TECHNICAL TRAINING CATALOGUE 2026

KING LONG

OUR COMMITMENT:

TO ASSIST YOU IN DEVELOPING THE COMPETENCE AND PERFORMANCE OF YOUR EMPLOYEES AND YOUR SERVICE.

Version of October 27, 2025

EDITO

Dear Subsidiary,

The Group Academy is pleased to present its catalogue of services for 2026 and to inform you of our commitments for all subsidiaries:

- ✓ **To support you in developing the skills and performance of your employees and your service,**
- ✓ **To support you in resolving technical problems on customer vehicles,**
- ✓ **To standardize and normalize the skill levels of the group's technicians.**

The diversity of brands deployed by CFAO is a real asset for the development of our skills development offers to subsidiaries throughout the company's territories. This diversity challenges us to ensure a high level of service quality within the after-sales service, the parts service, the sales department and the financial and legal service.

To improve the quality of your employees' services, we recommend deploying the following technical skills acquisition cycle:

- ✓ **Measure** the current skills of technicians and teams,
- ✓ **Exploit** the results to guide the skills development strategy,
- ✓ **Define** individual and collective skills development plans,
- ✓ **Acquire** new skills through face-to-face or remote trainings,
- ✓ **Certify** the new skills acquired,
- ✓ **Apply** new skills in a professional environment,
- ✓ **Perform** in a professional environment.

We also offer to **assist** you in **resolving technical problems** that you encounter in your workshops, with **technical support integrated** into the Academy.

The development of new skills is carried out by certified experts each in their areas of expertise, using innovative training methods.

Thank you for your commitment to developing the skills of your employees. We look forward to hearing from you.

Laurent GONIN

TEAM EQUIPMENT

The Douala Academy for EQUIPMNET is dedicated to the **RENAULT TRUCKS, JCB, LOVOL, TOYOTA FORKLIFT, BT, FUSO, HINO, SINOTRUK, SHACMAN and KING LONG** brands and is equipped with:

- A reception and a restaurant,
- Two training rooms (board, video projector, others),
- A 200 m² workshop,
- Didactic equipment for engines, transmissions and others,
- A RENAULT TRUCKS K Range truck

Our training courses are delivered at the Douala Academy and at all our subsidiaries. We also provide training at our customers' sites. Training sessions are made up of a maximum of twelve trainees.

Laurent GONIN
CFAO Training Director

André Yves BOKALLY
Training Coordinator & Project Manager

Claudia EYINGA
Training Assistant

Lucien GAGNE
Technical Trainer Expert (RENAULT TRUCKS, HINO, FUSO)

Idris NKOA
Technical Trainer Expert (TOYOTA BT, KING LONG, SINOTRUK)

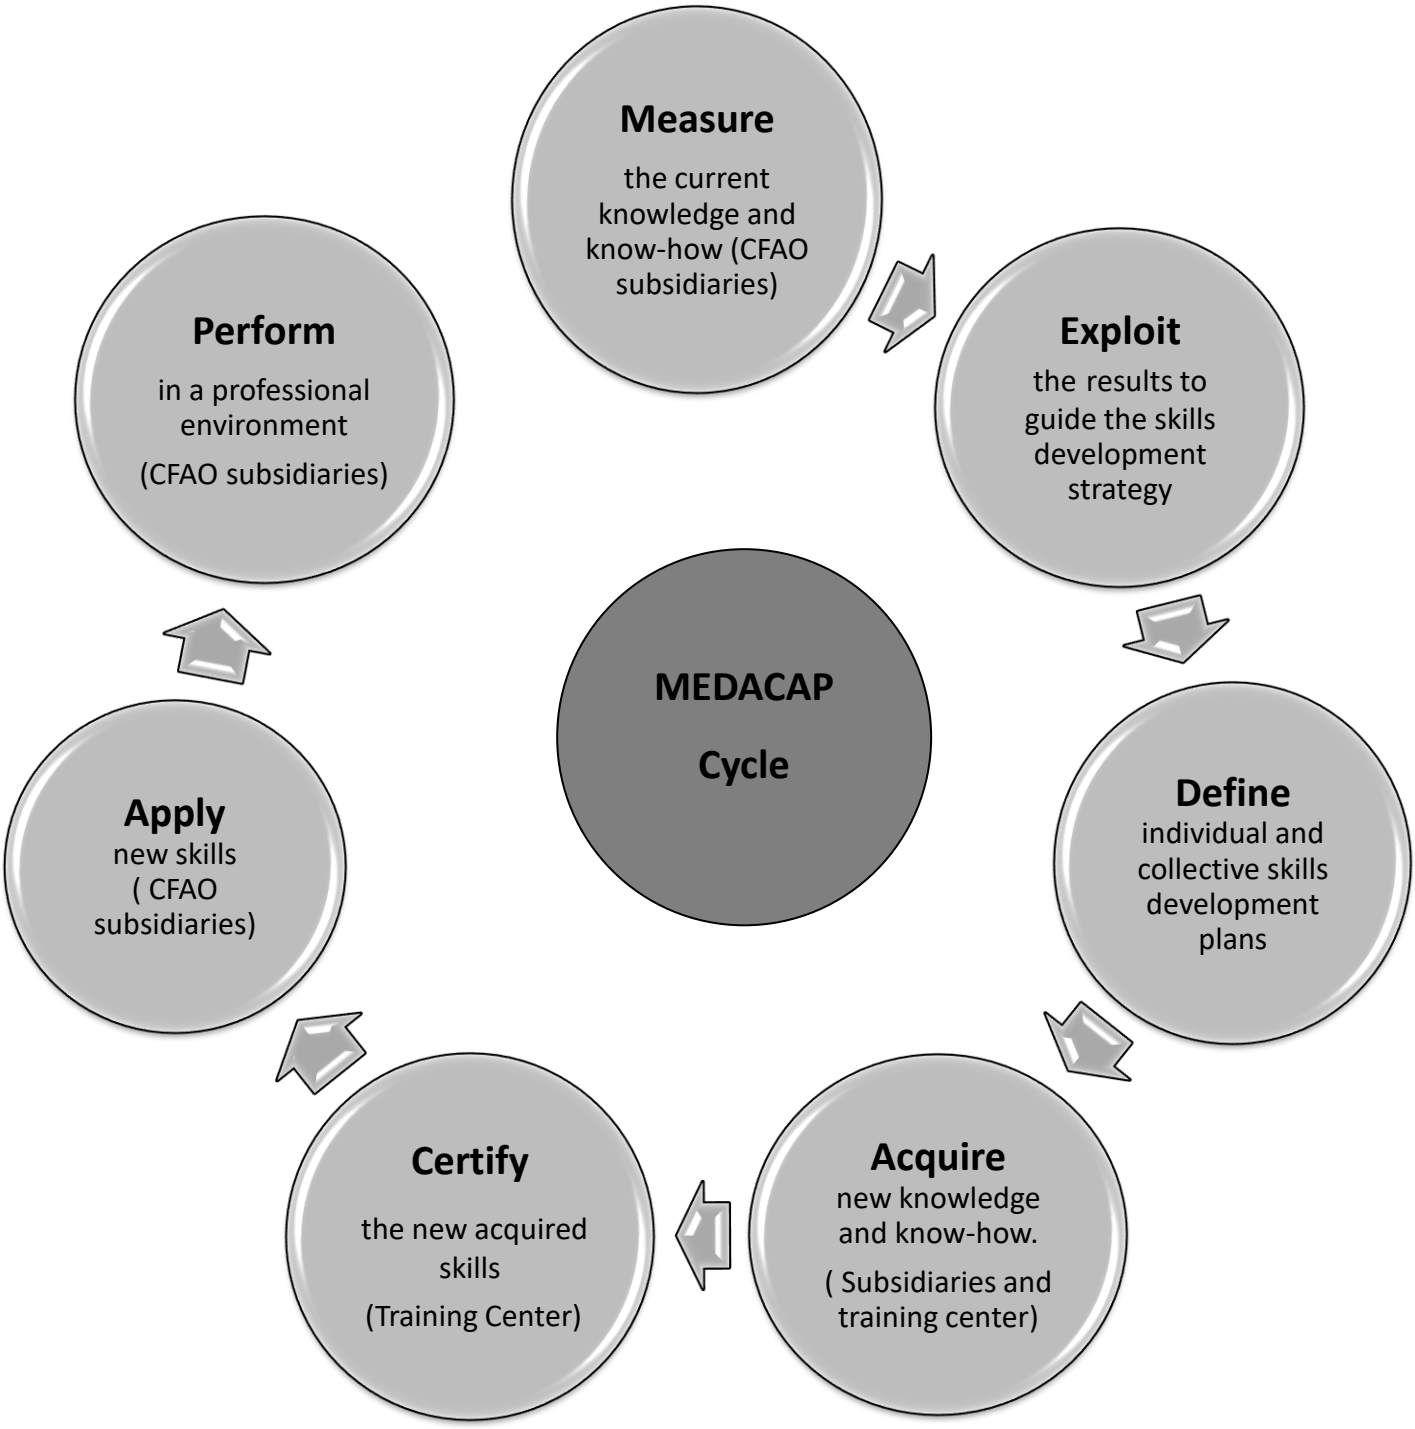

Thierry KOUGHA
Technical Trainer Expert (TOYOTA FORKLIFT, JCB, LOVOL)

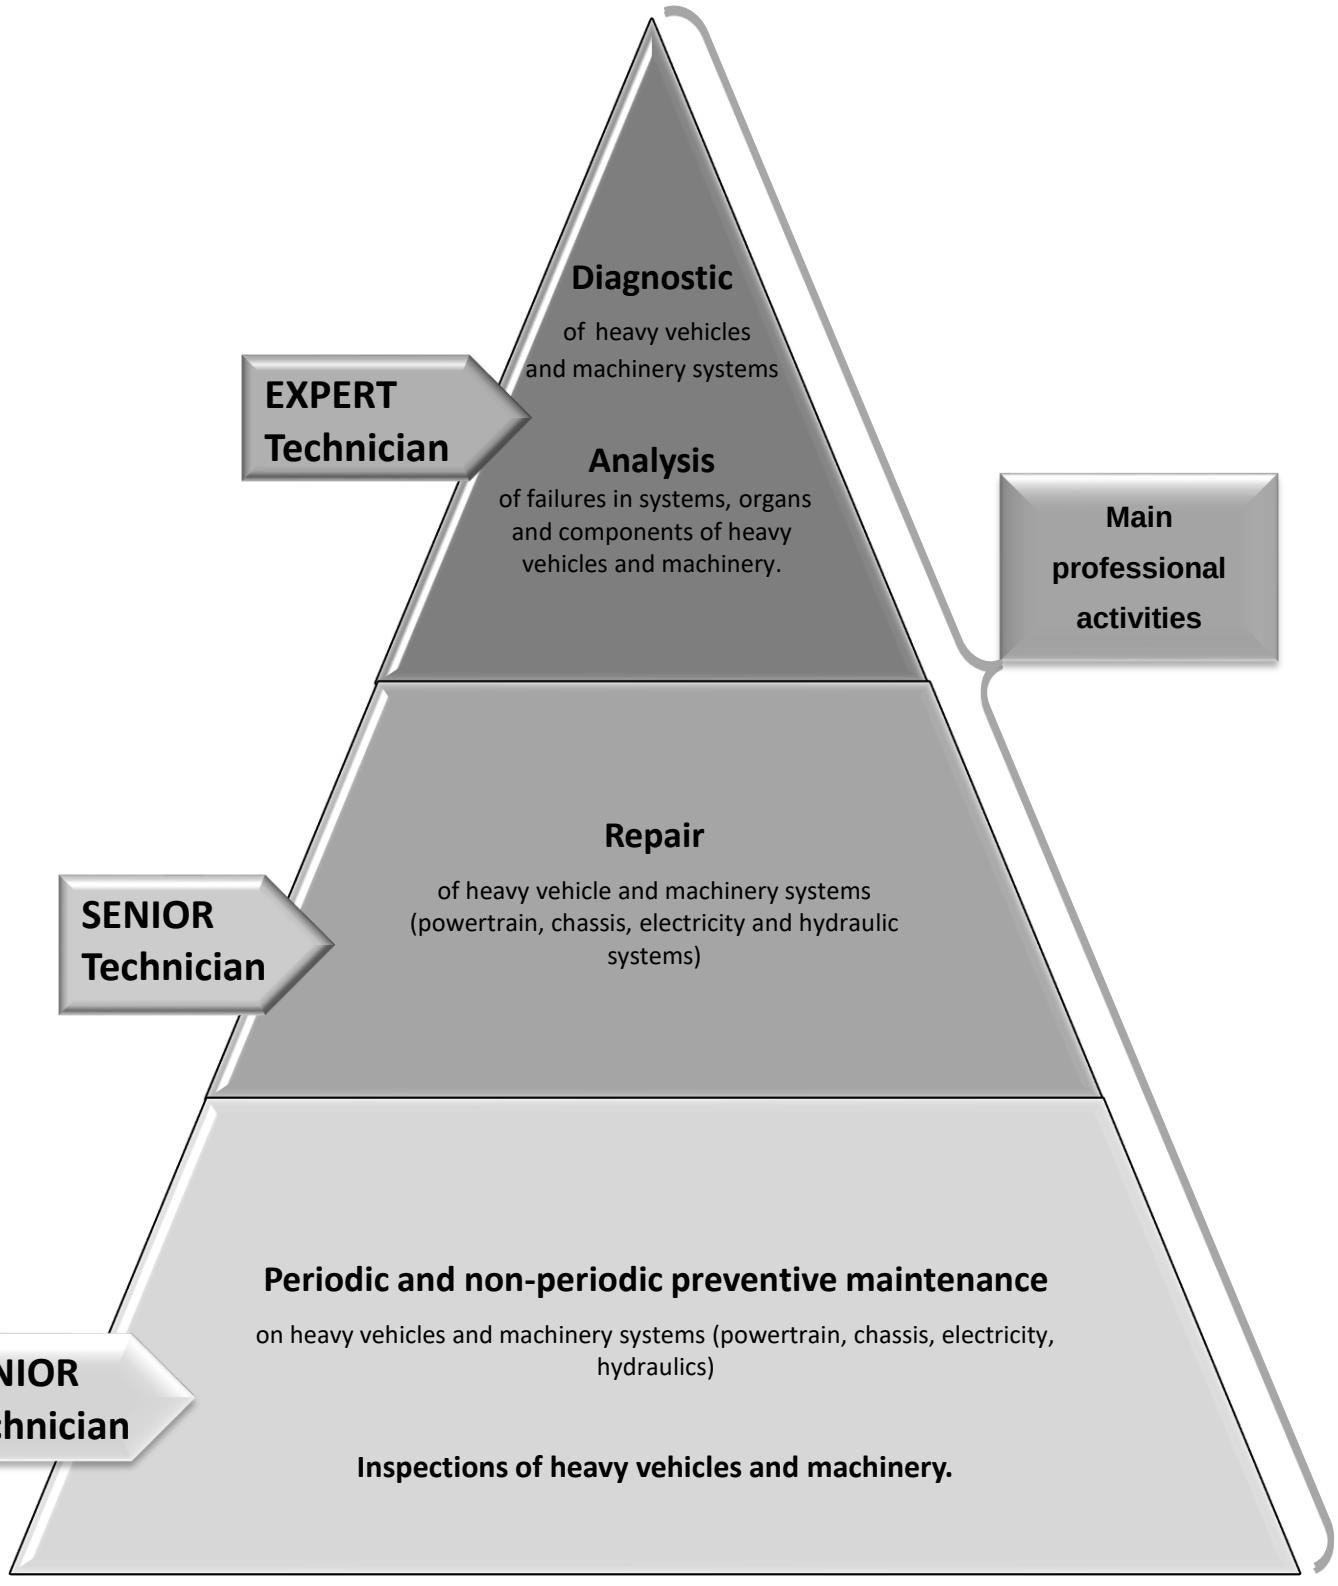

Roland NENDA
Operator Trainer
All- brands expert (Trucks and Heavy Equipment)

DEVELOPING TECHNICIANS' PROFESSIONAL EXPERTISE

SKILL LEVELS OF TECHNICIANS

TRAINING BY TECHNICIAN LEVEL

	Theoretical training (Knowledge - > E-Learning/Distance learning)		Practical training (Know-how -> Face-to-face)	
	Thematics	**Duration (days)**	**Thematics**	**Duration (days)**
EXPERT Technician	❖ The 7 stages of diagnostics applied to different bus systems (powertrain, chassis, electricity), ❖ Features of the Diag tool.	20	❖ Diagnostic of QSC240 engine, 5 ❖ Diagnostic of HW19710 Gearbox, 5 ❖ Diagnostic of Electrical system, 5 ❖ Diagnostic of Conventional Braking system (with ABS), 5 ❖ Diagnostic of Drive axles and Reducers,2401N-010 series. 5	
SENIOR Technician	❖ Technological knowledge of the various bus systems (powertrain, chassis, electricity), ❖ Removal and refitting procedure in accordance with the manufacturer's recommendations, ❖ Disassembly and reassembly procedure in accordance with the manufacturer's recommendations, ❖ Component check procedure in accordance with manufacturer's recommendations.	20	❖ Repair of QSC240 Engine, 5 ❖ Repair of HW19710 Gearbox, 5 ❖ Repair of Electrical system, 5 ❖ Repair of Conventional braking system (with ABS), 5 ❖ Repair of Drive axle and reducers, 2401N-010 series. 5	
JUNIOR Technician	❖ Brand history (bus ranges, characteristics, etc.), ❖ Description of the bus structure and role of the different bus systems (powertrain, chassis, electricity). ❖ Role of fluids and lubricants. ❖ Principle of use of metrology tools, ❖ Periodic and non-periodic preventive maintenance on bus, ❖ Fundamental principles of the engine, transmission and electricity, ❖ Other.	25	❖ Preventive maintenance of KING LONG bus systems	5

CONTENTS

Page	Code	Training designation	Date	Number of days	Location
8 to 9	JUNIOR TECHNICIAN (MAINTENANCE PREVENTIVE)				
9	KL01	Preventive maintenance of KING LONG bus systems	To be defined	5 days	To be defined
10 to 12	SENIOR TECHNICIAN (REPAIR)				
11	KL02	Repair of QSC240 Engine	To be defined	5 days	To be defined
14	KL03	Repair of HW 19710 Gearbox	To be defined	5 days	To be defined
12	KL04	Repair of Electrical system	To be defined	5 days	To be defined
18	KL05	Conventional braking system (with ABS)	To be defined	5 days	To be defined
16	KL06	Repair of Bridges and Drive Gearboxes, 2401N-010 Series	To be defined	5 days	To be defined
13 to 15	EXPERT TECHNICIAN (DIAGNOSTIC)				
14	KL07	Diagnosis of QSC240 Engine	To be defined	5 days	To be defined
14	KL08	Diagnosis of HW 19710 Gearbox	To be defined	5 days	To be defined
15	KL09	Diagnosis of Electrical system	To be defined	5 days	To be defined
26	KL10	Diagnosis of Conventional braking system diagnosis (with ABS)	To be defined	5 days	To be defined
16	KL11	Diagnostics of Bridges and Drive Gearboxes, 2401N-010 Series	To be defined	5 days	To be defined

JUNIOR TECHNICIAN

PREVENTIVE MAINTENANCE

KL01	PREVENTIVE MAINTENANCE OF KING LONG BUS SYSTEMS

Level, mode & duration	Junior	Face-to-face	05 Days
Trainer	**Idris NKOA**		
Objectives	• **Maintain** systems (powertrain, chassis, electricity) in operation according to the manufacturer's recommendations, • **Inspect** the bus systems (engine, chassis, electricity) in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description of Bus ranges and their characteristics • Description of the vehicle structure and role of the various bus systems (powertrain, chassis, electricity), • Role of liquids and lubricants, • Principle of use of metrology tools, • The different types of maintenance applied to KINGLONG buses and maintenance periods in accordance with the manufacturer's recommendations, • Periodic and non-periodic preventive maintenance of systems and components in accordance with the manufacturer's recommendations. ► **Practical part:** • Replacing oils and fluids (engine, gearbox, axles, others) • Replenish oils and fluids (engine, gearbox, axles, others) • Remove and refit components (belt and accessories, brake pads or gaskets, etc.) in accordance with the manufacturer's recommendations. • Check that components comply with the manufacturer's recommendations (dimensions, flatness, voltage, current, etc.) before reassembly. • Visually inspect KINGLONG bus systems. ► **Evaluation part:** • Initial Test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills)		
Target audience	Operational technicians in preventive maintenance		
Pre-requisites	Have been trained in Basic Mechanics and Electricity		
Language	French		
Equipment	Fully-equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

SENIOR TECHNICIAN

REPAIR

KL02	REPAIR OF QSC240 ENGINE

Level, mode & duration	SENIOR	Face-to-face	05 Days
Trainer	**KING LONG Expert Trainer**		
Objectives	• **Remove** and **refit** the QSC240 engine in accordance with the manufacturer's recommendations, • **Disassemble** and **reassemble** the QSC240 engine in accordance with the manufacturer's recommendations, • **Check** that the components of the QSC240 engine comply with the manufacturer's recommendations, • **Test** and **adjust** the QSC240 engine in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and operation of the QSC240 engine, • Description of the lubrication and cooling systems, • Description of the injection system, • Description of the electronic management system of the engine, • Procedure for removal and refitting the QSC240 engine in accordance with the manufacturer's recommendations, • Procedure for disassembly and reassembly of the QSC240 engine in accordance with the manufacturer's recommendations, • Procedure for checking that the components of the QSC240 engine comply with the manufacturer's recommendations. ► **Practical part:** • Remove the QSC240 engine in accordance with the manufacturer's recommendations, • Disassemble the QSC240 engine in accordance with the manufacturer's recommendations, • Clean the components of the QSC240 engine, • Check that the components comply with the manufacturer's recommendations, • Replace components which do not comply with the manufacturer's recommendations, • Reassemble the engine components in accordance with the manufacturer's recommendations, • Refit the engine on the bus in accordance with the manufacturer's recommendations, • Test and adjust the QSC240 engine on the bus. ► **Evaluation part:** • Initial Test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills)		
Target audience	Technician carrying out repair		
Pre-requisites	Have acquired the skills of a JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Fully-equipped training room and workshop, QSC240 engine on bench, adapted vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

KL03	REPAIR OF HW 19710 GEARBOX

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Animator	**KING LONG Expert Trainer**		
Goals	• **Put down** and **put back** the box of HW19710 speeds respecting the manufacturer's recommendations, • **Disassemble** and **reassemble** the box of speeds HW19710 in accordance with the manufacturer's instructions, • **Check** compliance components of the box of speeds HW19710 to the manufacturer's expectations, • **Test and adjust** the box of speeds HW19710 in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the box of speeds HW19710, • Procedure for removing and replacing the box of speeds HW19710 following the manufacturer's instructions, • Procedure for disassembly and reassembly of the box of speeds HW19710 following the manufacturer's instructions, • Procedure for checking components of the box of speeds HW19710 following the manufacturer's instructions. ► **Practical Part :** • Drop the box HW19710 gears according to the manufacturer's instructions, • Disassemble the HW19710 gearbox following the manufacturer's instructions, • Clean the HW19710 gearbox components, • Check the conformity of components to the manufacturer's expectations, • Replace components that do not meet the manufacturer's expectations, • Reassemble the components of the box of speeds HW19710 following the manufacturer's instructions, • Refit the HW19710 gearbox following the manufacturer's instructions, • Test and adjust the HW19710 gearbox on the truck. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technicians performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Preventive Maintenance)		
Language	French		
Equipment	Equipped training room and workshop, Box of speeds HW19710 on bench, Adapted vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

KL04	REPAIR OF ELECTRICAL SYSTEM

Level, mode & duration	SENIOR	Face-to-face	05 Days
Trainer	**KING LONG Expert Trainer**		
Objectives	• **Remove** and **refit** the electrical system components (starter, charging, air conditioning and lighting circuits, etc.) in accordance with the manufacturer's recommendations, • **Disassemble** and **reassemble** the electrical system components in accordance with the manufacturer's recommendations, • **Check** that the electrical components (fuses, relays, starters, alternators, etc.) comply with the manufacturer's recommendations, • **Test** and **adjust** electrical circuits in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Reminder of the principles of electricity and electronics, • Description and operation of the electrical system and its various circuits (starting, charging, air conditioning, lighting, etc.), • Procedure for checking electrical components and parts in accordance with the manufacturer's recommendations, ► **Practical part:** • Remove and refit electrical circuit components in accordance with the manufacturer's recommendations, • Disassemble and reassemble the vehicle's electrical components in accordance with the manufacturer's recommendations, • Clean the electrical circuit components and organs, • Check that the electrical components (fuses, relays, starters, alternators, etc.) comply with the manufacturer's recommendations, • Replace components which do not comply with the manufacturer's recommendations, • Test and adjust the component in the vehicle's electrical circuit. ► **Evaluation part:** • Initial Test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills)		
Target audience	Technician carrying out repair		
Pre-requisites	Have acquired the skills of a JUNIOR Technician (Preventive maintenance)		
Language	French		
Equipment	Fully-equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

KL05	REPAIR OF CONVENTIONAL BRAKING SYSTEM (with ABS)

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Animator	**KING LONG Expert Trainer**		
Goals	• **Remove** and **reinstall** the drum brake mechanism following the manufacturer's recommendations, • **Disassemble** and **reassemble** the drum brake mechanism following the manufacturer's recommendations, • **Control** compliance drum brake components to manufacturer expectations, • **Test** and **adjust** the S cam brake mechanism in accordance with the manufacturer's recommendations,		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the conventional braking system (mechanical and pneumatic) and the types of brake, • Description and operation of the S cam brake, • Procedure for removing and installing the S cam brake following the manufacturer's instructions, • Procedure for disassembling and reassembling the S cam brake following the manufacturer's instructions, • Procedure for checking the components of the S cam brake according to the manufacturer's instructions. ► **Practical Part:** • Remove and replace a relay valve following the manufacturer's recommendations, • Disassemble and reassemble the parking brake relay valve following the manufacturer's instructions, • Remove the S cam brake mechanism following the manufacturer's instructions, • Disassemble the S cam brake mechanism following the manufacturer's instructions, • Clean the components of the S cam brake mechanism, • Check the conformity of components to the manufacturer's expectations, • Replace components that do not meet the manufacturer's expectations, • Reassemble the components of the S cam brake mechanism following the manufacturer's instructions, • Reinstall the cam brake mechanism S following the manufacturer's instructions, • Test and adjust the S cam brake. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technicians performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Preventive Maintenance)		
Language	French		
Equipment	Equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

KL06	REPAIR OF BRIDGES AND DRIVE GEARBOXES, 2401N-010 SERIES

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Animator	**KING LONG Expert Trainer**		
Goals	• **Remove and reinstall** the axle and gearboxes, series 2401N-010, according to the manufacturer's recommendations. • **Disassemble and reassemble** the axle and wheel gearboxes, series 2401N-010, following the manufacturer's recommendations. • **Check** that the axle and gearbox components, series 2401N-010, conform to the manufacturer's specifications. • **Test and adjust** the axle and gearboxes, series 2401N-010, following the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the axle and gearboxes, series 2401N-010, • Installation and removal procedure for the axle and wheel gearboxes, series 2401N-010, according to the manufacturer's instructions, • Disassembly and reassembly procedure for the axle and wheel gearboxes, series 2401N-010, according to the manufacturer's instructions, • Inspection procedure for the components of the axle and wheel gearboxes, series 2401N-010, according to the manufacturer's instructions. ► **Practical Part:** • Remove the bridge and gearboxes, series 2401N-010, according to the manufacturer's instructions. • Disassemble the bridge and gearboxes, series 2401N-010, according to the manufacturer's instructions. • Clean the components of the bridge and gearboxes, series 2401N-010. • Check that the components conform to the manufacturer's specifications. • Replace any components that do not conform to the manufacturer's specifications. • Reassemble the components of the bridge and gearboxes, series 2401N-010, according to the manufacturer's instructions. • Reinstall the bridge and gearboxes, series 2401N-010, onto the bus according to the manufacturer's instructions. • Test and adjust the bridge and gearboxes, series 2401N-010, on the bus. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technicians performing the repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Preventive Maintenance)		
Language	French		
Equipment	Training room and equipped workshop, complete 2401N010 series bridge on bench, adapted vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

EXPERT TECHNICIAN

DIAGNOSTIC

KL07	DIAGNOSTIC OF QSC240 ENGINE

Level, mode & duration	EXPERT	Face-to-face	05 Days
Trainer	**KING LONG Expert Trainer**		
Objectives	• **Diagnose** faults relating to the QSC240 engine, • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Reminder of the description of the injection system and electronic engine management system, • Malfunctions of the QSC240 engine components, • Diagnostics steps and function of the Diag tool. ► **Practical part:** 1. Collect the various symptoms of the malfunction/fault and bus breakdown and repair history (Customer and Diagnostic tool), 2. Hypothesize the cause of the malfunction/fault, 3. Test or check the compliance of the QSC240 engine system and components with the manufacturer's recommendations, 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Elaborate a list of components to be replaced or repaired, 6. Repair the faulty component, 7. Test and adjust the system to be repaired. ► **Evaluation part:** • Initial Test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills)		
Target audience	Technicians carrying out diagnostic		
Pre-requisites	Have acquired the skills of a SENIOR Technician (Repair)		
Language	French		
Equipment	Fully-equipped training room and workshop, QSC240 engine on bench, Diag tool, adapted vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

KL08	DIAGNOSIS OF HW19710 GEARBOX

Level, Mode and Duration	EXPERT	Face-to-face	05 days
Animator	**KING LONG Expert Trainer**		
Goals	• **Diagnose** faults related to the HW19710 gearbox, • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Review of the description and operation of the HW19710 gearbox, • Malfunctions of HW19710 gearbox components, • Diagnostic steps and functionalities of the diagnostic tool ► **Practical Part:** 1. Gather the various symptoms of the malfunction/failure and the history of breakdowns and repairs of the truck (Customer and diagnostic tool), 2. Formulate hypotheses regarding the cause of the malfunction/failure, 3. Test or check the conformity of the systems and components of the HW19710 gearbox, 4. Identify the most probable hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components to be replaced or repaired, 6. Carry out the repair of the defective component, 7. Test and adjust the system involved in the truck repair. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Diagnostic Technicians		
Prerequisites	Completion of Senior Technician Level (Repair) skills		
Language	French		
Equipment	Equipped training room and workshop, HW19710 gearbox on a test bench, diagnostic tool, suitable vehicle(s) available.		
Documentation	Attendance sheet, satisfaction sheet, Certificate of participation.		

KL09	DIAGNOSTIC OF ELECTRICAL SYSTEM

Level, mode & duration	EXPERT	Face-to-face	05 Days
Trainer	**KING LONG Expert Trainer**		
Objectives	• **Diagnose** faults in the electrical and electronic systems of the KING LONG bus, • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and operation of the electronic/electrical architecture, • Description and function of the electronic architecture modules, • Malfunctions in the electrical system (starting, charging, air conditioning and lighting circuits, etc.) and the electronic system (modules), • Diagnostic steps and function of the Diag tool. ► **Practical part:** 1. Collect the various symptoms of the malfunctions/faults and the bus breakdown and repair history (Customer and Diagnostic tool), 2. Hypothesize the cause of the malfunction/fault, 3. Test or check that the system and electrical components comply with the manufacturer's recommendations, 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Elaborate a list of components to be replaced or repaired, 6. Repair the faulty component or organ, 7. Test and adjust the system to be repaired. ► **Evaluation part:** • Initial Test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills)		
Target audience	Technicians carrying out diagnostic		
Pre-requisites	Have acquired the skills of a SENIOR Technician (Repair)		
Language	French		
Equipment	Fully-equipped training room and workshop, Diag tool, adapted vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

KL10	DIAGNOSIS OF CONVENTIONAL BRAKING SYSTEM DIAGNOSIS (WITH ABS)

Level, mode & duration	EXPERT	Face-to-face	05 Days
Trainer	**KING LONG Expert Trainer**		
Objectives	• **Diagnose** malfunctions related to the conventional braking system, • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Review of the description and operation of conventional braking system components, • Malfunctions of conventional braking system components, • Diagnostic steps and functionalities of the diagnostic tool. ► **Practical part:** 1. Gather the various symptoms of the malfunction and the history of bus breakdowns and repairs (Customer and Diagnostic tool), 2. Formulate hypotheses regarding the cause of the malfunction/breakdown, 3. Test or verify the conformity of the conventional braking system's systems and components with the manufacturer's recommendations, 4. Identify the most probable hypothesis based on the tests and symptoms, 5. Develop a recommendation for the components to be replaced or repaired, 6. Carry out the repair of the defective component, 7. Test and adjust the system affected by the repair. ► **Evaluation part:** • Initial Test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills)		
Target audience	Technicians carrying out diagnostic		
Pre-requisites	Completion of the SENIOR Technician (Repair) level		
Language	French		
Equipment	Fully-equipped training room and workshop, Diag tool, adapted vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

KL11	DIAGNOSTICS OF BRIDGES AND DRIVE GEARBOXES, 2401N-010 SERIES

Level, mode & duration	EXPERT	Face-to-face	05 Days
Trainer	**KING LONG Expert Trainer**		
Objectives	• **Diagnose** faults related to the 2401N-010 axle and gearbox system, • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Review of the description and operation of the components of the 2401N-010 series axle and gearbox system, • Malfunctions of the components of the 2401N-010 axle and gearbox system, • Diagnostic steps and functionalities of the diagnostic tool. ► **Practical part:** 1. Collect the various symptoms of the malfunctions/faults and the bus breakdown and repair history (Customer and Diagnostic tool), 2. Gather the various symptoms of the malfunction and the history of bus failures and repairs (Client and Diagnostic tool), 3. Formulate hypotheses regarding the cause of the malfunction/failure, 4. Test or verify the conformity of the components of the 2401N-010 bridge and gearbox system with the manufacturer's recommendations, 5. Identify the most probable hypothesis based on the tests and symptoms, 6. Develop a recommendation for the components to be replaced or repaired, 7. Carry out the repair of the defective component, 8. Test and adjust the system affected by the repair. ► **Evaluation part:** • Initial Test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills)		
Target audience	Technicians performing diagnostics		
Pre-requisites	Completion of the SENIOR Technician (Repair) level		
Language	French		
Equipment	Fully-equipped training room and workshop, Diag tool, adapted vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.
