TECHNICAL TRAINING CATALOG 2026

OUR COMMITMENT:

TO ASSIST YOU IN DEVELOPING THE COMPETENCE AND PERFORMANCE OF YOUR EMPLOYEES AND YOUR SERVICE.

Version of October 27, 2025

EDITO

Dear Subsidiary,

The Group Academy is pleased to present its catalogue of services for 2026 and to inform you of our commitments for all subsidiaries:

- ✓ **To support you in developing the skills and performance of your employees and your service,**
- ✓ **To support you in resolving technical problems on customer vehicles,**
- ✓ **To standardize and normalize the skill levels of the group's technicians.**

The diversity of brands deployed by CFAO is a real asset for the development of our skills development offers to subsidiaries throughout the company's territories. This diversity challenges us to ensure a high level of service quality within the after-sales service, the parts service, the sales department and the financial and legal service.

To improve the quality of your employees' services, we recommend deploying the following technical skills acquisition cycle:

- ✓ **Measure** the current skills of technicians and teams,
- ✓ **Exploit** the results to guide the skills development strategy,
- ✓ **Define** individual and collective skills development plans,
- ✓ **Acquire** new skills through face-to-face or remote trainings,
- ✓ **Certify** the new skills acquired,
- ✓ **Apply** new skills in a professional environment,
- ✓ **Perform** in a professional environment.

We also offer to **assist** you in **resolving technical problems** that you encounter in your workshops, with **technical support integrated** into the Academy.

The development of new skills is carried out by certified experts each in their areas of expertise, using innovative training methods.

Thank you for your commitment to developing the skills of your employees. We look forward to hearing from you.

Laurent GONIN

TEAM EQUIPMENT

The Douala Academy for EQUIPMNET is dedicated to the **RENAULT TRUCKS, JCB, LOVOL, TOYOTA FORKLIFT, BT, FUSO, HINO, SINOTRUK** and **KING LONG** brands and is equipped with:

- A reception and a restaurant,
- Two training rooms (board, video projector, others),
- A 200 m² workshop,
- Didactic equipment for engines, transmissions and others,
- A RENAULT TRUCKS K Range truck

Our training courses are delivered at the Douala Academy and at all our subsidiaries. We also provide training at our customers' sites. Training sessions are made up of a maximum of twelve trainees.

CFAO Training Director

André Yves BOKALLY

Training Coordinator & Project Manager

Claudia EYINGA

Training Assistant

Lucien GAGNE

Technical Trainer Expert (RENAULT TRUCKS, HINO, FUSO)

Idris NKOA

Technical Trainer Expert (TOYOTA BT, KING LONG, SINOTRUK)

Thierry KOUGHA

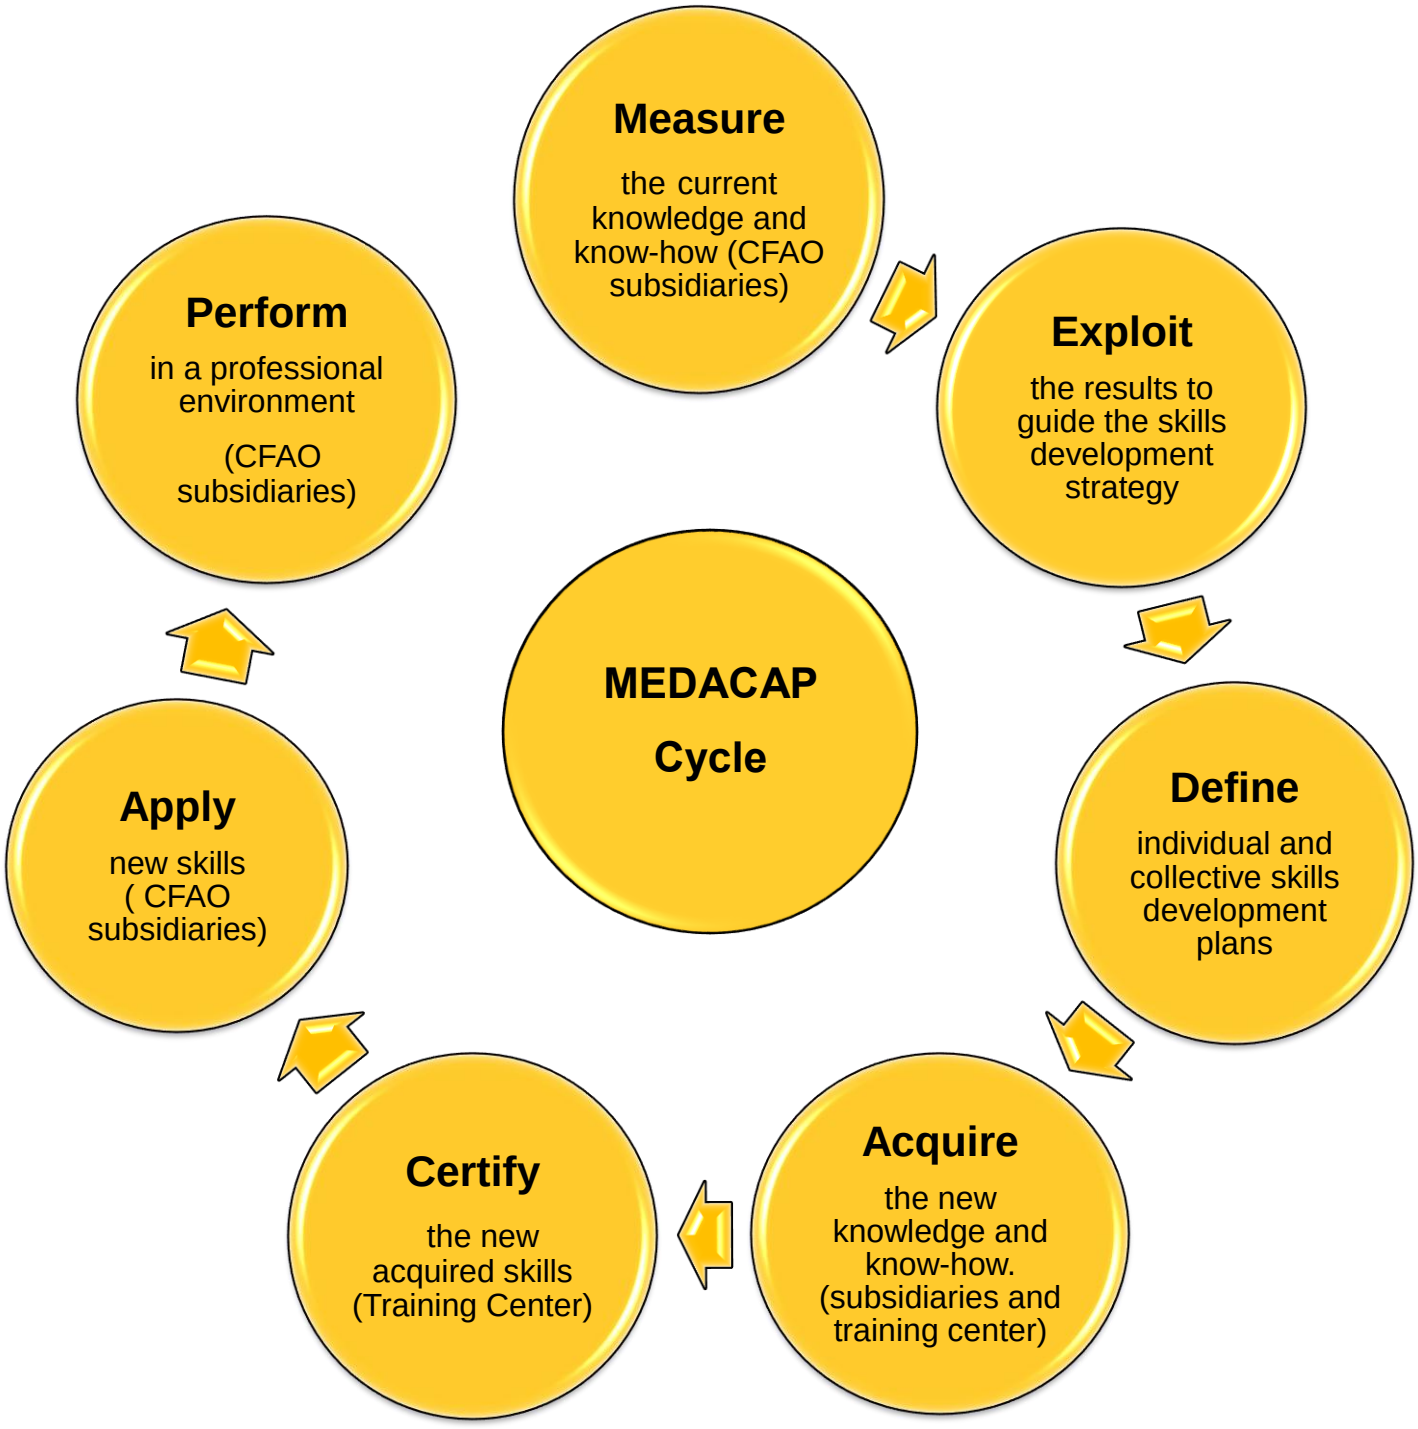

Technical Trainer Expert (TOYOTA FORKLIFT, JCB, LOVOL)

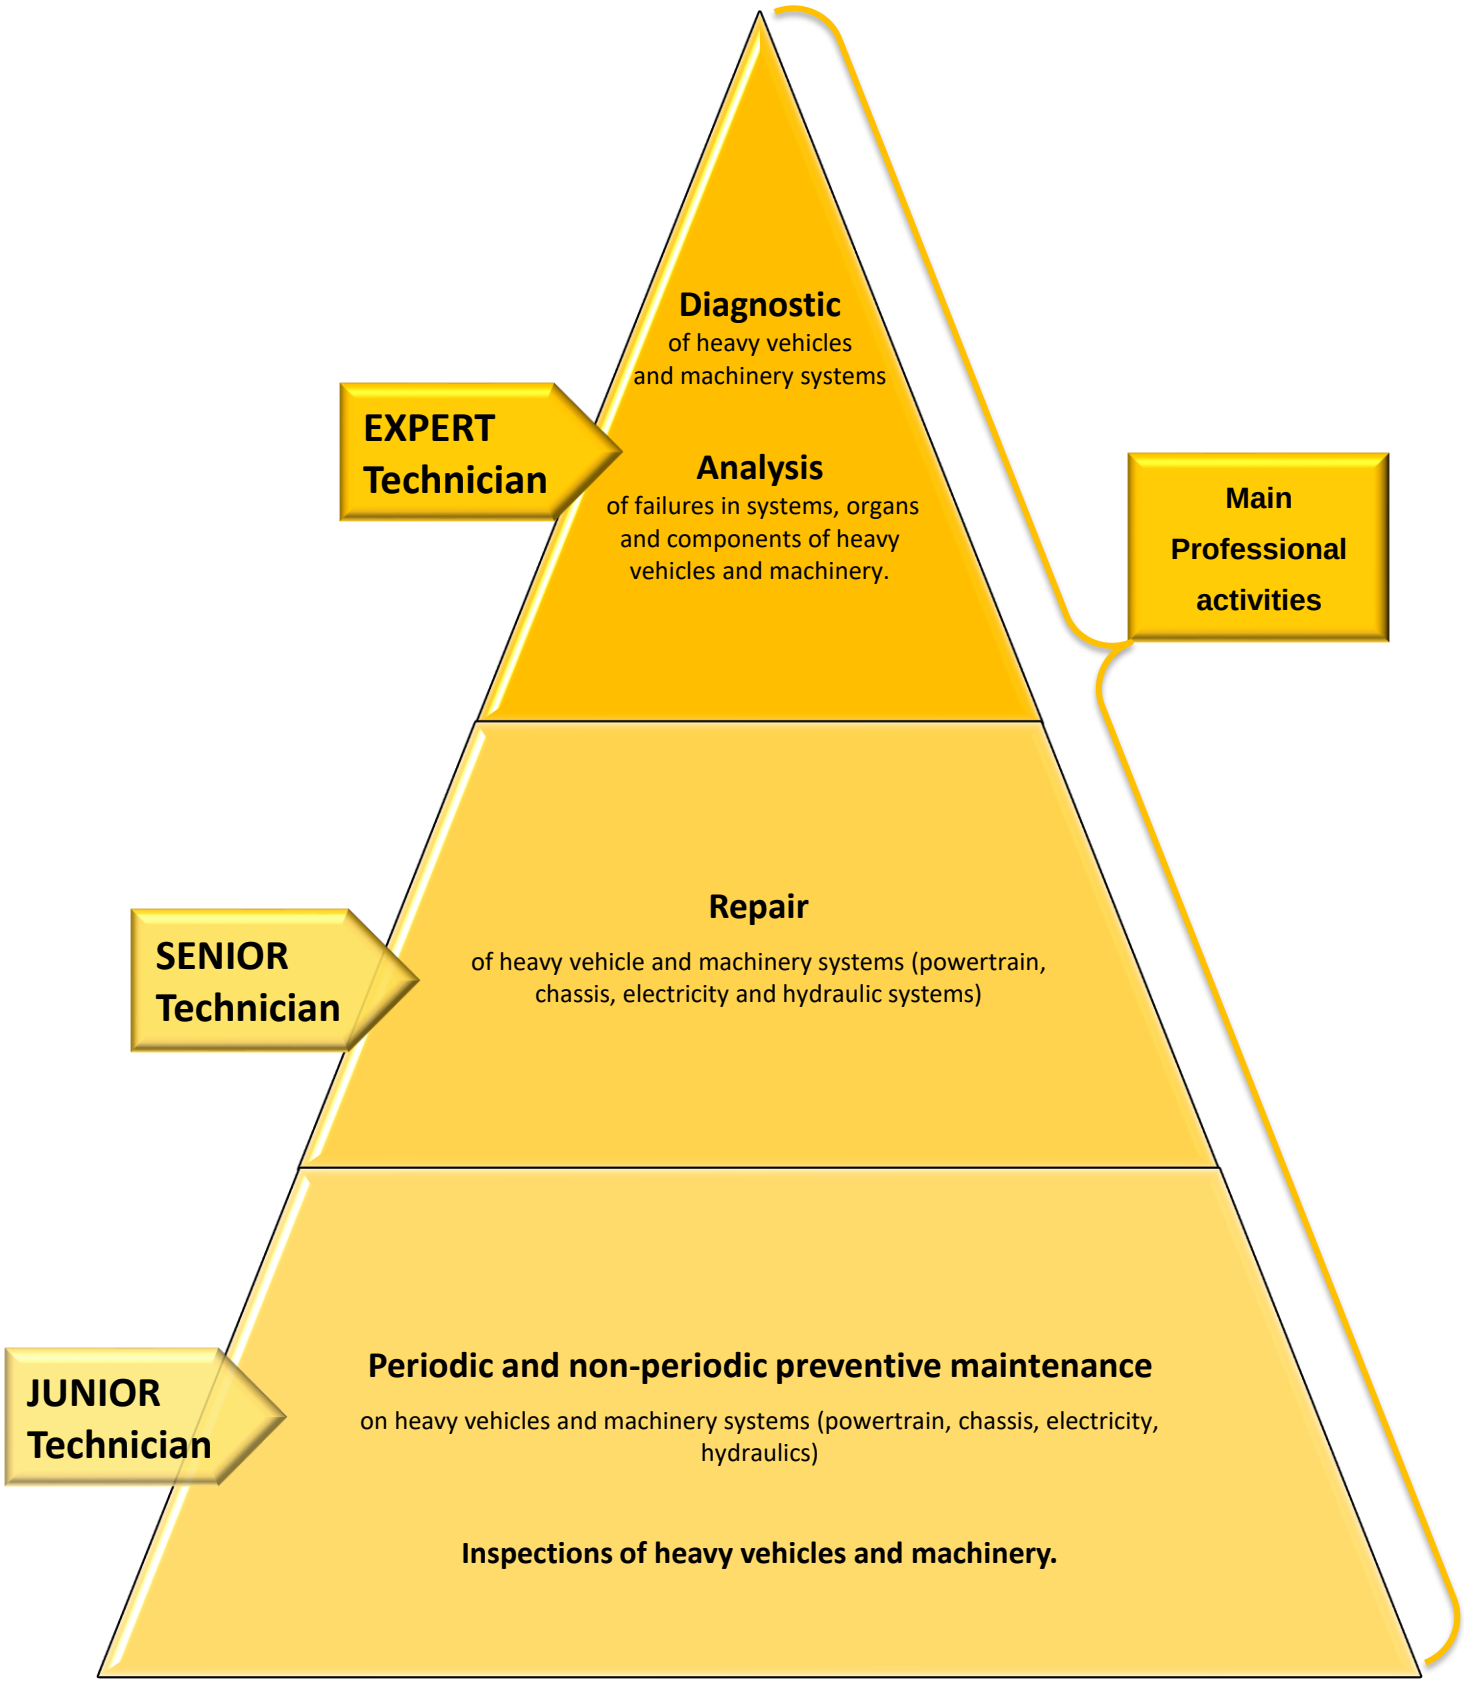

Roland NENDA

Operator Trainer
All- brands expert (Trucks and Heavy Equipment)

DEVELOPING TECHNICIANS' PROFESSIONAL EXPERTISE

SKILL LEVELS OF TECHNICIANS

TRAINING BY TECHNICIAN LEVEL

	Theoretical training (Knowledge - > E-Learning/Distance learning)		Practical training (Know-how -> Face-to-face)	
	Thematics	**Duration (days)**	**Thematics**	**Duration (days)**
EXPERT Technician	❖ The 7 stages of diagnostics applied to different machine systems (powertrain, chassis, electricity), ❖ Features of the Diag tool	10	❖ In preparation	
SENIOR Technician	❖ Technological knowledge of the various machine systems (powertrain, chassis, electricity). ❖ Removal and refitting procedure in accordance with the manufacturer's recommendations, ❖ Disassembly and reassembly procedure in accordance with the manufacturer's recommendations, ❖ Procedure for checking components according to manufacturer's recommendations.	30	❖ Repair of LOVOL Crawler Excavators, ❖ Repair of LOVOL Wheel Loaders, ❖ Repair of LOVOL Graders, ❖ Repair of LOVOL Bulldozers, ❖ Repair of LOVOL Backhoe Loaders, ❖ Repair of LOVOL Compactors.	
JUNIOR Technician	❖ Brand History (JCB ranges, characteristics, etc.), ❖ Description of the machine structure and roles of the different machine systems (powertrain, chassis, electricity). ❖ Role of fluids and lubricants. ❖ Principles of use of metrology tools, ❖ Periodic and non-periodic preventive maintenance on JCB machines, ❖ Fundamental principles of the engine, transmission and electricity, ❖ Others.	15	❖ Preventive maintenance for LOVOL Crawler Excavators ❖ Preventive maintenance of LOVOL Wheel Loaders, ❖ Preventive maintenance of LOVOL Graders, ❖ Preventive maintenance of LOVOL Bulldozers, ❖ Preventive maintenance of LOVOL Backhoe Loaders, ❖ Preventive maintenance for LOVOL Compactors.	5 5 5 5 5 5

CONTENTS

Page	Code	Training designation	Date	Number of days	Location
8 to 12		JUNIOR TECHNICIAN (PREVENTIVE MAINTENANCE)			
9	LVL01	Preventive maintenance of LOVOL Crawler Excavators	To be defined	5 days	To be defined
10	LVL02	Preventive maintenance of LOVOL Wheel Loaders	To be defined	5 days	To be defined
11	LVL03	Preventive maintenance of LOVOL Graders	To be defined	5 days	To be defined
12	LVL04	Preventive maintenance of LOVOL Bulldozers	To be defined	5 days	To be defined
13	LVL05	Preventive maintenance of LOVOL Backhoe Loaders	To be defined	5 days	To be defined
14	LVL06	Preventive maintenance for LOVOL Compactors	To be defined	5 days	To be defined
15 to 20		SENIOR TECHNICIAN (REPAIR)			
16	LVL07	Repair of LOVOL Crawler Excavators	To be defined	5 days	To be defined
17	LVL08	Repair of LOVOL Wheel Loaders	To be defined	5 days	To be defined
18	LVL09	Repair of LOVOL Graders	To be defined	5 days	To be defined
19	LVL10	Repair of LOVOL Bulldozers	To be defined	5 days	To be defined
20	LVL11	Repair of LOVOL Backhoe Loaders	To be defined	5 days	To be defined
21	LVL12	Repair of LOVOL Compactors	To be defined	5 days	To be defined
22 to 28		EXPERT TECHNICIAN (DIAGNOSIS)			
23	LVL13	Diagnosis of the systems of LOVOL Crawler Excavators	To be defined	5 days	To be defined
24	LVL14	Diagnosis of the systems of LOVOL Wheel Loaders	To be defined	5 days	To be defined
25	LVL15	Diagnosis of the systems of LOVOL Graders	To be defined	5 days	To be defined
26	LVL16	Diagnosis of the systems of LOVOL Bulldozers	To be defined	5 days	To be defined

COMPACTORS

LVL01	PREVENTIVE MAINTENANCE OF LOVOL CRAWLER EXCAVATORS

Level, mode & duration	JUNIOR	Face-to-face	05 days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Maintain** the systems (powertrain, chassis, electricity, hydraulics) of the LOVOL Crawler Excavators in operation in accordance with the manufacturer's recommendations, • **Inspect** the machine's systems (powertrain, chassis, electricity, hydraulics) LOVOL Crawler Excavators in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • General presentation of LOVOL machine ranges and their features, • Description of the LOVOL Crawler Excavator systems (Powertrain, Chassis, electricity, hydraulics, air conditioning, Steering, Brakes,) and their components, • Principle of use of metrology tools, • The different types of maintenance applied to LOVOL Crawler Excavators and maintenance periods in accordance with the manufacturer's recommendations, • Periodic and non-periodic preventive maintenance of systems and components in accordance with the manufacturer's recommendations. ► **Practical part:** • Replace consumables (Engine, Transmissions, Hydraulics) in accordance with the manufacturer's recommendations., • Replenish oils and fluids (Engine, Transmissions, axles, hydraulic systems and others), • Check that machine components (dimensions, flatness, voltage, current, tightness, pressure, etc.) comply with the manufacturer's recommendations, • Remove and refit components (filters, belts and accessories, hydraulic hoses, etc.) in accordance with the manufacturer's recommendations, • Visually inspect the LOVOL Crawler Excavator systems, • Reset the maintenance hour meter after operations in accordance with the manufacturer's recommendations. ► **Evaluation part:** • Initial Test (Assessment of Prerequisites). • Final Test (Assessment of Acquired skills).		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	E-Learning and/or classroom training in Mechanics, Electricity and Basic Hydraulics		
Language	English		
Equipment	Fully-equipped training room and workshop, Adapted machine(s) available, SST		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

LVL02	PREVENTIVE MAINTENANCE OF LOVOL WHEEL LOADERS

Level, mode & duration	JUNIOR	Face-to-face	05 days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Maintain** the systems (powertrain, chassis, electricity, hydraulics) of the LOVOL Wheel Loaders in operation in accordance with the manufacturer's recommendations, • **Inspect** the machine's systems (powertrain, chassis, electricity, hydraulics) of the LOVOL Wheel Loaders in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • General presentation of LOVOL machine ranges and their features, • Description of the LOVOL Wheel Loader systems (Powertrain, Chassis, electricity, hydraulics, air conditioning, Steering, ...) and their components, • Principle of use of metrology tools, • The different types of maintenance applied to the LOVOL Wheel Loaders and maintenance periods in accordance with the manufacturer's recommendations, • Periodic and non-periodic preventive maintenance of systems and components in accordance with the manufacturer's recommendations. ► **Practical part:** • Remove and refit components (Filters, belt and accessories, Hydraulic hose, etc...) in accordance with the manufacturer's recommendations. • Replace consumables (Engine, Transmission, axles, Hydraulics, etc.). • Replenish oils and fluids (Engine, Transmission, axles, hydraulic systems and others) • Check that components comply with the manufacturer's recommendations (dimensions, flatness, voltage, current, tightness, pressure, etc.). • Visually inspect the LOVOL Wheel Loader systems, • Reset the maintenance counter after work in accordance with the manufacturer's recommendations. ► **Evaluation part:** • Initial Test (Assessment of Prerequisites). • Final Test (Assessment of Acquired skills).		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	E-learning and/or classroom training in Mechanics, Electricity and Basic Hydraulics		
Language	English		
Equipment	Fully-equipped training room and workshop, Adapted machine(s) available, SST		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

LVL03	PREVENTIVE MAINTENANCE OF LOVOL GRADERS

Level, mode & duration	JUNIOR	Face-to-face	05 Days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Maintain** the systems (powertrain, chassis, electricity, hydraulics) of the LOVOL Graders in operation in accordance with the manufacturer's recommendations, • **Inspect** the machine's systems (powertrain, chassis, electricity, hydraulics) of the LOVOL Graders in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • General presentation of LOVOL machine ranges and their features, • Description of the LOVOL Grader systems (Powertrain, Chassis, electricity, hydraulics, air conditioning, Steering, ...) and their components, • The different types of maintenance applied to the LOVOL Graders and maintenance periods in accordance with the manufacturer's recommendations, • Periodic and non-periodic preventive maintenance of systems and components in accordance with the manufacturer's recommendations. ► **Practical part:** • Replace consumables (Engine, Transmissions, Hydraulics) in accordance with the manufacturer's recommendations., • Replenish oils and fluids (Engine, Transmissions, axles, hydraulic system and others), • Check that machine components (dimensions, flatness, voltage, current, tightness, pressure, etc.) comply with the manufacturer's recommendations, • Remove and refit components (filters, belts and accessories, hydraulic hoses, etc.) in accordance with the manufacturer's recommendations, • Visually inspect the LOVOL Grader systems, • Reset the maintenance counter after operations in accordance with the manufacturer's recommendations. ► **Evaluation part:** • Initial test (Assessment of Prerequisites). • Final Test (Assessment of Acquired skills)		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	E-Learning and/or classroom training in Mechanics, Electricity and Basic Hydraulics		
Language	English		
Equipment	Fully-equipped training room and workshop, Adapted machine(s) available, SST		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

LVL04	PREVENTIVE MAINTENANCE OF LOVOL BULLDOZERS

Level, mode & duration	JUNIOR	Face-to-face	05 Days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Maintain** the systems (powertrain, drive train, chassis, electricity, hydraulics) of the LOVOL Bulldozers in operation in accordance with the manufacturer's recommendations. • **Inspect** the machine's systems (powertrain, chassis, electricity, hydraulics) of the LOVOL Bulldozers in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • General presentation of LOVOL machine ranges and their features, • Description of the LOVOL Bulldozer systems (Powertrain, Chassis, electricity, hydraulics, air conditioning, Steering, ...) and their components, • The different types of maintenance applied to the LOVOL Bulldozers and maintenance periods in accordance with the manufacturer's recommendations, • Periodic and non-periodic preventive maintenance of systems and components in accordance with the manufacturer's recommendations. ► **Practical part:** • Replace consumables (Engine, Transmissions, Hydraulics) in accordance with the manufacturer's recommendations, • Replenish oils and fluids (Engine, Transmissions, axles, hydraulic system and others), • Check that machine components (dimensions, flatness, voltage, current, tightness, pressure, etc.) comply with the manufacturer's recommendations, • Remove and refit components (filters, belts and accessories, hydraulic hoses, etc.) in accordance with the manufacturer's recommendations, • Visually inspect the LOVOL Bulldozer systems, • Reset the maintenance counter after operations in accordance with the manufacturer's recommendations. ► **Evaluation part:** • Initial test (Assessment of Prerequisites). • Final Test (Assessment of Acquired skills).		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	Training (e-learning and/or face-to-face) in basic mechanics, electricity and hydraulics		
Language	English		
Equipment	Fully-equipped training room and workshop, adapted machine(s) available, SST		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

LVL05	PREVENTIVE MAINTENANCE OF LOVOL BACKHOE LOADERS

Level, mode & duration	JUNIOR	Face-to-face	05 days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Maintain** the systems (powertrain, chassis, electricity, hydraulics) of the LOVOL Backhoe Loaders in operation in accordance with the manufacturer's recommendations, • **Inspect** the machine's systems (powertrain, chassis, electricity, hydraulics) of the LOVOL Backhoe Loaders in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theorical part:** • General presentation of LOVOL machine ranges and their features, • Description of the LOVOL Backhoe Loader systems (Powertrain, Chassis, electricity, hydraulics, air conditioning, Steering, ...) and their components, • Principle of use of metrology tools, • The different types of maintenance applied to the LOVOL Backhoe Loader and maintenance periods in accordance with the manufacturer's recommendations, • Periodic and non-periodic preventive maintenance of systems and components in accordance with the manufacturer's recommendations. ► **Practical part:** • Remove and refit components (Filters, belt and accessories, Hydraulic hose, etc...) in accordance with the manufacturer's recommendations. • Replace consumables (Engine, Transmission, axles, Hydraulics, etc.). • Replenish oils and fluids (Engine, Transmission, axles, hydraulic systems and others) • Check that components comply with the manufacturer's recommendations (dimensions, flatness, voltage, current, tightness, pressure, etc.). • Visually inspect the LOVOL Backhoe Loader systems, • Reset the maintenance counter after work in accordance with the manufacturer's recommendations. ► **Evaluation part:** • Initial Test (Assessment of Prerequisites). • Final Test (Assessment of Acquired skills).		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	E-learning and/or classroom training in Mechanics, Electricity and Basic Hydraulics		
Language	English		
Equipment	Fully-equipped training room and workshop, Adapted machine(s) available, SST		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

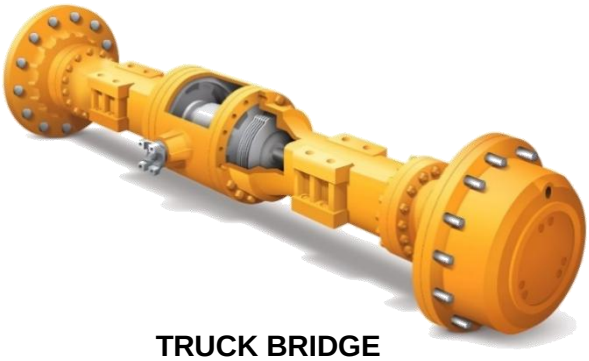

LVL06	PREVENTIVE MAINTENANCE OF LOVOL COMPACTORS

Level, mode & duration	JUNIOR	Face-to-face	05 days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Maintain** the systems (powertrain, chassis, electricity, hydraulics) of the LOVOL Compactors in operation in accordance with the manufacturer's recommendations, • **Inspect** the machine's systems (powertrain, chassis, electricity, hydraulics) of the LOVOL Compactors in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • General presentation of LOVOL machine ranges and their features, • Description of the LOVOL Compactor systems (Powertrain, Chassis, electricity, hydraulics, air conditioning, Steering, ...) and their components, • Principle of use of metrology tools, • The different types of maintenance applied to LOVOL Compactors and maintenance periods in accordance with the manufacturer's recommendations, • Periodic and non-periodic preventive maintenance of systems and components in accordance with the manufacturer's recommendations. ► **Practical part:** • Remove and refit components (Filters, belt and accessories, Hydraulic hose, etc...) in accordance with the manufacturer's recommendations. • Replace consumables (Engine, Transmission, axles, Hydraulics, etc.). • Replenish oils and fluids (Engine, Transmission, axles, hydraulic systems and others) • Check that components comply with the manufacturer's recommendations (dimensions, flatness, voltage, current, tightness, pressure, etc.). • Visually inspect the LOVOL Compactor systems, • Reset the maintenance counter after work in accordance with the manufacturer's recommendations. ► **Evaluation part:** • Initial Test (Assessment of Prerequisites). • Final Test (Assessment of Acquired skills).		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	E-learning and/or classroom training in Mechanics, Electricity and Basic Hydraulics		
Language	English		
Equipment	Fully-equipped training room and workshop, Adapted machine(s) available, SST		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

SENIOR TECHNICIAN

WEICHAI ENGINE

TRUCK BRIDGE

SYNCHROSHIFT GEARBOX

POWERSHIFT GEARBOX

HYDRAULIC COMMANDE

POWERSHIFT TRANSMISSION

LVL07	REPAIR OF LOVOL CRAWLER EXCAVATORS

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Remove and refit** components of the systems (Powertrain, Electricity, Hydraulics) of LOVOL Crawler excavators. • **Test and Adjust** the systems (Powertrain, Electricity, Hydraulics) to the manufacturer's expectations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the different systems (Powertrain, Electricity, Hydraulics) of LOVOL crawler Excavators, • Procedure for removing and refitting components (engine, pumps, hydraulic solenoid valves, others) following the manufacturer's recommendations, • Procedure for checking, testing and adjusting the different systems (Powertrain, Electricity, Hydraulics) of crawler excavators following the manufacturer's recommendations. ► **Practical Part**: • Remove the various systems (Powertrain, Electricity, Hydraulics) from the crawler excavator following the manufacturer's recommendations, • Check the conformity of the components (engine, pumps, hydraulic solenoid valves, others) to the manufacturer's expectations, • Replace components or organs that do not meet the manufacturer's expectations, • Refit the various systems (Powertrain, Electricity, Hydraulics) of the crawler excavator following the manufacturer's recommendations, • Test and adjust systems (Powertrain, Electrical, Hydraulics) to the manufacturer's expectations. ► **Evaluation Part:** • Initial Test (Assessment of Prerequisites) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing Repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French - English		
Equipment	Equipped training room and workshop, adapted LOVOL machine(s).		
Documentation	Attendance sheet, satisfaction sheet, Attestation of participation.		

LVL08	REPAIR OF LOVOL WHEEL LOADERS

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Remove and refit** system components (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Wheel loaders. • **Test and Adjust** the systems (powertrain, chassis, electricity, Hydraulics) to the manufacturer's expectations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the different systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Wheel loaders • Procedure for removing and refitting components (engine, pumps, hydraulic solenoid valves, clutch block, others) following the manufacturer's recommendations, • Procedure for checking, testing and adjusting the various systems (Powertrain, Chassis, Electricity, Hydraulics) of the Wheel loaders following the manufacturer's recommendations. ► **Practical Part**: • Remove the various systems (Powertrain, Chassis, Electricity, Hydraulics) from the Wheel loader following the manufacturer's recommendations, • Check the conformity of the components (engine, pumps, hydraulic solenoid valves, clutch block, others) to the manufacturer's expectations, • Replace components or organs that do not meet the manufacturer's expectations, • Refit the various systems (powertrain, chassis, electricity, Hydraulics) of the Wheel loader following the manufacturer's recommendations, • Test and adjust systems (Powertrain, Chassis, Electrical, Hydraulics) to the manufacturer's expectations. ► **Evaluation Part:** • Initial Test (Assessment of Prerequisites) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing Repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French - English		
Equipment	Equipped training room and workshop, adapted LOVOL machine(s).		
Documentation	Attendance sheet, satisfaction sheet, Attestation of participation.		

LVL09	REPAIR OF LOVOL GRADERS

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Remove and refit** LOVOL Grader system components (Powertrain, Chassis, Electricity, Hydraulics) • **Test and Adjust** the systems (Powertrain, Chassis, Electricity, Hydraulics) to the manufacturer's expectations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the different systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Graders • Procedure for removing and refitting components (engine, pumps, hydraulic solenoid valves, clutch block, others) following the manufacturer's recommendations, • Procedure for checking, testing and adjusting the different systems (Powertrain, Chassis, Electricity, Hydraulics) of Graders following the manufacturer's recommendations. ► **Practical Part**: • Remove the various systems ((Powertrain, Chassis, Electricity, Hydraulics) from the Grader following the manufacturer's recommendations, • Check the conformity of the components (engine, pumps, hydraulic solenoid valves, clutch block, others) to the manufacturer's expectations, • Replace components or organs that do not meet the manufacturer's expectations, • Refit the various systems (Powertrain, Chassis, Electricity, Hydraulics) of the grader following the manufacturer's recommendations, • Test and adjust systems (Powertrain, Chassis, Electrical, Hydraulics) to the manufacturer's expectations. ► **Evaluation Part:** • Initial Test (Assessment of Prerequisites) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing Repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French - English		
Equipment	Equipped training room and workshop, adapted LOVOL machine(s).		
Documentation	Attendance sheet, satisfaction sheet, Attestation of participation.		

LVL10	REPAIR OF LOVOL BULLDOZERS

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Remove and refit** LOVOL bulldozer system components (Powertrain, Chassis, Electricity, Hydraulics) • **Test and adjust** the systems (Powertrain, Chassis, Electricity, Hydraulics) to the manufacturer's expectations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the different systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL bulldozers • Procedure for removing and refitting components (engine, pumps, hydraulic solenoid valves, clutch block, others) following the manufacturer's recommendations, • Procedure for checking, testing and adjusting the different systems (Powertrain, Chassis, Electricity, Hydraulics) of bulldozers following the manufacturer's recommendations. ► **Practical Part**: • Remove the various systems (Powertrain, Chassis, Electricity, Hydraulics) from the bulldozer following the manufacturer's recommendations, • Check the conformity of the components (engine, pumps, hydraulic solenoid valves, clutch block, others) to the manufacturer's expectations, • Replace components or organs that do not meet the manufacturer's expectations, • Refit the various systems (Powertrain, Chassis, Electricity, Hydraulics) of the bulldozer following the manufacturer's recommendations, • Test and adjust systems (Powertrain, Chassis, Electricity, Hydraulics) to manufacturer expectations. ► **Evaluation Part:** • Initial Test (Assessment of Prerequisites) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing Repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French - English		
Equipment	Equipped training room and workshop, adapted LOVOL machine(s).		
Documentation	Attendance sheet, satisfaction sheet, Attestation of participation.		

LVL11	REPAIR OF LOVOL BACKHOE LOADERS

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Remove and refit** LOVOL Backhoe loader system components (Powertrain, Chassis, Electrical, Hydraulics) • **Test and adjust** the systems (Powertrain, Chassis, Electricity, Hydraulics) to the manufacturer's expectations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the different systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Backhoe loaders • Procedure for removing and refitting components (engine, pumps, hydraulic solenoid valves, clutch block, others) following the manufacturer's recommendations, • Procedure for checking, testing and adjusting the different systems (Powertrain, Chassis, Electricity, Hydraulics) of Backhoe loaders following the manufacturer's recommendations. ► **Practical Part**: • Remove the systems (Powertrain, Chassis, Electricity, Hydraulics) from the Backhoe loader following the manufacturer's recommendations, • Check the conformity of the components (engine, pumps, hydraulic solenoid valves, clutch block, others) to the manufacturer's expectations, • Replace components or organs that do not meet the manufacturer's expectations, • Refit the systems (Powertrain, Chassis, Electricity, Hydraulics) of the Backhoe loader following the manufacturer's recommendations, • Test and adjust systems (Powertrain, Chassis, Electrical, Hydraulics) to the manufacturer's expectations. ► **Evaluation Part:** • Initial Test (Assessment of Prerequisites) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing Repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French - English		
Equipment	Equipped training room and workshop, adapted LOVOL machine(s).		
Documentation	Attendance sheet, satisfaction sheet, Attestation of participation.		

LVL12	REPAIR OF LOVOL COMPACTORS

Level, Mode and Duration	SENIOR	Face-to-face	05 days
Trainer	**LOVOL Technical Trainer Expert**		
Objectives	• **Remove and refit** LOVOL Compactors system components (Powertrain, Electrical, Hydraulics) • **Test and adjust** the systems (Powertrain, Electricity, Hydraulics) to the manufacturer's expectations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • Description and operation of the different systems (Powertrain, Electricity, Hydraulics) of LOVOL Compactors • Procedure for removing and refitting components (engine, pumps, hydraulic solenoid valves, others) following the manufacturer's recommendations, • Procedure for checking, testing and adjusting the different systems (Powertrain, Electricity, Hydraulics) of the Compactors following the manufacturer's recommendations. ► **Practical Part**: • Remove the systems (Powertrain, Electricity, Hydraulics) from the Compactors following the manufacturer's recommendations, • Check the conformity of the components (engine, pumps, hydraulic solenoid valves, others) to the manufacturer's expectations, • Replace components or organs that do not meet the manufacturer's expectations, • Refit the various systems (Powertrain, Electricity, Hydraulics) of the Compactors following the manufacturer's recommendations, • Test and adjust systems (Powertrain, Electrical, Hydraulics) to the manufacturer's expectations. ► **Evaluation Part:** • Initial Test (Assessment of Prerequisites) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing Repair		
Prerequisites	Have acquired the skills of the JUNIOR Technician Level (Maintenance)		
Language	French - English		
Equipment	Equipped training room and workshop, adapted LOVOL machine(s).		
Documentation	Attendance sheet, satisfaction sheet, Attestation of participation.		

EXPERT TECHNICIAN

DIAGNOSIS

LVL13	DIAGNOSIS OF THE SYSTEM OF LOVOL CRAWLER EXCAVATOR

Level, Mode and Duration	Expert	Face-to-face	05 days
Animator	**LOVOL Technical Trainer Expert**		
Goals	• **Diagnose** breakdowns relating to the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Crawler Excavators • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and maintenance reminder of the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Crawler Excavators, • Machine architecture and interconnection of modules on the CAN network, • Description and Operation of the management systems on the LOVOL machine, • Malfunctions of the systems (Powertrain, Chassis, Electricity, Hydraulics) of the LOVOL Crawler Excavator, • Machine settings from the instrument cluster, • Diagnostic steps and features of the Diagnostic tool (Component calibration, Machine configuration, Module programming). ► **Practical Part:** • Collect the various symptoms of malfunction/failure and the history of failures and repairs on the LOVOL Crawler Excavator • Estimate the cause of the machine malfunction/breakdown, • Test or check the conformity of the machine's systems and components, • Identify the most likely hypothesis based on the tests and symptoms, • Elaborate recommendations for components/organs to be changed or repaired, • Carry out the repair of the defective component or organ, • Test and adjust the system to be repaired. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing diagnostics		
Prerequisites	Have acquired the skills of the SENIOR Technician Level (Repair)		
Language	English - French		
Training equipment	Equipped training room and workshop, Crawler Excavator available, diagnostic interface, special tools		
Documentation	Satisfaction sheet, Attendance sheet, Attestation of participation		

LVL14	DIAGNOSIS OF THE SYSTEM OF LOVOL WHEEL LOADER

Level, Mode and Duration	Expert	Face-to-face	05 days
Animator	**LOVOL Technical Trainer Expert**		
Goals	• **Diagnose** breakdowns relating to the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Wheel Loaders • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and maintenance reminder of the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Wheel Loaders, • Machine architecture and interconnection of modules on the CAN network, • Description and Operation of the management systems on the LOVOL machine, • Malfunctions of the systems (Powertrain, Chassis, Electricity, Hydraulics) of the LOVOL Wheel Loader, • Machine settings from the instrument cluster, • Diagnostic steps and features of the Diagnostic tool (Component calibration, Machine configuration, Module programming). ► **Practical Part:** • Collect the various symptoms of malfunction/failure and the history of failures and repairs on the LOVOL Wheel Loader • Estimate the cause of the machine malfunction/breakdown, • Test or check the conformity of the machine's systems and components, • Identify the most likely hypothesis based on the tests and symptoms, • Elaborate recommendations for components/organs to be changed or repaired, • Carry out the repair of the defective component or organ, • Test and adjust the system to be repaired. ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing diagnostics		
Prerequisites	Have acquired the skills of the SENIOR Technician Level (Repair)		
Language	English - French		
Training equipment	Equipped training room and workshop, Loader available, Diagnostic interface, Special tools		
Documentation	Satisfaction sheet, Attendance sheet, Attestation of participation		

LVL15	DIAGNOSIS OF THE SYSTEM OF LOVOL GRADER

Level, Mode and Duration	Expert	Face-to-face	05 days
Animator	**LOVOL Technical Trainer Expert**		
Goals	• **Diagnose** breakdowns relating to the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Graders • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and maintenance reminder of the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Graders, • Machine architecture and interconnection of modules on the CAN network, • Description and Operation of the management systems on the LOVOL machine, • Malfunctions of the systems (Powertrain, Chassis, Electricity, Hydraulics) of the LOVOL Grader, • Machine settings from the instrument cluster, • Diagnostic steps and features of the Diagnostic tool (Component calibration, Machine configuration, Module programming). ► **Practical Part:** • Collect the various symptoms of malfunction/failure and the history of failures and repairs on the LOVOL Grader • Estimate the cause of the machine malfunction/breakdown, • Test or check the conformity of the machine's systems and components,,, • Identify the most likely hypothesis based on the tests and symptoms, • Elaborate recommendations for components/organs to be changed or repaired, • Carry out the repair of the defective component or organ, • Test and adjust the system to be repaired ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing diagnostics		
Prerequisites	Have acquired the skills of the SENIOR Technician Level (Repair)		
Language	English - French		
Training equipment	Equipped training room and workshop, Grader available, Diagnostic interface, Special tools		
Documentation	Satisfaction sheet, Attendance sheet, Attestation of participation		

LVL16	DIAGNOSIS OF THE SYSTEM OF LOVOL BULLDOZER

Level, Mode and Duration	Expert	Face-to-face	05 days
Animator	**LOVOL Technical Trainer Expert**		
Goals	• **Diagnose** breakdowns relating to the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Bulldozers • **Recommend r**epair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and maintenance reminder of the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Bulldozers, • Machine architecture and interconnection of modules on the CAN network, • Description and Operation of the management systems on the LOVOL machine, • Malfunctions of the systems (Powertrain, Chassis, Electricity, Hydraulics) of the LOVOL Bulldozer, • Machine settings from the instrument cluster, • Diagnostic steps and features of the Diagnostic tool (Component calibration, Machine configuration, Module programming). ► **Practical Part:** • Collect the various symptoms of malfunction/failure and the history of failures and repairs on the LOVOL Bulldozer • Estimate the cause of the machine malfunction/breakdown, • Test or check the conformity of the machine's systems and components • Identify the most likely hypothesis based on the tests and symptoms, • Elaborate recommendations for components/organs to be changed or repaired, • Carry out the repair of the defective component or organ, • Test and adjust the system to be repaired ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing diagnostics		
Prerequisites	Have acquired the skills of the SENIOR Technician Level (Repair)		
Language	English - French		
Training equipment	Equipped training room and workshop, Bulldozer available, Diagnostic interface, Special tools		
Documentation	Satisfaction sheet, Attendance sheet, Attestation of participation		

LVL17	DIAGNOSIS OF THE SYSTEM OF BACKHOE LOADER

Level, Mode and Duration	Expert	Face-to-face	05 days
Animator	**LOVOL Technical Trainer Expert**		
Goals	• **Diagnose** breakdowns relating to the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Backhoe Loaders • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and maintenance reminder of the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Backhoe Loaders, • Machine architecture and interconnection of modules on the CAN network, • Description and Operation of the management systems on the LOVOL machine, • Malfunctions of the systems (Powertrain, Chassis, Electricity, Hydraulics) of the LOVOL Backhoe Loader, • Machine settings from the instrument cluster, • Diagnostic steps and features of the Diagnostic tool (Component calibration, Machine configuration, Module programming). ► **Practical Part:** • Collect the various symptoms of malfunction/failure and the history of failures and repairs on the LOVOL Backhoe Loader • Estimate the cause of the machine malfunction/breakdown, • Test or check the conformity of the machine's systems and components • Identify the most likely hypothesis based on the tests and symptoms, • Elaborate recommendations for components/organs to be changed or repaired, • Carry out the repair of the defective component or organ, • Test and adjust the system to be repaired ► **Evaluation Part:** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing diagnostics		
Prerequisites	Have acquired the skills of the SENIOR Technician Level (Repair)		
Language	English - French		
Training equipment	Equipped training room and workshop, Backhoe loader available, Diagnostic interface, Special tools		
Documentation	Satisfaction sheet, Attendance sheet, Attestation of participation		

LVL18	DIAGNOSIS OF THE SYSTEM OF LOVOL COMPACTOR

Level, Mode and Duration	Expert	Face-to-face	05 days
Animator	**LOVOL Technical Trainer Expert**		
Goals	• **Diagnose** breakdowns relating to the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Compactors • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and maintenance reminder of the systems (Powertrain, Chassis, Electricity, Hydraulics) of LOVOL Compactors, • Machine architecture and interconnection of modules on the CAN network, • Description and Operation of the management systems on the LOVOL machine, • Malfunctions of the systems (Powertrain, Chassis, Electricity, Hydraulics) of the LOVOL Compactor, • Machine settings from the instrument cluster, • Diagnostic steps and features of the Diagnostic tool (Component calibration, Machine configuration, Module programming). ► **Practical Part:** • Collect the various symptoms of malfunction/failure and the history of failures and repairs on the LOVOL Compactor • Estimate the cause of the machine malfunction/breakdown, • Test or check the conformity of the machine's systems and components • Identify the most likely hypothesis based on the tests and symptoms, • Elaborate recommendations for components/organs to be changed or repaired, • Carry out the repair of the defective component or organ, • Test and adjust the system to be repaired ► **Evaluation Part:** •Initial Test (Prerequisite Assessment) •Final Test (Assessment of Acquired Skills)		
Target audience	Technician performing diagnostics		
Prerequisites	Have acquired the skills of the SENIOR Technician Level (Repair)		
Language	English - French		
Training equipment	Equipped training room and workshop, Compactor available, Diagnostic interface, Special tools		
Documentation	Satisfaction sheet, Attendance sheet, Attestation of participation
