OUR COMMITMENT:

SUPPORT YOU IN DEVELOPING THE SKILLS AND PERFORMANCE OF YOUR EMPLOYEES AND YOUR DEPARTMENT.

Version dated January 29, 2026

EDITO

Dear Subsidiary,

The Academy is pleased to present you with **its new catalogue « Process After-Sales & PART »** for the year 2026 and informs you of our commitments :

- ✓ **Supporting you in developing the skills and performance of your employees and your department,**
- ✓ **Assisting you in resolving customer vehicle issues,**
- ✓ **Offering you standards for your employees' skill levels.**

The diversity of brands deployed by CFAO is a real asset in the development of our skills development offerings for subsidiaries across all the company's territories. This diversity challenges us to ensure a quality level of service within the After-Sales Service department, the Parts department, and others.

To meet the quality of your employees' performance, we propose deploying the following skills acquisition cycle:

- ✓ **Measuring** the current skills of the technicians on your teams,
- ✓ **Analyzing** the measurement data and deploying the skills development strategy,
- ✓ **Defining** individual and collective skills development plans,
- ✓ **Acquiring** knowledge and know-how through E-learning, face-to-face, and remote training,
- ✓ C**ertifying the** knowledge and know-how acquired,
- ✓ **Applying** new knowledge in the professional environment,
- ✓ **Performing** in the professional environment.

The development of new skills and technical services are carried out by **certified experts in their respective fields of expertise**, using innovative facilitation methods and effective diagnostic methods.

Thank you for your involvement in developing your employees' skills, and we remain at your disposal for any further information.

Best regards,

Laurent GONIN

TEAM MOBILITY

The Douala Academy is responsible for training technicians, bodywork specialists, and After-Sales & Parts personnel across **19 brands and 35 countries in Africa**, ensuring their adherence to established processes.

Our training courses are conducted at the Douala Academy as well as at all of our subsidiaries.

Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Manage After-Sales activities with the IZIFLO online tool.		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical Part:** • Customer contact file management • Vehicle file management • Customer appointment schedulin • Intervention plannin • Reception/handover plannin • Workload plannin • Customer communication during repair wor • "Leads" managemen • Different notification alerts • Work Order (OR) management • IZIFLO reception and interface, • IZIFLO platform parameters. • **IZIFLO Practical Part:** • Appointment scheduling exercises, modification of a time slot and conversion of a Web Lead into a confirmed appointment. • Advanced search exercises in customer/vehicle files and procedure for creating a new contact, • Simulation of a vehicle inspection including taking photos and videos of existing damage via the application, • Reception Closing exercise: Use of the Electronic Signature tool to validate a Repair Order on tablet, • Manual update (if necessary) and follow-up of OR Statuses for a given vehicle, • Configuration and sending of a notification (SMS/e-mail) of "Vehicle ready" to the customer, • Demonstration of extracting a simple SAV report (e.g.: average repair time) via the analysis tool.		
Target Audience	SAV Reception Agents, Customer Advisors (Service), Workshop Managers, SAV Managers		
Prerequisites	Customer management in the workshops.		
Language	French		
Equipment	Equipped training room, mobile phone for role-play.		
Documentation	Attendance sheet, Satisfaction survey, Participation certificate, Course materials.		

PDI09	VEHICLE PREPARATION BEFORE DELIVERY TO CUSTOMER (PDI)

Level, mode and duration	All Brands	In-Person	02 Days
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Receive the new vehicle and/or after workshop work, • Verify the conformity of all vehicle characteristics, • Install the various accessories on the vehicle in accordance with customer expectations, • Hand over the vehicle to the concerned department (sales, after-sales service, ...).		
Description **Theory (30%)** **Practice (70%)**	• **Theoretical Part:** • Receive the new vehicle and/or after workshop work: • PDI, customer satisfaction and administrative procedures (registration), • Work and manufacturer warranty, • Verify the conformity of all vehicle characteristics: • Conformity expectations for each type of vehicle and associated documents (quality controls), • Steps for vehicle verification and associated documents. • Install the various accessories on the vehicle in accordance with customer expectations: • Verification of accessory conformity upon vehicle receipt, • Reading the accessory installation notice or manual, • Hand over the vehicle to the concerned department (commercial, SAV, ...): • Inform the department of the vehicle conformity level. • **Practical Part:** • Receive the new vehicle and/or after workshop work: • Remove temporary protection elements and clean the vehicle, • Complete administrative documents, • Verify the conformity of all vehicle characteristics: • Fluid and tire pressure checks, • Verification of proper functioning of electronic systems (GPS, connectivity, driving aids), • Final validation road test, • Completion and signature of the PDI/Quality Control form, • Install the various accessories on the vehicle in accordance with customer expectations: • Install accessories in accordance with customer demand, • Installation of safety equipment (vest, triangle), • Hand over the vehicle to the concerned department (commercial, SAV, ...): • Cleaning and aesthetic preparation (interior/exterior), • Inform the department of the vehicle conformity level.		
Target Audience	After-Sales preparers, quality inspectors, Workshop Manager.		
Prerequisites	Basic knowledge of automotive mechanics and diagnostic tools.		
Language	French		
Equipment	Equipped training room, Equipped workshop, Diagnostic station (device), PDI Quality Inspection Sheet, Cleaning and aesthetic preparation materials.		
Documentation	Attendance sheet, Satisfaction survey, Participation certificate, Manufacturer PDI procedure manual,ur, Support de cours.		

PROCESS PARTS TRAINING

TP01	USE OF THE TOYOTA PARTS REFERENCE PLATFORM (WEB EPC)

Level, mode and duration	EPC	Remote	03 Days
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Identify spare parts references on the WEB EPC / Dealer Portal platform, Search for vehicle models corresponding to a part reference, • Identify the quantities and characteristics of oils and fluids used for maintenance.		
Description **Theory (50%) Practice (50%)**	• Theoretical Section: • Structure of vehicle systems, components, and parts, Part number • structure and reference of TOYOTA parts, • Spare parts classification, • Parts referencing procedure on the WEB EPC / Dealer Portal platform. • Practical Section: • Use of the WEB EPC / Dealer Portal platform, • Identification of parts references on the WEB EPC / Dealer Portal platform, • Search for vehicle types associated with a part reference, • Identification of quantities and characteristics of oils.		
Target Audience	Staff from After-Sales Service and Spare Parts departments.		
Prerequisites	Access to the WEB EPC platform		
Language	French		
Equipment	A computer with internet access and valid TOYOTA credentials for catalogue access of parts.		
Documentation	Attendance sheet, Satisfaction survey, Course materials.		

TP02	DEVELOPMENT OF THE TECHNICAL SALES ARGUMENT FOR TOYOTA MAINTENANCE PARTS

Level, mode and duration	DAV	Remote	02 Days
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Strengthen the technical-commercial argument for the sale of maintenance parts. Compare genuine vs. non-genuine parts:ts de maintenance d'origine TOYOTA et les parts de contrefaites.		
Description **Theory (70%)** **Practice (30%)**	I. Filtration (Air filter, pollen filter, oil filter, diesel filter): • Presentation and role of each filter. • Maintenance intervals. • Comparison between genuine TOYOTA parts and counterfeit parts. • Consequences of non-compliance with quality or maintenance periodicity. II. Braking (Brake pads and linings): • Presentation and role of each component. • Maintenance intervals. • Comparison between genuine TOYOTA parts and counterfeit parts. • Consequences of non-compliance with quality or maintenance periodicity. III. Spark plugs: • Presentation and role. • Maintenance intervals. • Comparison between genuine TOYOTA parts and counterfeit parts. • Consequences of non-compliance with quality or maintenance periodicity. IV. Other parts (Wiper blades, belts, shock absorbers, etc.): • Presentation and role. • Maintenance intervals. • Comparison between genuine TOYOTA parts and counterfeit parts. • Consequences of non-compliance with quality or maintenance periodicity.		
Target Audience	Staff from After-Sales Service and Spare Parts departments.		
Prerequisites	None		
Language	French		
Equipment	Teaching materials (Classroom, course materials, etc.)		
Documentation	Attendance sheet, Satisfaction survey, Course materials.		

TP03	STANDARDIZATION OF PARTS DEPARTMENT PROCESSES BRANCH OWNERS (DPOK) - TOYOTA

Level, mode and duration	DPOK	In-Person	05 days
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Evaluate the organisation and monitoring of Parts Department operations in accordance with manufacturer standards (DPOK), • Formalise a storage guide for the subsidiary, • Organise warehouses and operations according to manufacturer standards (KAIZEN).		
Description : **Theory (20%)** **Practice (80%)**	• Formalisation of a storage guide for dealers: • Classification of parts, • Definition of storage, stock width and depth, • Define inflow and outflow. • Kaizen for warehouse storage: • 07 storage techniques, • Warehouse safety, • Implementation of 5S. • Special parts orders management: • Special orders monitoring methodology, • Tools to support special order monitoring. • Management of parts arrival date estimates (ETA): • ETA monitoring methodology, • Tools to support ETA monitoring. • Lost sales monitoring: Lost sales monitoring methodology, Tools to support lost sales monitoring. Simulation of evaluations according to DPOK standards: 1st practical case, 2nd practical case.		
Target Audience	Parts Department staff (Supply Chain and Commercial)		
Prerequisites	None		
Language	French		
Equipment	• Participant equipment: 1 laptop + Safety shoes + Safety vests + Helmetue • Training materials (computer, classroom, course materials)		
Documentation	Satisfaction survey, End-of-training report, Participation certificate, Course materials.		

SPC01	USE OF THE SUZUKI PARTS REFERENCING PLATFORM (SNAPON EPC)

Level, mode and duration	EPC	Remote	02 Days
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Identify customer parts references on the SNAPON EPC platform, • Search for vehicle types associated with a part reference, • Identify part characteristics based on the market code.		
Description : **Theory (50%)** **Practice (50%)**	• Theoretical Section: • Concept of vehicle systems, • components and parts, • Part number nomenclature, • Spare parts classification, • Parts referencing structure on the SNAPON EPC platform. • Practical Section: • Use of the SNAPON EPC platform, • Identification of part references on the SNAPON EPC platform, • Search for vehicle types associated with a part reference, • Identification of quantities and characteristics of oils.		
Target Audience	Staff from After-Sales Service and Spare Parts departments.		
Prerequisites	Access to the SNAPON EPC platform		
Language	French		
Equipment	A computer with internet access and valid SUZUKI credentials for catalogue accessent of parts.		
Documentation	Attendance sheet, Satisfaction survey, Participation certificate, Course materials.		

PART01	STANDARDIZATION OF PARTS DEPARTMENT PROCESSES OF SUBSIDIARIES

Level, mode and duration	PART	In-Person	05 jours
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Define the operational organisation standard for the parts department (TM01), • Audit the operational organisation of a parts department (TM02), • Develop the operational improvement plan for a parts department (TM03), • Deploy the operational improvement plan for a parts department (TM04), • Sustain new operational actions in a parts department (TM05).		
Description : **Theory (20%)** **Practice (80%)**	• **Theoretical Part:** • **Define the standard for the operational organization of the parts department (KPI):** • Define the width and depth of stock, • Identify the seven storage techniques, • Manage special orders, • Follow up on parts delivery estimate in the warehouse (ETA), • Analyze missed sales, • **Audit the operational organization of a parts department:** • Analyze stock management, • Evaluate goods and personnel safety, • Measure logistical efficiency, • Measure regulatory compliance. • **Develop the operational improvement plan for a parts department:** • Define the improvement plan actions, • Define the roles and responsibilities, • Define the improvement plan execution schedule, • Define KPIs to evaluate results. • **Deploy the operational improvement plan for a parts department:** • Execute the operational improvement plan, • Follow up on the operational improvement plan, • Analyze operational results. • **Sustain the new operational actions of a parts department:** • Mobilize stakeholders to new processes, • Communicate on new procedures and their effectiveness, • Train teams on new procedures, • Evaluate the relevance of new actions over time. • **Practical Part:** • Role-play on the five objectives of this training description sheet.		
Target Audience	Parts Department staff (Supply Chain and Commercial)		
Prerequisites	None		
Language	French		
Equipment	Training didactic materials (computer, classroom, support)		
Documentation	Satisfaction survey, End-of-training report, Participation certificate, Course materials.		

TM01	DEFINITION OF THE STANDARD FOR THE OPERATIONAL ORGANIZATION OF THE PARTS DEPARTMENT

Level, mode and duration	All Brands	Remote	01 Day
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Define the stock width and depth, • Identify the seven storage techniques, • Manage special orders, • Monitor parts delivery estimates in the warehouse (ETA), • Record lost sales,		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical Part:** • **Define the width and depth of stock:** • CFAO storage policy, • Identify storage analysis criteria, • Parts list and classification, • **Identify the seven storage techniques:** • Spatial organization of storage (racking by product type, vertical racking, others), • **Manage special orders:** • Special orders follow-up methodology, • Special orders follow-up assistance tools, • **Follow up on parts delivery estimate in the warehouse (ETA):** • ETA follow-up methodology, • ETA follow-up assistance tools, • **Record missed sales:** • Missed sales follow-up methodology, • Missed sales follow-up assistance tools. • **Practical Part:** • Calculate the width and depth of stock, • Identify the seven storage techniques, • Manage special orders, • Follow up on parts delivery estimate in the warehouse ETA, • Analyze missed sales.		
Target Audience	Staff from After-Sales Service and Spare Parts departments.		
Prerequisites	None		
Language	French		
Equipment	A computer with internet access		
Documentation	Attendance sheet, Satisfaction survey, Course materials.		

TM02	AUDIT OF THE OPERATIONAL ORGANISATION OF A PARTS DEPARTMENT

Level, mode and duration	All Brands	Remote	01 Day
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Analyse stock management, • Evaluate safety of people and property, • Measure logistics efficiency, • Measure regulatory compliance.		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical Part:** • **Analyze stock management:** • Racking signage (max load, Clear aisles, others), • Variance rate between physical and computer stock, • Parts addressing in storage, • Parts classification by movement and by value. • **Evaluate goods and personnel safety:** • Fire safety (number of extinguishers and validity, emergency exits, others), • Personal Protective Equipment (PPE), • Management of fluids and hazardous products. • **Measure logistical efficiency:** • Quality control zone at reception, • Shipping and delivery of parts in stock, • Disposal of defective or unused parts, • Examine the special orders process, • Examine ETA management. • **Measure regulatory compliance:** • Service rate, • Stock turnover, • Productivity rate, • Identify the gap between standard and actual, • Evaluate warehouse occupancy rate, • Examine missed sales. • **Practical Part:** • Analyze stock management, • Evaluate goods and personnel safety, • Measure logistical efficiency, • Measure regulatory compliance.		
Target Audience	Staff from After-Sales Service and Spare Parts departments.		
Prerequisites	None		
Language	French		
Equipment	A computer with internet access + safety shoes + safety vests		
Documentation	Attendance sheet, Satisfaction survey, Participation certificate, Course materials.		

TM03	DEVELOPMENT OF AN OPERATIONAL IMPROVEMENT PLAN FOR A PARTS DEPARTMENT

Level, mode and duration	All Brands	Remote	01 Day
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Define the actions of the improvement plan, • Determine resources, roles, and responsibilities for each stakeholder, • Define the timeline and KPIs.		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical Part:** • **Define the improvement plan actions:** • Exploit the results of the organization compliance evaluation, • Capitalize on good practices and ideas from the site and other sites, • Write the action procedures (SOPs), • Develop/Improve the spare parts storage guide for a warehouse. • **Determine the resources, roles and responsibilities of each stakeholder:** • Develop/update job descriptions of stakeholders, • Delegate execution of activities or tasks to stakeholders, • Hold stakeholders in charge of tasks accountable. • **Define the improvement plan execution schedule:** • Set the execution deadline for each task, • Identify interactions and impacts between tasks. • **Define the KPIs to evaluate the results:** • Service rate and time, • Stock coverage, • Turnover, • Provision rate (dead stock), • Special order rate. • **Practical Part:** • Define the improvement plan actions, • Define the resources, roles and responsibilities of each stakeholder, • Define the improvement plan execution schedule, • Define the KPIs to evaluate the results.		
Target Audience	Staff from After-Sales Service and Spare Parts departments.		
Prerequisites	None		
Language	French		
Equipment	A computer with internet access + safety shoes + safety vests		
Documentation	Attendance sheet, Satisfaction survey, Participation certificate, Course materials.		

TM04	DEPLOYMENT OF AN OPERATIONAL IMPROVEMENT PLAN FOR A PARTS DEPARTMENT

Level, mode and duration	All Brands	Remote	01 Day
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Execute the operational improvement plan for a parts department, • Monitor operational results of a parts department, • Analyse the operational results of a parts department.		
Description **Theory (50%)** **Practice (50%)**	• **Theoretical Part:** • **Execute the operational improvement plan of a parts department:** • Implement the tasks contained in the improvement plan (storage guide, safety plan, others), • Secure operations within parts warehouses, • Apply the 5S, • Implement the seven storage techniques. • **Follow up on the operational results of a parts department:** • Daily control of standards application (5S, safety plan, storage guide, PPE, others), • Operational team safety meetings. • **Analyze the operational results of a parts department:** • Comparison of expected standards with achieved results (customer satisfaction, order processing time, others), • Adjust the improvement plan action plans. • **Practical Part:** • Execute the operational improvement plan of a parts department, • Follow up and analyze the operational results of a parts department, • Analyze the operational results of a parts department.		
Target Audience	Staff from After-Sales Service and Spare Parts departments.		
Prerequisites	None		
Language	French		
Equipment	A computer with internet access		
Documentation	Attendance sheet, Satisfaction survey, Participation certificate, Course materials.		

TM05	SUSTAINING NEW OPERATIONAL ACTIONS IN A PARTS DEPARTMENT

Level, mode and duration	All Brands	Remote	01 Day
Trainer	**After-Sales&PART Process Trainer**		
Objectives	• Mobilise stakeholders around new processes, • Communicate on new procedures and their effectiveness, • Train teams on new proceduress, • Evaluate la pertinence des nouvelles actions dans le temps (KPI).		
Description **Theory (20%)** **Practice (80%)**	• **Theoretical Part:** • **Mobilize stakeholders to new processes:** • Improvement points of new procedures, • Elimination of human and material accident risks, • Feedback on experiences of new procedures, • Customer satisfaction. • **Communicate on new procedures and their effectiveness:** • Standardize operations, • Respect the application of storage policy, • Health and safety of goods and persons. • **Train teams on new procedures:** • Measure staff competencies, • Develop individual and collective training plans, • Deploy trainings. • **Evaluate the relevance of new actions over time:** • Measure the KPIs achieved by the parts department, • Compare expected KPIs with achieved KPIs, • Update the spare parts storage guide of a warehouse. • **Practical Part:** • Mobilize stakeholders to new processes, • Communicate on new procedures and their effectiveness, • Train teams on new procedures, • Evaluate the relevance of new actions over time (KPI).		
Target Audience	Staff from After-Sales Service and Spare Parts departments.		
Prerequisites	None		
Language	French		
Equipment	A computer with internet access		
Documentation	Attendance sheet, Satisfaction survey, Participation certificate, Course materials.
