PARTS & SERVICE TRAINING CATALOGUE MOTORS 2026

Mercedes-Benz

OUR COMMITMENT:

TO ASSIST YOU IN DEVELOPING THE COMPETENCE AND PERFORMANCE OF YOUR EMPLOYEES AND YOUR SERVICE.

Version of Octobre 31, 2024

EDITO

Dear Subsidiary,

The Group Academy is pleased to present its catalogue of services for 2026 and to inform you of our commitments for all subsidiaries:

- ✓ **To support you in developing the skills and performance of your employees and your service,**
- ✓ **To support you in resolving technical problems on customer vehicles,**
- ✓ **To standardize and normalize the skill levels of the group's technicians.**

The diversity of brands deployed by CFAO is a real asset for the development of our skills development offers to subsidiaries throughout the company's territories. This diversity challenges us to ensure a high level of service quality within the after-sales service, the parts service, the sales department and the financial and legal service.

To improve the quality of your employees' services, we recommend deploying the following technical skills acquisition cycle:

- ✓ **Measure** the current skills of technicians and teams,
- ✓ **Exploit** the results to guide the skills development strategy,
- ✓ **Define** individual and collective skills development plans,
- ✓ **Acquire** new skills through face-to-face or remote trainings,
- ✓ **Certify** the new skills acquired,
- ✓ **Apply** new skills in a professional environment,
- ✓ **Perform** in a professional environment.

We also offer to **assist** you in **resolving technical problems** that you encounter in your workshops, with **technical support integrated** into the Academy.

The development of new skills is carried out by certified experts each in their areas of expertise, using innovative training methods.

Thank you for your commitment to developing the skills of your employees. We look forward to hearing from you.

Laurent GONIN

TEAM MOTORS

The Douala Academy for MOTORS is dedicated to the **TOYOTA**, **SUZUKI, BYD, MERCEDES, MITSUBISHI, PEUGEOT** and **CITROEN** brands.
The Academy is equipped with:

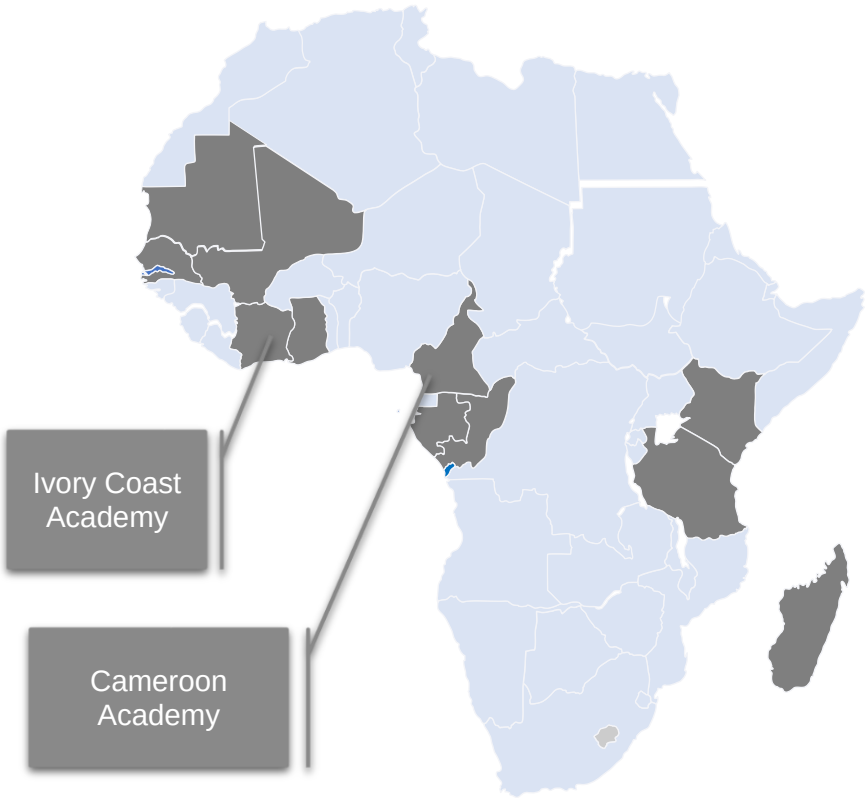

- A reception and restaurant,
- Three training rooms (blackboard, video projector, etc.),
- A 400 M² workshop,
- Engine, transmission and other didactic equipment,
- Eight véhicules,
- A parts store.

Our training courses are delivered at the Douala Academy and within all our subsidiaries. We also provide training at our customers' sites. Training sessions are made up of a maximum of twelve trainees.

T2116F-CF	MAINTENANCE OF MERCEDES-BENZ VEHICLES

Level, mode and duration	BASIC (MERCEDES)	Face-to-face	2.5 days
Trainer	**BEN ABID HATEM**		
Objectives	• Outline the competency requirements of a 'Qualified Maintenance Technician' job profile. • Compare the learning objectives defined at the start of the training with the learning objectives of the training and analyse them during the training ('Where am I ?') in order to achieve them more effectively and in a more targeted way. • Demonstrate the required content in terms of safety at work and accident prevention, and implement it in practical work sequences. • Check their knowledge of maintenance via the initial quiz. • Identify and process the service record for cars in practical work. • Identify and process the Sprinter service sheet in practical work. • Describe and carry out specified practical work on brake pads. • Describe and carry out specified practical work on the poly-toile V-belt. • Describe and carry out specified practical work relating to service. • Compare the skills required against their abilities in the practical work sequences and make adjustments. • Use the tools required in the practical work in accordance with the requirements and implement adaptations based on the skills required to achieve the learning objective. • Incorporate what they have learned into their day-to-day work and work in a more structured and efficient manner. • Develop what they have learnt independently and pass on their knowledge to their colleagues as a multiplier in their company.		
Description	► **Contents** • Safety at work and accident prevention • Initial quiz with questions on maintenance • Identifying and processing the service record • Practical work on vehicles • Identifying and processing the service record • Practical work on Mercedes-Benz cars • Identifying and processing the service card • Practical work on Mercedes-Benz cars • Identification and processing of the service card - Practical work on brake pads • Practical work on poly-V-		
Target audience	Qualified maintenance Technician		
Prerequisites	To have completed the GTLS E-Learning course: P0323P • Passenger Cars, Vans, AMG, smart • Service Operating Processes		
Language	French		
Equipment	Fully equipped training room, Workshop, Computers, Mercedes-Benz vehicle(s) available + associated repair manual(s), Workshop tools, Measuring tools, XENTRY DIAGNOSIS diagnostic kit, Internet connection and Consumables.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

T2115F-CF	MAINTENANCE OF ELECTRICAL SYSTEMS

Level, mode and duration	BASIC (MERCEDES)	Face-to-face	2.5 days
Trainer	**BEN ABID HATEM**		
Objectives	• Outline the content and skills requirements of the 'Qualified Maintenance Technician' job profile. • Compare the learning objectives set at the start of the training with the learning objectives of the training and analyse them during the training ('Where am I ?') in order to achieve them more effectively and in a more targeted way. • Demonstrate the required occupational safety and accident prevention content and implement it in the practical work sequences. • Check their knowledge of automotive electricity via the initial quiz. • Carry out measurements on components in the practical work and calculate electrical variables. • Carry out measurements on current and resistance in the practical work sequences. • Select the correct wiring diagrams according to the requirements of the practical work sequences. • Carry out voltage measurements on the vehicle in the practical work sequences. • Carry out energy consumption measurements on the vehicle as part of the practical work. • Carry out quiescent current measurements on the vehicle as part of the practical work. • Use the tools needed for practical work in accordance with the requirements and make the necessary adaptations according to skills to achieve the learning objective. • Integrate what they have learnt into their daily work and work in a more structured and efficient way. • Develop what they have learnt independently and pass on their knowledge to their colleagues as a multiplier in their company.		
Description	► **Contents** • Safety at work and accident prevention • Initial quiz with group of questions relating to automotive electricity • Practical work with measurements on components and calculation of electrical variables • Practical work with current and resistance measurements • Practical work identifying electrical diagrams • Practical exercises involving voltage measurements on a vehicle • Practical work with energy consumption measurements on vehicle components • Practical work with quiescent current measurements		
Public visé	Qualified maintenance Technician		
Prérequis	E-Learning Training GTLS: P0323P • Passenger Cars, Vans, AMG, smart • Service Operating Processes		
Langue	French		
Équipements	Equipped training room, Workshop, Computers, Mercedes-Benz vehicle(s) available + associated repair manual(s), Workshop tools, Measuring tools, XENTRY DIAGNOSIS diagnostic kit, Internet connection and Consumables
