OUR COMMITMENT:

SUPPORTING YOU IN DEVELOPING THE SKILLS AND PERFORMANCE OF YOUR TEAMS AND YOUR SERVICE.

Version dated 05 February 2026

FOREWORD

Dear Subs**idiary,**

The Academy is pleased to present it**s new "Process SAV & PART"** catalogue for 2026 and to inform you of our commitments:

- ✓ **We support you in developing the skills and performance of your teams and your service,**
- ✓ **We support you in resolving SAV & PART process issues,**
- ✓ **We provide standards for your teams' competency levels.**

The diversity of brands deployed by CFAO is a real asset for developing our skills development offers for subsidiaries across all company territories. This diversity challenges us to ensure a high level of service quality within the After-Sales & Parts service.

To ensure the quality of your teams' performance, we propose deploying the following skills acquisition cycle:

- ✓ **Measure the current** skills of technicians and teams,
- ✓ Use the measurement data and deploy the skills development strategy,
- ✓ **Define i**ndividual and collective skills development plans,
- ✓ **Acqu**ire knowledge and know-how in subsidiary workshops and/or at the CFR,
- ✓ **Certify the knowl**edge and know-how acquired,
- ✓ **Apply new** knowledge in the workplace,
- ✓ **Perform** in a professional environment.

The development of new skills and our services are delivered by certified **experts, each in their field of expertise, using innovative facilitation methods and state-of-the-art performance evaluation methods**.

Thank you for your involvement in developing your teams' skills, and we remain at your disposal for any further information.

Laurent GONIN

TEAM MOBILITY

The Douala Academy is responsible for tr**aining** technicians, bodybuilders and after-sales & parts staff on processes for 19 brands across 35 countries in Africa.

Our training courses are delivered at the Douala Academy as well as across all our subsidiaries.

MA01	MANAGING THE OPERATIONAL EFFICIENCY OF CUSTOMER RECEPTION WITHIN THE AFTER-SALES SERVICE

Level, format and duration	Managers	In-person	01 day
Trainer	**Expert trainer**		
Objectives	**Develop the** KPIs for the operational efficiency of customer reception within the after-sales service, **Evaluate** the operational efficiency of customer reception within the after-sales service, **Optimise th**e operational efficiency of customer reception within the after-sales service.		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical part:** • **Develop the KPIs for an after-sa**les **service**: • Customer satisfaction (SAT, retention, recommendation, immediate satisfaction), • Operational efficiency of productivity (first-visit resolution rate, average repair time, workshop productivity, recall rate for correction, ...), • Profitability of the after-sales service (turnover, gross margin, spare parts utilisation rate), • **Evaluate** the operational efficiency of the after-sales service: • Use the CFAO quality plan and the MYCS tool, • Use the audit report (communication and understanding of results, analysis of causes, development of corrective actions and action plan). • **Optimise** operational efficiency: • Monitor and measure the effectiveness of the actions defined during the audit, • Corrective actions to be applied. • **Practical part**: • **Role** plays on resolving organisational issues, • **Role** plays on resolving human issues, • **Role plays on resolving equipment issues**,		
Target audience	Managers		
Prerequisites	Customer management in the workshops.		
Language	French		
Equipment	Equipped training room, phone with SIM card for role play.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation,		

FO01	CALL FOR THE CUSTOMER VEHICLE'S FIRST MAINTENANCE BY THE AFTER-SALES SERVICE

Level, format and duration	Junior	In-person	02 days
Trainer	**SAV & PART process trainer**		
Objectives	• **Schedu**le phone calls concerning the customer's first maintenance, • **Present to the customer the** first preventive maintenance services offered for their vehicle, • **Propose** dates for preventive maintenance work on the customer's vehicle in our after-sales workshops, • **Enter** the information collected in the IZIFLO application.		
Description **Theory (20%)** **Practice (80%)**	• **Theoretical part:** • **Schedu**le phone calls concerning the customer's first maintenance: • Importance of the customer call for periodic maintenance • Managing the number of phone calls based on first-visit vehicle data, • **Present to the customer the** first preventive maintenance services offered for their vehicle, • Principles of telephone reception (active listening, identifying customer issues, reformulating needs, etc.), • **Propose** dates for preventive maintenance work on the customer's vehicle in our after-sales workshops, • Check workshop availability for the proposed slot, • Confirm an appointment date with the customer. • **Enter th**e information collected in the IZIFLO application. • Use of IZIFLO & WhatsApp and management of leads, • Plan customer appointments taking into account workshop workload. • **Practical part**: • Relational role plays: • Active listening to the customer, • Identify the customer's issue(s) (maintenance, repair, diagnosis, workshop return), • Reformulate the customer's needs to the customer, • Provide a reliable and viable customer solution (appointment date, work, ...) • Simulation: • Plan maintenance, repair, diagnosis, workshop return or other services within the after-sales workshops, • Manage the service via IZIFLO.		
Target audience	Front Office staff		
Prerequisites	Customer management in the workshops.		
Language	French		
Equipment	Equipped training room, phone with SIM card for role play.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation,		

FO02	PREPARATION FOR RECEIVING THE CUSTOMER'S VEHICLE IN THE AFTER-SALES SERVICE

Level, format and duration	All Brands	In-person	01 day
Trainer	**SAV & PART process trainer**		
Objectives	• **Ensure parts** availability in the store, • **Prepare the customer vehic**le file on the IZIFLO application, • **Share the vehic**le intervention with the team leader.		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical part:** • **Ensure** availability of parts in the store: • Check in-stock references corresponding to the customer's vehicle model, • Ensure parts availability on the intervention date, • Set aside parts (pre-picking) for the customer's vehicle, • **Prepare the customer vehic**le file on the IZIFLO application: • Review previous work on the customer's vehicle, • Open the pre-RO, • **Share the vehic**le intervention with the team leader. • Inform the team leader of information about the customer's vehicle, • Report any particularities of the customer's request (accessories, etc.), • Identify the technician and after-sales location taking into account the specifics of the intervention, • **Practical part**: • Role play on parts availability in the store, • Role play on preparing the customer vehicle file on **t**he IZIFLO application: • Role play on communicating the **vehic**le intervention with the team leader.		
Target audience	Front Office staff		
Prerequisites	Customer management in the workshops.		
Language	French		
Equipment	Equipped training room, phone with SIM card for role play.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation, course materials.		

FO03	RECEIVING THE VEHICLE WITH THE CUSTOMER IN THE AFTER-SALES SERVICE

Level, format and duration	All Brands	In-person	01 day
Trainer	**SAV & PART process trainer**		
Objectives	• **Welcome the customer with their** vehicle, • **Check the condition of the** vehicle with the customer, • **Inspect the** safety points of the customer's vehicle, • **Offer** additional products to the customer.		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical part:** • **Welcome the customer with their** vehicle: • Confirm the reason for the customer's visit (customer requests and/or after-sales), • Explain to the customer the different steps of their journey and their vehicle's journey in after-sales, • **Check the condition of the** vehicle with the customer, • Check the condition of the bodywork and paint, • List the items inside the vehicle**,** • **Inspect** and present the customer's vehicle safety points and additional products: • Visually check the condition of the wiper blades, lighting, and the MOT validity date, • Record all useful information (fuel level, mileage, ...) on the instrument cluster, • **Offer** additional products to the customer: • Explain the offer and the additional intervention time, • Customer signature of the offer, • Draft the repair order within the after-sales workshop, • **Practical part**: • Brainstorming on the actions to be implemented by the service advisor when receiving a customer's vehicle, • Role plays / simulations, • **Welcome the customer with their** vehicle, • **Assess the condition of the vehicle with the customer** • **Inspect** and present the customer's vehicle safety points and additional products, • **Offer** additional products to the customer.		
Target audience	Front Office staff		
Prerequisites	Customer management in the workshops.		
Language	French		
Equipment	Equipped training room,		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation, course materials.		

FO04	FOLLOW-UP OF WORK ON THE CUSTOMER'S VEHICLE IN THE AFTER-SALES SERVICE

Level, format and duration	All Brands	In-person	01 day
Trainer	**SAV & PART process trainer**		
Objectives	• **Ensure the vehicle** is delivered to the customer on time, • **Ensure proactive** customer communication, • **Secure** quality (Fix-It-Right) and traceability.		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical part:** • **Ensure the vehicle** is delivered to the customer on time, • Track in real time the progress of work on the customer's vehicle, • Ensure parts and products are available to the technician, • **Ensure proactive** customer communication, • Inform the customer by SMS or call at three key moments: workshop entry, approval of additional work, and vehicle ready for collection, • Call the customer in advance to provide a replacement vehicle if a delay is identified, • **Secure** quality (Fix-It-Right) and traceability, • Put in place a delivery checklist (fluids checked, tyre pressure, interior cleanliness, wheel torque). • Document technical comments and photos (worn parts) in IZIFLO to justify the intervention, • Close the repair order once the work has been completed and signed by the customer, • **Practical part (role play)**: • Ensure **the vehicle** is delivered to the customer on time, • Ensure proactive customer communication, • Secure quality (Fix-It-Right) and traceability,		
Target audience	Front Office staff		
Prerequisites	Customer management in the workshops.		
Language	French		
Equipment	Equipped training room, phone with SIM card for role play.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation, course materials.		

FO05	RETURN OF THE VEHICLE TO THE CUSTOMER BY THE AFTER-SALES SERVICE

Level, format and duration	All Brands	In-person	01 day
Trainer	**SAV & PART process trainer**		
Objectives	• **Inform the customer of the return of their v**ehicle, • **Advise on th**e next service and recommendations based on vehicle condition, • **Present the invoice for p**ayment, • **Return the vehicle to the customer o**n time,		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical part:** • **Inform the customer of the return of their v**ehicle, • Indicate the time and place of vehicle return, • Comment to the customer **on the work** carried out, • **Advise on th**e next service and recommendations based on vehicle condition, • Mention to the customer the recommended future work, • Explain the impact of regular maintenance and identify the next intervention date, • **Present the invoice for p**ayment, • Detail the items: labour, parts and packages, • Highlight free safety check points, • Customer signature of the invoice. • **Return the vehicl**e to the customer. • Remove protective covers in front of the customer or just before, • Accompany the customer to their vehicle, • Walk around the vehicle, • Identify customer satisfaction with their journey within the after-sales service. • **Practical part (role play)**: • **Inform the customer of the return of their v**ehicle, • **Advise on th**e next service and recommendations based on vehicle condition, • **Present the invoice for p**ayment • **Return the vehicl**e on time as promised,		
Target audience	Front Office staff		
Prerequisites	Customer management in the workshops.		
Language	French		
Equipment	Equipped training room, phone with SIM card for role play.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation, course materials.		

FO06	MEASURING CUSTOMER SATISFACTION AFTER VEHICLE WORK

Level, format and duration	All Brands	In-person	01 day
Trainer	**SAV & PART process trainer**		
Objectives	• **Identify customer** satisfaction with their journey within the after-sales service, • **Identify customer** satisfaction with the work carried out, • **Manage customer di**ssatisfaction and delicate situations, • **Improve customer r**eception processes within after-sales service and repairs,		
Description **Theory (40%)** **Practice (60%)**	• **Theoretical part:** • **Identify customer** satisfaction with their journey within the after-sales service, • Assess the ease of contacting the garage and the time to obtain an appointment, • Assess the waiting time at reception and administrative handling time, • Assess the quality of reception and departure with the customer within the after-sales service, • **Identify customer** satisfaction with the work carried out, • **Highlight positiv**e feedback and dissatisfactions, • Analyse KPIs (FIR: repair successful on the first visit), • **Manage dissatisfaction and d**elicate situations effectively, • Ensure you call the customer back within 24 hours after a complaint, • Practise active listening and empathy, • Define leeway to propose a goodwill gesture, • **Improve customer r**eception processes within after-sales service and repairs, • Share customer feedback in weekly meetings, • Analyse the main causes of the problem (lack of training, poor organisation, ...) • Propose improvement solutions, • **Practical part (role play**): • **Identify customer** satisfaction with their journey within the after-sales service, • **Identify customer** satisfaction with the work carried out, • **Manage di**ssatisfaction and delicate situations, • **Improve customer r**eception processes within after-sales service and repairs,		
Target audience	Front Office staff		
Prerequisites	Customer management in the workshops.		
Language	French		
Equipment	Equipped training room, phone with SIM card for role play.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation, course materials.		

IZIFLO01	AFTER-SALES WORKSHOP MANAGEMENT WITH THE IZIFLO APPLICATION

Level, format and duration	All Brands	In-person	02 days
Trainer	**SAV & PART process trainer**		
Objectives	• **Manage after-sales** activity with the IZIFLO online tool.		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical part:** • Management of customer contact records • Management of vehicle records • Booking customer appointments • Intervention planning • Reception/return planning • Workload planning • Customer communication during repair work • Management of leads • Various notification alerts, • Management of repair orders (RO) • IZIFLO reception and interface • IZIFL**O platform settings** • **Practical part** IZIFLO: • Exercises for booking appointments, modifying a time slot and converting a web lead into a confirmed appointment. • Advanced search exercises in customer/vehicle records and procedure for creating a new contact, • Simulation of a vehicle inspection with photos and videos of existing damage via the application, • Reception closing exercise: using the electronic signature tool to validate a repair order on a tablet, • Manual updating (if necessary) and tracking of repair order statuses for a given vehicle, • Setting up and sending a "Vehicle ready" notification (SMS/email) to the customer, • Demonstration of extracting a simple after-sales report (e.g., average repair time) via the analysis tool.		
Target audience	After-Sales reception agents, service advisors, workshop managers, after-sales managers.		
Prerequisites	Customer management in the workshops.		
Language	French		
Equipment	Equipped training room, phone with SIM card for role play.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation, course materials.		

PDI09	PREPARATION OF VEHICLES BEFORE DELIVERY TO THE CUSTOMER (PDI)

Level, format and duration	All Brands	In-person	02 days
Trainer	**SAV & PART process trainer**		
Objectives	• **Receive** the new vehicle and/or after workshop work, • **Check** compliance of all vehicle characteristics, • **Fit the various** accessories to the vehicle in line with customer expectations, • **Return the vehicle** to the relevant department (sales, after-sales, ...)		
Description **Theory (30%)** **Practice (70%)**	**Theoretical part:** • **Receive** the new vehicle and/or after workshop work: ◦ PDI, customer satisfaction and administrative procedures (registration), ◦ Declaration of vehicle commissioning on the manufacturer's portal, ◦ Warranty on work and manufacturer warranty, • **Check** compliance of all vehicle characteristics, ◦ Expected compliance for each vehicle type and associated documents (quality checks), ◦ Steps for verifying vehicles and associated documents. • **Fit the various** accessories to the vehicle in line with customer expectations: ◦ Check compliance of the accessories to be fitted, ◦ Read the fitting instructions or manual, • **Return the vehicle** to the relevant department (sales, after-sales, ...): ◦ Inform the department of the vehicle's level of compliance. **Practical part**: • **Receive** the new vehicle and/or after workshop work: ◦ Remove temporary protective elements and clean the vehicle, ◦ Complete administrative documents, • **Check** compliance of all vehicle characteristics, ◦ Check fluids and tyre pressure, ◦ Check correct operation of electronic systems (GPS, connectivity, driver assistance). ◦ Carry out a final road test, ◦ Complete and sign the PDI/Quality Control form, • **Fit the various** accessories to the vehicle in line with customer expectations: ◦ Fit accessories in line with the customer's request, ◦ Install safety equipment (high-vis vest, triangle). • **Return the vehicle** to the relevant department (sales, after-sales, ...): ◦ Cleaning and aesthetic preparation (interior/exterior). ◦ Inform the department of the vehicle's level of compliance.		
Target audience	After-sales preparer, quality inspectors, workshop manager.		
Prerequisites	Basic knowledge of automotive mechanics and diagnostic tools.		
Language	French		
Equipment	Equipped training room, equipped workshop, diagnostic station (scan tool), Quality Control sheet (PDI checklist), cleaning and aesthetic preparation equipment.		
Documentation	Attendance sheet, satisfaction sheet, certificate of participation, manufacturer PDI procedure manual, course materials.		

SSGF01	SUBMISSION OF WARRANTY CLAIMS

Level, format and duration	None	Remote	04 hours
Trainer	**Expert trainer**		
Objectives	• **Consolidate the e**lements required to submit a warranty claim that meets the manufacturer's requirements, • **Submit the** warranty claim in line with requirements on the manufacturer platform, • Follow up on the processing of submitted warranty claims,		
Description **Theory (50%)** **Practice (50%)**	**Theoretical part:** • **Consolidate the e**lements required to submit a warranty claim that meets the manufacturer's requirements, • Check the date of first registration, mileage and service history of the vehicle, • Ensure customer complaints, causes found and solutions provided are clearly documented, • Capture clear images of the defective part, the VIN and the mileage. For electronic faults, attach diagnostic reports, • Tag and store replaced parts according to manufacturer standards while awaiting the return decision, • Identify fault codes and cause codes specific to the warranty manual, • **Submit the comp**liant warranty claim on the manufacturer platform: • Enter vehicle data (VIN) to retrieve active warranty data. • Write a clear, logical text explaining the diagnosis and repair, • Use official labour time standards, • Upload supporting documents (attach parts invoices, diagnostic reports and collected photos), • **Follow the processing of submitted c**laims, • Interpret statuses (pending, request for information, rejected and accepted), • Analyse processing times (administrative performance KPIs), • Archive accepted files digitally and physically for future manufacturer warranty audits. **Practical part**: • Consolidate the elements required to submit a warranty claim that meets the manufacturer's requirements, • Submit the warranty claim in line with requirements on the manufacturer platform, • Follow up on the processing of submitted warranty claims.		
Target audience	Warranty administrator and anyone involved in reporting warranty issues,		
Prerequisites	Access to the manufacturer submission platform,		
Language	French		
Equipment	A computer with internet access		
Documentation	Attendance sheet, satisfaction sheet, course materials.		

PARTS PROCESS TRAINING

PART01	STANDARDISATION OF SUBSIDIARIES' PARTS DEPARTMENT PROCESSES

Level, format and duration	PART	In-person	05 days
Trainer	**SAV & PART process trainer**		
Objectives	• **Define th**e standard for the operational organisation of the parts department, • **Audit the operational** organisation of a parts department, • **Develop th**e operational improvement plan for a parts department, • **Deploy** the operational improvement plan for a parts department, • **Sustain the new operationa**l actions of a parts department,		
Description: **Theory (20%)** **Practice (80%)**	**Theoretical part.** • **Define th**e standard for the operational organisation of the parts department (KPI): • Define the width and depth of stock, • Identify the seven storage techniques, • Manage special orders, • Monitor estimated delivery of parts in the store (ETA), • Analyse missed sales, • **Audit the operational** organisation of a parts department: • Analyse inventory management, • Assess the security of property and people, • Measure logistical efficiency, • Measure regulatory compliance. • **Develop th**e operational improvement plan for a parts department: • Define the actions of the improvement plan, • Define roles and responsibilities, • Define the timetable for implementing the improvement plan, • Define KPIs to evaluate results, • **Deploy** the operational improvement plan for a parts department: • Execute the operational improvement plan, • Monitor the operational improvement plan, • Analyse operational results. • **Sustain the new operationa**l actions of a parts department: • Mobilise stakeholders in the new processes, • Communicate on the new procedures and their effectiveness, • Train teams in the new procedures, • Assess the relevance of the new actions over time. **Practical part:** • Role play on the five objectives of this training description sheet.		
Target audience	Parts Department staff (Supply Chain and Sales)		
Prerequisites	None		
Language	French		
Equipment	Training materials (computer, classroom, course materials)		
Documentation	Satisfaction sheet, end-of-course report, certificate of participation, course materials.		

TP01	DEVELOPING THE TECHNICAL SALES ARGUMENT FOR MANUFACTURER MAINTENANCE PARTS

Level, format and duration	DAV	Remote	02 days
Trainer	**Expert trainer**		
Objectives	• **Stren**gthen the technical-sales argument for the sale of maintenance parts, • **Compare genuine manufactur**er maintenance parts and counterfeit parts,		
Description **Theory (70%)** **Practice (30%)**	**Theoretical part:** • Strengthen the technical-sales argument for the sale of maintenance parts. • Present and explain the role of filtration elements, braking, spark plugs and other parts, • Maintenance intervals for filtration, braking, spark plugs and other parts, • Highlight preserving the vehicle warranty and the warranty specific to the manufacturer spare part, • Use the pillars of TSM-FIR (Precision and Confidence) to reassure the customer about reliability and safety, • Compare genuine manufacturer maintenance parts and counterfeit parts**.** • Highlight the differences between manufacturer parts and counterfeit parts, • Learn to identify official packaging, security holograms and specific markings on the part to prove authenticity, • Consequences of not complying with part quality and maintenance intervals, **Practical part:** • Compare genuine manufacturer maintenance parts and counterfeit parts,		
Target audience	Service and Spare Parts department staff.		
Prerequisites	None		
Language	French		
Equipment	A computer with internet access		
Documentation	Attendance sheet, satisfaction sheet, course materials.		

TP02	USE OF THE MANUFACTURER PARTS CATALOGUE PLATFORM

Format and duration	EPC	Remote	01 day
Trainer	**Expert trainer**		
Objectives	• **Identify spare part**s references on the manufacturer platform, • **Search for** vehicle models corresponding to a part reference, • **Identify the** quantities and characteristics of oils and fluids used for maintenance,		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical part:** • **Identify spare part**s references on the manufacturer platform, • Learn to decode and enter the chassis number to isolate the exact vehicle, • Use exploded views by groups (Engine, Chassis, Electrical, Bodywork), • Identify the diagram number and its correspondence with the full reference (Part Number), • Know how to distinguish reference changes by month and year of vehicle manufacture, • **Search for** vehicle models corresponding to a part reference, • Enter a known reference to list all models in the range that use that same part, • Analyse whether a reference has been replaced by a new one (substitution) and whether the old one remains usable, • Model code analysis: understand vehicle family codes to broaden compatibility search, • **Identify the** quantities and characteristics of oils and fluids used for maintenance. • Identify exact volumes (in litres) for the engine crankcase, gearbox (manual/auto), axle and cooling system, • Identify required viscosity indices and quality standards (API, ACEA), • Recognise proprietary fluids to avoid prohibited mixtures, • Link the fluid reference to the maintenance interval recommended by the manufacturer, • **Practical part:** • Identify spare parts references on the manufacturer platform, • Search for vehicle models corresponding to a part reference, • Identify the quantities and characteristics of oils and fluids used for maintenance,		
Target audience	Service and Spare Parts department staff.		
Prerequisites	Access to the manufacturer platform		
Language	French		
Equipment	A computer with internet access and a valid manufacturer login.		
Documentation	Attendance sheet, satisfaction sheet, course materials.
