TECHNICAL TRAINING CATALOGUE 2026

SINOTRUK

OUR COMMITMENT:

TO ASSIST YOU IN DEVELOPING THE COMPETENCE AND PERFORMANCE OF YOUR EMPLOYEES AND YOUR SERVICE.

Version of October 27, 2025

EDITO

Dear Subsidiary,

The Group Academy is pleased to present its catalogue of services for 2026 and to inform you of our commitments for all subsidiaries:

- ✓ **To support you in developing the skills and performance of your employees and your service,**
- ✓ **To support you in resolving technical problems on customer vehicles,**
- ✓ **To standardize and normalize the skill levels of the group's technicians.**

The diversity of brands deployed by CFAO is a real asset for the development of our skills development offers to subsidiaries throughout the company's territories. This diversity challenges us to ensure a high level of service quality within the after-sales service, the parts service, the sales department and the financial and legal service.

To improve the quality of your employees' services, we recommend deploying the following technical skills acquisition cycle:

- ✓ **Measure** the current skills of technicians and teams,
- ✓ **Exploit** the results to guide the skills development strategy,
- ✓ **Define** individual and collective skills development plans,
- ✓ **Acquire** new skills through face-to-face or remote trainings,
- ✓ **Certify** the new skills acquired,
- ✓ **Apply** new skills in a professional environment,
- ✓ **Perform** in a professional environment.

We also offer to **assist** you in **resolving technical problems** that you encounter in your workshops, with **technical support integrated** into the Academy.

The development of new skills is carried out by certified experts each in their areas of expertise, using innovative training methods.

Thank you for your commitment to developing the skills of your employees. We look forward to hearing from you.

Laurent GONIN

TEAM EQUIPMENT

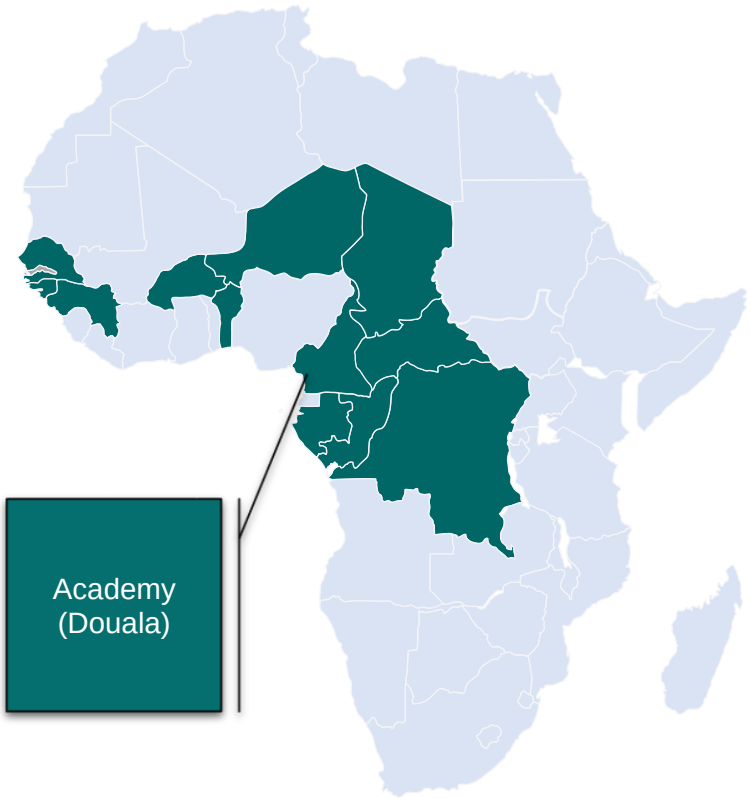

The Douala Academy for EQUIPMNET is dedicated to the **RENAULT TRUCKS, JCB, LOVOL, TOYOTA FORKLIFT, BT, FUSO, HINO, SINOTRUK, SHACMAN and KING LONG** brands and is equipped with:

- A reception and a restaurant,
- Two training rooms (board, video projector, others),
- A 200 m² workshop,
- Didactic equipment for engines, transmissions and others,
- A RENAULT TRUCKS K Range truck

Our training courses are delivered at the Douala Academy and within all our subsidiaries. We also provide training at our customers' sites. Training sessions are made up of a maximum of twelve trainees.

Training contact service:

Laurent GONIN
CFAO Training Director

André Yves BOKALLY
Training Coordinator & Project Manager

Claudia EYINGA
Training Assistant

Lucien GAGNE
Technical Trainer Expert (RENAULT TRUCKS, HINO, FUSO)

Idris NKOA
Technical Trainer Expert (TOYOTA BT, KING LONG, SINOTRUK)

Thierry KOUGHA
Technical Trainer Expert (TOYOTA FORKLIFT, JCB, LOVOL)

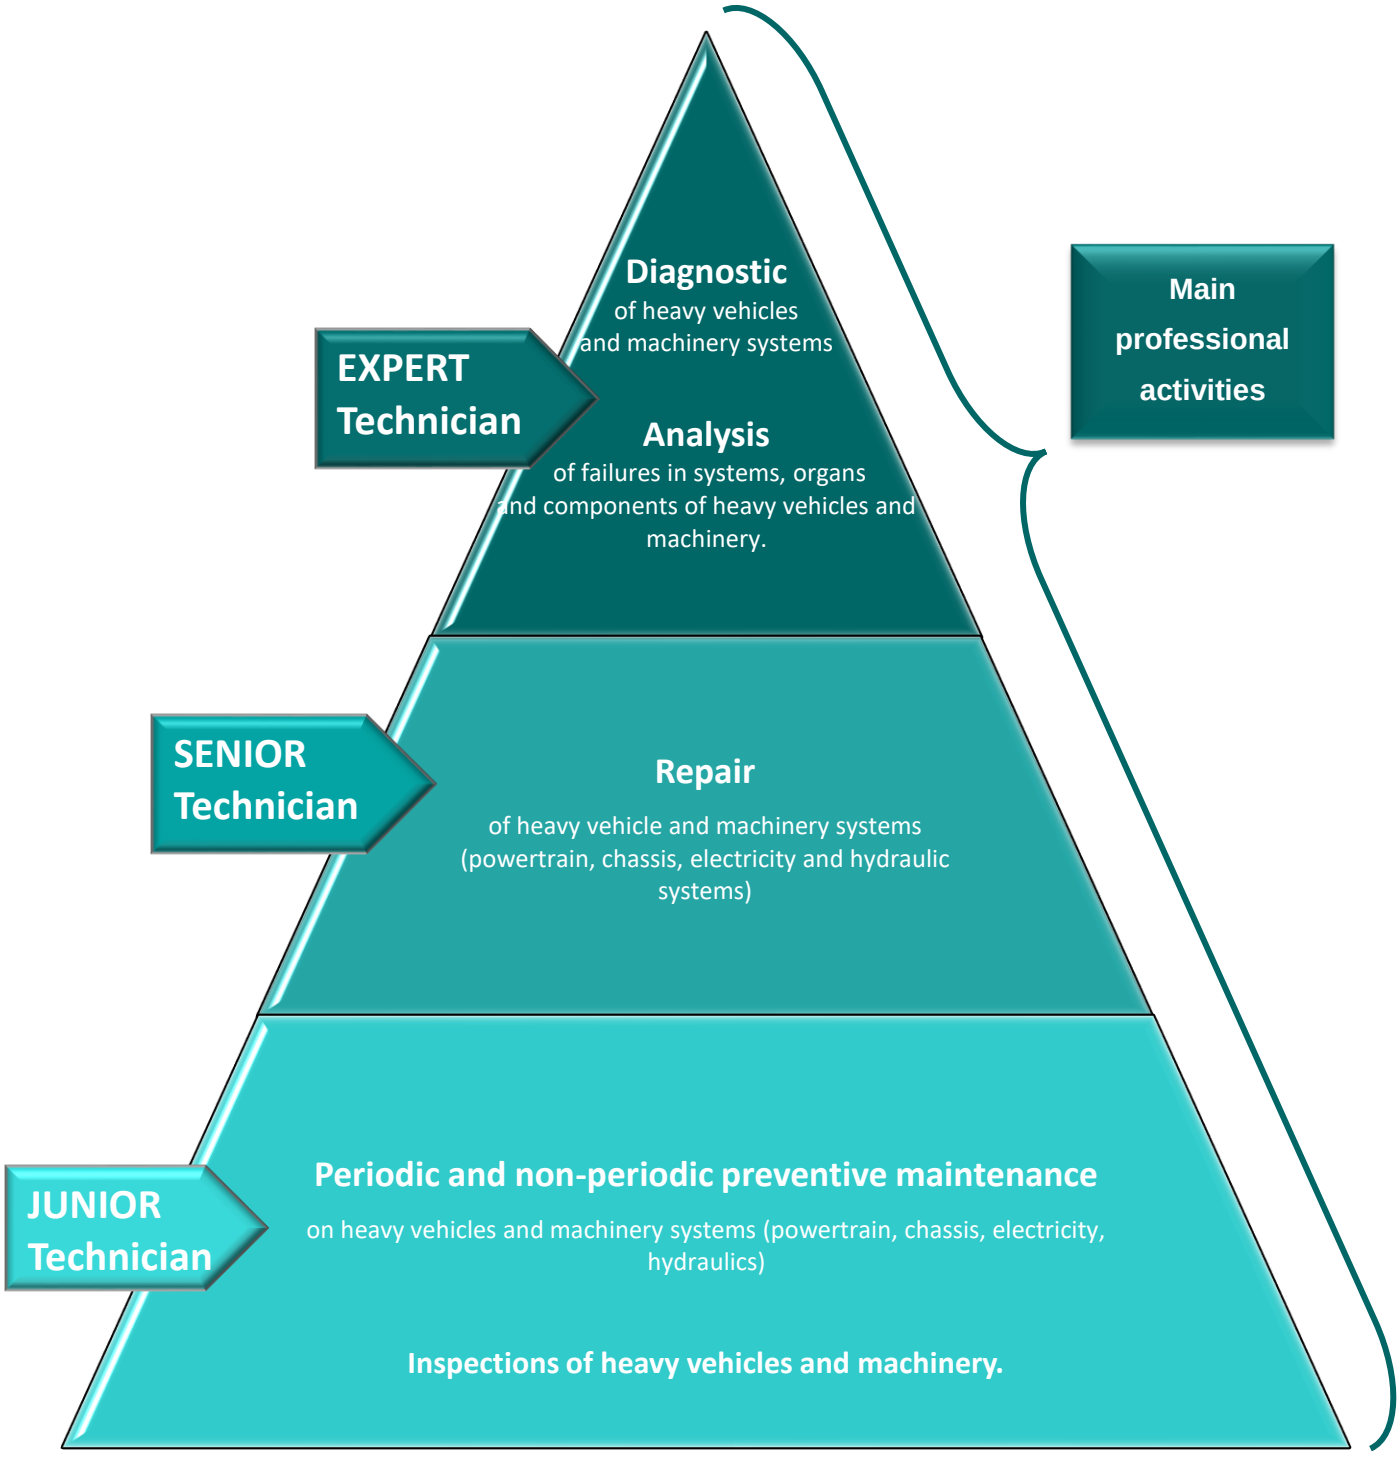

Roland NENDA
Operator Trainer
All- brands expert (Trucks and Heavy Equipment)

DEVELOPING TECHNICIANS' PROFESSIONAL EXPERTISE

SKILL LEVELS OF TECHNICIANS

TRAINING BY TECHNICIAN LEVEL

	Theoretical training (Knowledge - > E-Learning/Distance learning)		Practical training (Know-how -> Face-to-face)	
	Thematics	**Duration (days)**	**Thematics**	**Duration (days)**
EXPERT Technician	❖ The 7 stages of diagnostics applied to different trucks systems (powertrain, chassis, electricity), ❖ Features of the Diag tool	20	❖ Diagnostic of WD615 (HOHAN) Engine ❖ Diagnostic of HW19710 Gearbox ❖ Diagnostic of Electrical system ❖ Diagnostic of Conventional braking system (with ABS) ❖ Diagnostic of Drive axles and Reducers, mcy11 series	5 5 5 5 5
SENIOR Technician	❖ Technological knowledge of the various trucks systems (powertrain, chassis, electricity). ❖ Removal and refit procedure in compliance with manufacturer's recommendations, ❖ Disassembly and reassembly procedure according to manufacturer's recommendations, ❖ Procedures for checking manufacturer-compliant components.	20	❖ Repair of WD615 (HOHAN) Engine ❖ Repair of HW19710 Gearbox ❖ Repair of Electrical system ❖ Repair of Conventional braking system (with ABS) ❖ Repair of drive Axles and Reducers, mcy11 series	5 5 5 5 5
JUNIOR Technician	❖ Brand history (SINOTRUK HOHAN ranges, characteristics, etc.), ❖ Description of the bus structure and role of the different trucks systems (powertrain, chassis, electricity). ❖ Role of fluids and lubricants. ❖ Principle of use of metrology tools, ❖ Periodic and non-periodic preventive maintenance on SINOTRUK HOHAN trucks, ❖ Fundamental principles of the engine, transmission and electricity, ❖ Other.	25	❖ Preventive maintenance of HOHAN truck systems	5

CONTENTS

Page	Code	Training designation	Date	Number of days	Place
8 to 9		JUNIOR TECHNICIAN (PREVENTIVE MAINTENANCE)			
9	H01	Preventive maintenance of HOHAN Truck systems	To be defined	5 days	To be defined
10	H430	Preventive maintenance - HOHAN 430 Max range	To be defined	5 days	To be defined
11	H431	Preventive maintenance - HOWO 6X4	To be defined	5 days	To be defined
12 to 17		SENIOR TECHNICIAN (REPAIR)			
13	H02	WD615 Engine Repair	To be defined	5 days	To be defined
13	H03	Gearbox Repair HW19710	To be defined	5 days	To be defined
15	H04	Electrical System Repair	To be defined	5 days	To be defined
16	H05	Repair Conventional braking system (with ABS)	To be defined	5 days	To be defined
17	H06	Repair of Bridge and Drive Reducers, mcy11 series	To be defined	5 days	To be defined
18 to 22		EXPERT TECHNICIAN (DIAGNOSTICS)			
19	H07	WD615 Engine Diagnostics	To be defined	5 days	To be defined
20	H08	Gearbox Diagnostic HW19710	To be defined	5 days	To be defined
21	H09	Electrical System Diagnosis	To be defined	5 days	To be defined
22	H10	Conventional braking system diagnosis (with ABS)	To be defined	5 days	To be defined

JUNIOR TECHNICIAN

PREVENTIVE MAINTENANCE

H01	PREVENTIVE MAINTENANCE OF HOHAN TRUCK SYSTEMS

Level, mode & duration	JUNIOR	Face-to-face	05 Days
Trainer	**SINOTRUK Expert Trainer**		
Objectives	• **Maintain** the systems (powertrain, chassis, electricity) in operation in accordance with the manufacturer's recommendations, • **Inspect** the heavy vehicle's systems (powertrain, chassis, electricity) in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Truck ranges and their characteristics, • Description of the vehicle structure and role of the various truck systems (Powertrain, Chassis, Electricity) and their organs, • Role of fluids and lubricants, • Principle of use of metrology tools, • The different types of maintenance applied to HOHAN trucks and maintenance periods in compliance with the manufacturer's recommendations, • Periodic and non-periodic preventive maintenance of systems and components in compliance with the manufacturer's recommendations. ► **Practical part:** • Replacing oils and fluids (Engine, Gearbox, drive axles, other). • Replenish oils and fluids (Engine, Gearbox, drive axles, other). • Remove and refit components (belt and accessories, pads or gaskets, etc.) in accordance with the manufacturer's recommendations. • Check that components comply with the manufacturer's recommendations (dimensions, flatness, voltage, current, etc.) before reassembly. • Visually inspect the truck's systems. ► **Evaluation part:** • Initial Test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills)		
Target audience	Operational technicians in preventive maintenance		
Pre-requisites	Trained in basic mechanics and electricity		
Language	French		
Equipment	Fully-equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

H430	PREVENTIVE MAINTENANCE - HOHAN 430 MAX RANGE

Level, Mode and Duration	JUNIOR	Face-to-face	05 Days
Animator	SINOTRUK Expert Trainer		
Goals	• **Maintain** the systems (powertrain, chassis, electricity) in operation according to the manufacturer's recommendations, • **Inspect** the systems (engine, chassis, electricity) of the heavy goods vehicle according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • 430 MAX truck ranges and their features, • Description of the vehicle structure and role of the different truck systems (Powertrain, Chassis, Electricity) and their components, • Roles of liquids and lubricants, • Principle of use of metrology tools, • The different types of maintenance applied to HOHAN trucks and maintenance periods in accordance with the manufacturer, • Periodic and non-periodic preventive maintenance of systems and components in accordance with the manufacturer. ► **Practical Part:** • Replace oils and fluids (Engine, Gearbox, Axles, Others). • Top up oils and fluids (Engine, Gearbox, Axles, Others) • Remove and replace the components (belt and accessories, pads or linings, etc.) according to the manufacturer's recommendations. • Check the conformity of the components (dimensional, flatness, voltage, intensity, etc.) to the manufacturer's expectations before reassembling them. • Visually inspect the truck's systems. ► **Part Assessment :** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	Have completed training in basic mechanics and electricity		
Language	French		
Equipment	Equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Certificate of participation.		
Date and Place	To be defined		To be defined

H431	PREVENTIVE MAINTENANCE - HOWO 6X4

Level, Mode and Duration	JUNIOR	Face-to-face	05 Days
Animator	**SINOTRUK Expert Trainer**		
Goals	• **Maintain** the systems (powertrain, chassis, electricity) in operation according to the manufacturer's recommendations, • **Inspect** the systems (engine, chassis, electricity) of the heavy goods vehicle according to the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical Part:** • HOWO 6X4 truck ranges and their features, • Description of the vehicle structure and role of the different truck systems (Powertrain, Chassis, Electricity) and their components, • Roles of liquids and lubricants, • Principle of use of metrology tools, • The different types of maintenance applied to HOHAN trucks and maintenance periods in accordance with the manufacturer, • Periodic and non-periodic preventive maintenance of systems and components in accordance with the manufacturer. ► **Practical Part:** • Replace oils and fluids (Engine, Gearbox, Axles, Others). • Top up oils and fluids (Engine, Gearbox, Axles, Others) • Remove and replace the components (belt and accessories, pads or linings, etc.) according to the manufacturer's recommendations. • Check the conformity of the components (dimensional, flatness, voltage, intensity, etc.) to the manufacturer's expectations before reassembling them. • Visually inspect the truck's systems. ► **Part Assessment :** • Initial Test (Prerequisite Assessment) • Final Test (Assessment of Acquired Skills)		
Target audience	Operational technicians in preventive maintenance		
Prerequisites	Have completed training in basic mechanics and electricity		
Language	French		
Equipment	Equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Certificate of participation.		
Date and Place	To be defined		To be defined

SENIOR TECHNICIAN

REPAIR

Drive axle, MCY11 Series

H02	REPAIR OF WD615 ENGINE

Level, mode & duration	SENIOR	Face-to-face	05 Days
Trainer	**SINOTRUK Expert Trainer**		
Objectives	• **Remove** and **refit** the WD615 engine in accordance with the manufacturer's recommendations, • **Disassemble** and **reassemble** the WD615 engine in accordance with the manufacturer's recommendations, • **Check** that the WD615 engine components comply with the manufacturer's recommendations, • **Test** and **adjust** the WD615 engine in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and operation of the WD615 engine, • Description of the lubrication and cooling systems, • Description of the injection system, • Description of the electronic engine management system, • Removal and refitting procedure according to the manufacturer's recommendations, • Procedure for disassembly and reassembly in accordance with the manufacturer's recommendations, • Component check procedure in accordance with the manufacturer's recommendations. ► **Practical part:** • Remove the WD615 engine according to the manufacturer's recommendations, • Disassemble the WD615 engine according to the manufacturer's recommendations, • Clean the components of the WD615 engine, • Check that the components conform to the manufacturer's recommendations, • Replace components which do not comply with the manufacturer's recommendations, • Reassemble the engine components in accordance with the manufacturer's recommendations, • Refit the engine on the truck in accordance with the manufacturer's recommendations, • Test and adjust the engine on the truck. ► **Evaluation part:** • Initial test (Assessment of Pre-requisites). • Final Test (Assessment of Acquired skills).		
Target audience	Technician carrying out repair		
Pre-requisites	Have acquired the skills of a JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Fully-equipped training room and workshop, WD615 engine on bench, adapted vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

H03	REPAIR OF HW19710 GEARBOX

Level, mode & duration	SENIOR	Face-to-face	05 Days
Trainer	**SINOTRUK Expert Trainer**		
Objectives	• **Remove** and **refit** the HW19710 gearbox in accordance with the manufacturer's recommendations, • **Disassemble** and **reassemble** the HW19710 gearbox in accordance with the manufacturer's recommendations, • **Check** that the components of gearbox HW19710 comply with the manufacturer's recommendations, • **Test** and **adjust** the HW19710 gearbox in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and operation of the HW19710 gearbox, • Removal and refit procedure following the manufacturer's recommendations, • Disassembly and reassembly procedure according to manufacturer's recommendations, • Component check procedure in accordance with the manufacturer's recommendations. ► **Practical part:** • Remove the HW19710 gearbox according to the manufacturer's recommendations, • Disassemble the HW19710 gearbox according to the manufacturer's recommendations, • Clean the components of the HW19710 gearbox, • Check that the components comply with the manufacturer's recommendations, • Replace components which do not comply with the manufacturer's recommendations, • Reassemble the gearbox components following the manufacturer's recommendations, • Refit the HW19710 gearbox on the truck in accordance with the manufacturer's recommendations, • Test and adjust the HW19710 gearbox on the truck. ► **Evaluation part:** • Initial Test (Assessment of Pre-requisites). • Final Test (Assessment of Acquired skills).		
Target audience	Technician carrying out repair		
Pre-requisites	Have acquired the skills of a JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Fully-equipped training room and workshop, gearbox HW19710 on bench, suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

H04	REPAIR OF ELECTRICAL SYSTEMS

Level, mode & duration	SENIOR	Face-to-face	05 Days
Trainer	**SINOTRUK Expert Trainer**		
Objectives	• **Remove** and **refit** electrical system components (starter, charging, air conditioning and lighting circuits, etc.) following the manufacturer's recommendations, • **Disassemble** and **reassemble** electrical system components in accordance with the manufacturer's recommendations, • **Check** that electrical component (fuses, relays, starters, alternators, etc.) comply with the manufacturer's recommendations, • **Test** and **adjust** electrical circuits in accordance with the manufacturer's recommendations.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Reminder of the principles of electricity and electronics, • Description and operation of the electrical system and its various circuits (starting circuit, charging circuit, air conditioning circuit, lighting circuit, ...). • Procedure for checking electrical components and parts in accordance with the manufacturer's recommendations, ► **Practical part:** • Remove and refit electrical circuit components in accordance with the manufacturer's recommendations, • Disassemble and reassemble the vehicle's electrical components in accordance with the manufacturer's recommendations, • Clean the electrical circuit components and parts, • Check that electrical component (fuses, relays, starters, alternators, etc.) comply with the manufacturer's recommendations, • Replace components which do not comply with the manufacturer's recommendations, • Test and adjust the component in the vehicle's electrical circuit. ► **Evaluation part:** • Initial test (Assessment of Pre-requisites). • Final Test (Assessment of Acquired skills).		
Target audience	Technician carrying out repair		
Pre-requisites	Have acquired the skills of a JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Fully-equipped training room and workshop, starter, alternator, suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

H05	REPAIR OF CONVENTIONAL BRAKING SYSTEM (with ABS)

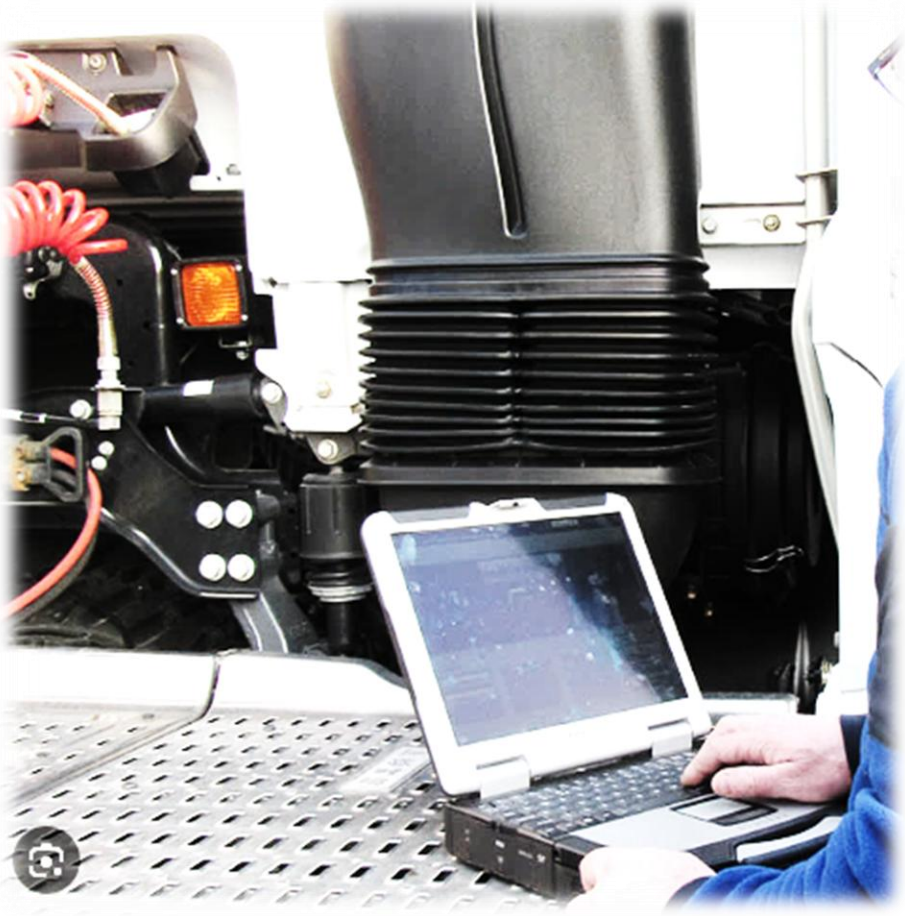

Level, mode & duration	SENIOR	Face-to-face	05 Days
Trainer	**SINOTRUK Expert Trainer**		
Objectives	• **Remove** and **refit** the drum brake mechanism in accordance with the manufacturer's recommendations, • **Disassemble** and **reassemble** the drum brake mechanism in accordance with the manufacturer's recommendations, • **Check** that the drum brake components comply with the manufacturer's recommendations, • **Test** and **adjust** mechanical S-cam brakes in accordance with the manufacturer's recommendations,		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and operation of the conventional braking system (mechanical and pneumatic) and brake types, • Description and operation of the S-cam brake, • Removal and refit procedure of the S-cam brake in accordance with the manufacturer's recommendations, • Disassembly and reassembly procedure of the S-cam brake in accordance with the manufacturer's recommendations, • Procedure for checking S cam brake components in accordance with the manufacturer's recommendations. ► **Practical part:** • Remove and refit a relay valve in accordance with the manufacturer's recommendations, • Disassemble and reassemble the park brake relay valve in accordance with the manufacturer's recommendations, • Remove the S-cam brake mechanism in accordance with the manufacturer's recommendations, • Disassemble the S-cam brake mechanism in accordance with the manufacturer's recommendations, • Clean the components of the S-cam brake mechanism, • Check that the components comply with the manufacturer's recommendations, • Replace components that do not comply with the manufacturer's recommendations, • Reassemble the components of the mechanical S-cam brake in accordance with the manufacturer's recommendations, • Refit the S-cam brake mechanism in accordance with the manufacturer's recommendations, • Test and adjust the S-cam brake. ► **Evaluation part:** • Initial test (Assessment of Pre-requisites). • Final Test (Assessment of Acquired skills)		
Target audience	Technician carrying out repair		
Pre-requisites	Have acquired the skills of a JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Fully-equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

H06	REPAIR OF DRIVE AXLES AND REDUCERS, MCY11 SERIES

Level, mode & duration	SENIOR	Face-to-face	05 Days
Trainer	**SINOTRUK Expert Trainer**		
Objectives	• **Remove** and **refit** the axle and wheel reduction units in accordance with the manufacturer's recommendations, • **Disassemble** and **reassemble** the vehicle's axle and wheel reduction units in accordance with the manufacturer's recommendations, • **Check** that the components (axle and reduction gears) comply with the manufacturer's recommendations, • **Test** and **adjust** the components of the axle and wheel reducers in accordance with the manufacturer's recommendations.		
Description Théorie (40%) Pratique (60%)	► **Theoretical part:** • Description and operation of the axle and reducers, MCY11 series, • Procedure for removing and refitting the axle and reducers, MCY11 series following the manufacturer's recommendations, • Disassembly and reassembly procedure of the axle and gearboxes, MCY11 series, in accordance with the manufacturer's recommendations, • Procedure for checking the components of the axle and reducers, MCY11 series in accordance with the manufacturer's recommendations. ► **Practical part:** • Remove the axle and reducers mechanism, MCY11 series according to the manufacturer's recommendations, • Disassemble the axle and gearbox mechanism, MCY11 series according to the manufacturer's recommendations, • Clean the components of the axle and reducers mechanism, • Check that the components of the axle and reducers mechanism, MCY11 series, comply with the manufacturer's recommendations, • Replace components which do not comply with the manufacturer's recommendations, • Reassemble the axle and reducers mechanism components, MCY11 series, in accordance with the manufacturer's recommendations, • Refit the axle and reducers mechanism, MCY11 series, in accordance with the manufacturer's recommendations, • Test and adjust the axle and reducers mechanism, MCY11 series. ► **Evaluation part:** • Initial test (Assessment of Pre-requisites). • Final Test (Assessment of Acquired skills)		
Target audience	Technician carrying out repair		
Pre-requisites	Have acquired the skills of a JUNIOR Technician (Preventive Maintenance)		
Language	French		
Equipment	Fully-equipped training room and workshop, suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

EXPERT TECHNICIAN

DIAGNOSTIC

H07	DIAGNOSTIC OF WD615 ENGINE

Level, mode & duration	EXPERT	Face-to-face	05 Days
Trainer	**SINOTRUK Expert Trainer**		
Objectives	• **Diagnose** faults relating to the WD615 engine, • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Reminder of the description of the injection system, and the electronic management of the engine, • Malfunctions of WD615 engine components, • Diagnostic steps and function of the Diag tool. ► **Practical part:** 1. Collect the various symptoms of the malfunction/fault and the truck's breakdown and repair history (Customer and Diag tool), 2. Hypothesize the cause of the machine malfunction/fault, 3. Test or check that the systems and components of the WD615 engine comply with the manufacturer's recommendations, 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Elaborate a list of components to be replaced or repaired, 6. Repair the faulty component or organ, 7. Test and adjust the system to be repaired. ► **Evaluation part:** • Initial test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills).		
Target audience	Technicians carrying out diagnostic		
Pre-requisites	Have acquired the skills of a SENIOR Technician (Repair)		
Language	English - French		
Equipment	Fully-equipped training room and workshop, WD615 engine on bench, Diagnostic tool, adapted vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

H08	DIAGNOSTIC OF HW19710 GEARBOX

Level, mode & duration	EXPERT	Face-to-face	05 Days
Trainer	**SINOTRUK Expert Trainer**		
Objectives	• **Diagnose** faults relating to the HW19710 gearbox, • **Recommend** repair action.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Reminder of the description and operation of the HW19710 gearbox, • The malfunctions of the HW19710 gearbox components, • Diagnostic steps and function of the Diag tool. ► **Practical part:** 1. Collect the various symptoms of the malfunction/fault and the truck's breakdown and repair history, 2. Hypothesize the cause of the malfunction/fault, 3. Test or check that the systems and components of the HW19710 gearbox comply with the manufacturer's recommendations, 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Elaborate a list of components to be replaced or repaired, 6. Repair the faulty component or organ, 7. Test and adjust the system involved in the truck repair. ► **Evaluation part:** • Initial test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills).		
Target audience	Technicians carrying out diagnostic		
Pre-requisites	Have acquired the skills of a SENIOR Technician (Repair)		
Language	French		
Equipment	Fully-equipped training room and workshop, HW19710 gearbox on bench, Diag tool, suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

H09	DIAGNOSTICS OF ELECTRICAL SYSTEMS

Level, mode & duration	EXPERT	Face-to-face	05 Days
Trainer	**SINOTRUK Expert Trainer**		
Objectives	• **Diagnose** faults in the electrical and electronic systems, • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Description and operation of the electronic/electrical architecture, • Description and function of the electronic architecture modules, • Electrical system malfunctions (starting, charging, air conditioning, and lighting circuits, ...), and electronic modules, • Diagnostic steps and function of the Diag tool. ► **Practical part:** 1. Collect the various symptoms of the malfunction/fault and truck's breakdown and repair history (Customer and Diag tool), 2. Hypothesize the cause of the malfunction/fault, 3. Test or check the conformity of the system and component in accordance with the manufacturer's recommendations, 4. Identify the most likely hypothesis based on the tests and symptoms, 5. Elaborate a list of components to be replaced or repaired, 6. Repair the faulty component or organ, 7. Test and adjust the system to be repaired. ► **Evaluation part:** • Initial test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills)		
Target audience	Technicians carrying out diagnostic		
Pre-requisites	Have acquired the skills of a SENIOR Technician (Repair)		
Language	French		
Equipment	Fully-equipped training room and workshop, Diag tool, adapted vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

H10	DIAGNOSTIC OF CONVENTIONAL BRAKING SYSTEM (with ABS)

Level, mode & duration	EXPERT	Face-to-face	05 Days
Trainer	**SINOTRUK Expert Trainer**		
Objectives	• **Diagnose** faults relating to the conventional braking system • **Recommend** repair actions.		
Description Theory (40%) Practical (60%)	► **Theoretical part:** • Reminder of the description and operation of conventional braking system components, • The malfunctions of conventional braking system components, • Diagnostic stages and function of the Diag tool. ► **Practical part:** • Collect the various symptoms of the malfunction/fault and the truck's breakdown and repair history (Customer and Diag tool), • Hypothesize the cause of the malfunction/fault, • Test or check the compliance of the conventional braking system and components with the manufacturer's recommendations, • Identify the most likely hypothesis based on the tests and symptoms, • Elaborate a list of components to be replaced or repaired, • Repair the faulty component, • Test and adjust the system to be repaired. ► **Evaluation part:** • Initial test (Assessment of Pre-requisites) • Final Test (Assessment of Acquired skills).		
Target audience	Technicians carrying out diagnostic		
Pre-requisites	Have acquired the skills of a SENIOR Technician (Repair)		
Language	French		
Equipment	Fully-equipped training room and workshop, Diag tool, adapted vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.
