacturer's expectations before reassembling them, • Visually inspect FUSO truck systems. ► **Part Assessment :** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	Have completed training in basic mechanics and basic electricity		
Language	French		
Equipment	Equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation.		

SENIOR TECHNICIAN

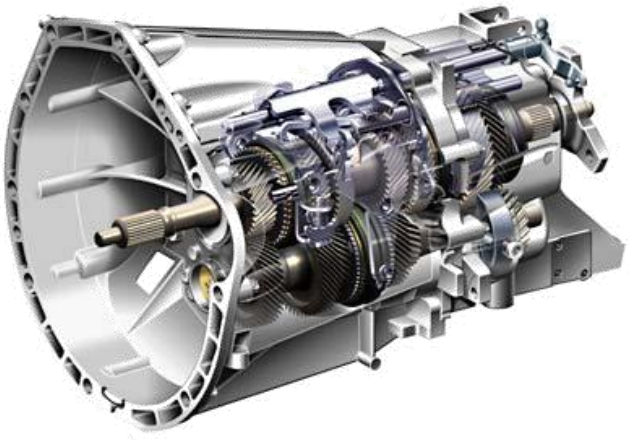

REPAIR

Moteur 4D37

Moteur 6S20

Boîte de vitesses G85

Boîte de vitesses G131

F 02	4D37 ENGINE REPAIR (FUSO FI)

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Remove** and **reinstall** the 4D37 engine following the manufacturer's recommendations , • **Disassemble** and **reassemble the** 4D37 engine following the manufacturer's instructions, • **Check** compliance **4D37** engine components meet manufacturer expectations , • **Test and adjust** the 4D37 engine according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the 4D37 engine, • Description of the lubrication and cooling system, • Description of the injection system, • Description of the electronic engine management system, • Procedure for removing and installing the engine following the manufacturer's instructions, • Procedure for disassembling and reassembling the engine following the manufacturer's instructions, • Procedure for checking engine components according to the manufacturer's instructions. ► **Practical Part :** • Remove the 4D37 engine following the manufacturer's instructions, • Disassemble the 4D37 engine following the manufacturer's instructions, • Clean the 4D37 engine components, • Check the conformity of components to the manufacturer's expectations, • Replace non-compliant components to the manufacturer's expectations, • Reassemble the engine components following the manufacturer's instructions, • Reinstall the engine on the truck following the manufacturer's instructions, • Test and adjust the engine on the truck. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Equipped training room and workshop, 4D37 engine on bench, Adapted vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

F 03	6S20 ENGINE REPAIR (FUSO FJ)

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Remove** and **reinstall** the 6S20 engine following the manufacturer's recommendations , • **Disassemble** and **reassemble the** 6S20 engine following the manufacturer's instructions, • **Check** compliance **6S20** engine components meet manufacturer expectations , • **Test and adjust** the 6S20 engine according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the 6S20 engine, • Description of the lubrication and cooling system, • Description of the injection system, • Description of the electronic engine management system, • Procedure for removing and installing the engine following the manufacturer's instructions, • Procedure for disassembling and reassembling the engine following the manufacturer's instructions, • Procedure for checking engine components according to the manufacturer's instructions. ► **Practical Part :** • Remove the 6S20 engine following the manufacturer's instructions, • Disassemble the 6S20 engine following the manufacturer's instructions, • Clean the 6S20 engine components, • Check the conformity of components to the manufacturer's expectations, • Replace non-compliant components to the manufacturer's expectations, • Reassemble the engine components following the manufacturer's instructions, • Reinstall the engine on the truck following the manufacturer's instructions, • Test and adjust the engine on the truck. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Equipped training room and workshop, 6S20 engine on bench, Adapted vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

F04	G85 GEARBOX REPAIR

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Put down** and **put back** the box of speeds G85 in accordance with the manufacturer's recommendations , • **Disassemble** and **reassemble** the box of speeds G85 in accordance with the manufacturer's instructions, • **Check** compliance components of the box of speeds G85 to the manufacturer's expectations , • **Test and adjust** the box of speeds G85 in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the box of speeds G85, • Removal and installation procedure following the manufacturer's instructions, • Disassembly and reassembly procedure following the manufacturer's instructions, • Procedure for checking components according to the manufacturer's instructions. ► **Practical Part :** • Drop the box of speeds G85 following the manufacturer's instructions, • Disassemble the box of speeds G85 following the manufacturer's instructions, • Clean the components of the box of speeds G85 , • Check the conformity of components to the manufacturer's expectations, • Replace non-compliant components to the manufacturer's expectations, • Reassemble the engine components following the manufacturer's instructions, • Put the box of speeds G85 on the truck following the manufacturer's instructions, • Test and adjust the box of speeds G85 on the truck. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Equipped training room and workshop, Box of speeds G85 on bench, Adapted vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

F05	G131 GEARBOX REPAIR

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Put down** and **put back** the box of speeds G131 in accordance with the manufacturer's recommendations , • **Disassemble** and **reassemble** the box of speeds G131 in accordance with the manufacturer's instructions, • **Check** compliance components of the box of speeds G85 to the manufacturer's expectations , • **Test and adjust** the box of speeds G131 in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the box of speeds G131, • Removal and installation procedure following the manufacturer's instructions, • Disassembly and reassembly procedure following the manufacturer's instructions, • Procedure for checking components according to the manufacturer's instructions. ► **Practical Part :** • Drop the box of speeds G131 following the manufacturer's instructions, • Disassemble the box of speeds G131 following the manufacturer's instructions, • Clean the components of the box of speeds G131 , • Check the conformity of components to the manufacturer's expectations, • Replace non-compliant components to the manufacturer's expectations, • Reassemble the engine components following the manufacturer's instructions, • Put the box of speeds G131 on the truck following the manufacturer's instructions, • Test and adjust the box of speeds G131 on the truck. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Equipped training room and workshop, Box of speeds G131 on bench, Adapted vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

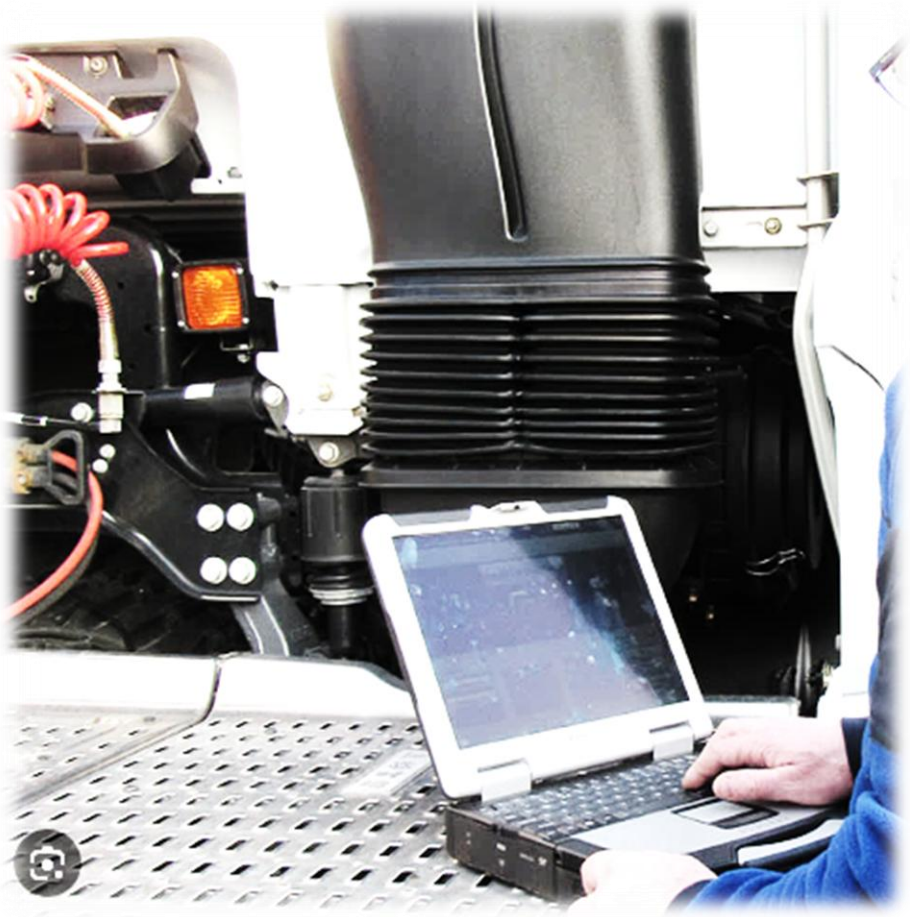

F06	ELECTRICAL REPAIR

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Remove and replace** the electrical system circuit components (starting, charging, air conditioning and lighting circuits, etc.) in accordance with the manufacturer's recommendations, • **Disassemble and reassemble** parts of the electrical system in accordance with the manufacturer's recommendations, • **Check** the conformity of the components of the electrical organs (fuse, relay, starter, alternator, etc.) with the manufacturer's expectations, • **Test and adjust** electrical circuits in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the electrical system and its various circuits (starting circuit, charging circuit, air conditioning circuit, lighting circuit, etc.) • Procedure for checking electrical components and organs according to the manufacturer's instructions. ► **Practical Part :** • Remove and install the electrical circuit components according to the manufacturer's recommendations, • Disassemble and reassemble the vehicle's electrical components according to the manufacturer's recommendations, • Clean the components and organs of the electrical circuit, • Check the conformity of the components of the electrical organs (fuse, relay, starter, alternator, etc.) with the manufacturer's expectations, • Replace components that do not meet the manufacturer's expectations, • Test and adjust the component in the vehicle's electrical circuit. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

F07	CONVENTIONAL BRAKE SYSTEM REPAIR (ABS)

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Remove and reinstall** the drum brake mechanism according to the manufacturer's recommendations, • **Disassemble and reassemble** the drum brake mechanism according to the manufacturer's recommendations, • **Check** that the drum brake components meet the manufacturer's specifications, • **Test and adjust** the cam brake mechanism according to the manufacturer's recommendations,		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the conventional braking system (mechanical and pneumatic), • Types of brakes, • Description and operation of the cam brake, • Removal and installation procedure for the cam brake, according to the manufacturer's instructions, • Disassembly and reassembly procedure for the cam brake, according to the manufacturer's instructions Manufacturer, • Procedure for checking the components of the S cam brake, according to the manufacturer's instructions. ► **Practical Part:** • Description and operation of the conventional braking system (mechanical and pneumatic), • Types of brakes, • Description and operation of the cam brake, • Removal and installation procedure for the cam brake, according to the manufacturer's instructions, • Disassembly and reassembly procedure for the cam brake, according to the manufacturer's instructions Manufacturer, • • Procedure for checking the components of the S cam brake, according to the manufacturer's instructions. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

TECHNICIAN EXPERT
DIAGNOSYS

F08	4D37 ENGINE DIAGNOSTICS (FUSO FI)

Level, Mode and Duration	EXPERT	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Diagnose** 4D37 engine related faults, • **Recommend** remedial actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Reminder on the description of the injection system and electronic engine management, • Malfunctions of the 4D37 engine components, • Diagnostic steps and features of the Diag tool. ► **Practical Part :** 1. Collect the various symptoms of the malfunction/failure and the history of the truck's failures and repairs (Client and Diag tool), 2. Estimate the cause of the malfunction/breakdown, 3. Test or check the conformity of the 4D37 engine systems and components with the manufacturer's recommendations, 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Develop recommendations for components to be changed or repaired, 6. Carry out the repair of the defective component, 7. Test and adjust the system affected by the truck repair. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technicians performing diagnostics		
Prerequisites	Have acquired the skills of SENIOR Technician (Repair)		
Language	French		
Equipment	Equipped training room and workshop, 4D37 engine on bench, Diagnostic tool, Adapted vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

F09	6S20 ENGINE DIAGNOSTICS (FUSO FJ)

Level, Mode and Duration	EXPERT	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Diagnose** 6S20 engine related faults, • **Recommend** remedial actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Reminder on the description of the injection system and electronic engine management, • Malfunctions of the 6S20 engine components, • Diagnostic steps and features of the Diag tool. ► **Practical Part :** 1. Collect the various symptoms of the malfunction/failure and the history of the truck's failures and repairs (Client and Diag tool), 2. Estimate the cause of the malfunction/breakdown, 3. Test or check the conformity of the 6S20 engine systems and components with the manufacturer's recommendations, 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Develop recommendations for components to be changed or repaired, 6. Carry out the repair of the defective component, 7. Test and adjust the system affected by the truck repair. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technicians performing diagnostics		
Prerequisites	Have acquired the skills of SENIOR Technician (Repair)		
Language	French		
Equipment	Equipped training room and workshop, 6S20 engine on bench, Diagnostic tool, Adapted vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

F10	G85 GEARBOX DIAGNOSTICS

Level, Mode and Duration	EXPERT	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Diagnose** faults related to the G85 gearbox, • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Review of the description and operation of the G85 gearbox, • Malfunctions of G85 gearbox components, • Diagnostic steps and functionalities of the diagnostic tool. ► **Practical Part :** 1. Gather the various symptoms of the malfunction/failure and the truck's history of breakdowns and repairs (Customer and diagnostic tool), 2. Formulate hypotheses regarding the cause of the malfunction/failure, 3. Test or verify the conformity of the G85 gearbox systems and components with the manufacturer's recommendations, 4. Identify the most probable hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components to be replaced or repaired, 6. Carry out the repair of the defective component, **7.** Test and adjust the system involved in the truck repair. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technicians performing diagnostics		
Prerequisites	Completion of the SENIOR Technician level (System Repair/Overhaul)		
Language	French		
Equipment	Equipped training room and workshop, G85 gearbox on a test bench, diagnostic tool, suitable vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

F11	G131 GEARBOX DIAGNOSTICS

Level, Mode and Duration	EXPERT	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Diagnose** faults related to the G131 gearbox, • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Review of the description and operation of the G131 gearbox, • Malfunctions of G131 gearbox components, • Diagnostic steps and functionalities of the diagnostic tool. ► **Practical Part :** 1. Gather the various symptoms of the malfunction/failure and the truck's history of breakdowns and repairs (Customer and diagnostic tool), 2. Formulate hypotheses regarding the cause of the malfunction/failure, 3. Test or verify the conformity of the G131 gearbox systems and components with the manufacturer's recommendations, 4. Identify the most probable hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components to be replaced or repaired, 6. Carry out the repair of the defective component, **7.** Test and adjust the system involved in the truck repair. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technicians performing diagnostics		
Prerequisites	Completion of the SENIOR Technician level (System Repair/Overhaul)		
Language	French		
Equipment	Equipped training room and workshop, G131 gearbox on a test bench, diagnostic tool, suitable vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

F12	ELECTRICAL DIAGNOSTICS

Level, Mode and Duration	EXPERT	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Diagnose** faults related to Fuso FI/FJ electrical and electronic systems, • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the electronic/electrical architecture, • Description and functions of the electronic architecture modules, • Malfunctions of the electrical system (starting, charging, air conditioning, and lighting circuits, etc.), and electronic system (modules), • Diagnostic steps and functionalities of the diagnostic tool. ► **Practical Part :** 1. Gather information on the various symptoms of the malfunction/failure and the history of breakdowns and repairs of the forklift (Customer and Diagnostic tool), 2. Formulate hypotheses regarding the cause of the malfunction/failure, 3. Test or verify the conformity of the system and electrical components with the manufacturer's recommendations, 4. Identify the most probable hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components/parts to be replaced or repaired, 6. Carry out the repair of the defective component or part, 7. Test and adjust the system affected by the repair. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technicians performing diagnostics		
Prerequisites	Completion of the SENIOR Technician (Repair/Overhaul) level		
Language	French		
Equipment	Equipped training room and workshop, diagnostic tools, and suitable vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

F13	CONVENTIONAL BRAKING SYSTEM DIAGNOSTICS (with ABS)

Level, Mode and Duration	EXPERT	Face-to-face	05 days
Animator	**FUSO Expert Trainer**		
Goals	• **Diagnose** malfunctions related to the conventional braking system • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Review of the description and operation of conventional braking system components, • Malfunctions of conventional braking system components, • Diagnostic steps and functionalities of the diagnostic tool. ► **Practical Part :** 1. Gather the various symptoms of the malfunction/failure and the truck's history of breakdowns and repairs (Customer and diagnostic tool), 2. Formulate hypotheses regarding the cause of the malfunction/failure, 3. Test or verify the conformity of the conventional braking system's systems and components with the manufacturer's recommendations, 4. Identify the most probable hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components to be replaced or repaired, 6. Carry out the repair of the defective component, 7. Test and adjust the system affected by the truck repair. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technicians performing diagnostics		
Prerequisites	Completion of the SENIOR Technician (Repair/Overhaul) level		
Language	French		
Equipment	Equipped training room and workshop, diagnostic tools, and suitable vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.
