SERVICE & PARTS TRAINING CATALOGUE MOTORS 2026

SUZUKI

OUR COMMITMENT:

TO ASSIST YOU IN DEVELOPING THE COMPETENCE AND PERFORMANCE OF YOUR EMPLOYEES AND YOUR SERVICE.

Version of September 27, 2025

EDITO

Dear Subsidiary,

The Group Academy is pleased to present its catalogue of services for 2026 and to inform you of our commitments for all subsidiaries:

- ✓ **To support you in developing the skills and performance of your employees and your service,**
- ✓ **To support you in resolving technical problems on customer vehicles,**
- ✓ **To standardize and normalize the skill levels of the group's technicians.**

The diversity of brands deployed by CFAO is a real asset for the development of our skills development offers to subsidiaries throughout the company's territories. This diversity challenges us to ensure a high level of service quality within the after-sales service, the parts service, the sales department and the financial and legal service.

To improve the quality of your employees' services, we recommend deploying the following technical skills acquisition cycle:

- ✓ **Measure** the current skills of technicians and teams,
- ✓ **Exploit** the results to guide the skills development strategy,
- ✓ **Define** individual and collective skills development plans,
- ✓ **Acquire** new skills through face-to-face or remote trainings,
- ✓ **Certify** the new skills acquired,
- ✓ **Apply** new skills in a professional environment,
- ✓ **Perform** in a professional environment.

We also offer to **assist** you in **resolving technical problems** that you encounter in your workshops, with **technical support integrated** into the Academy.

The development of new skills is carried out by certified experts each in their areas of expertise, using innovative training methods.

Thank you for your commitment to developing the skills of your employees. We look forward to hearing from you.

Laurent GONIN

TEAM MOTORS

The Douala Academy for MOTORS is dedicated to the **TOYOTA**, **SUZUKI, BYD, MERCEDES, MITSUBISHI, OMODA&JAECOO, PEUGEOT** and **CITROEN** brands and is equipped with:

- A reception and restaurant,
- Three training rooms (blackboard, video projector, etc.),
- A 400 M² workshop,
- Engine, transmission and other didactic equipment,
- Eight véhicules,
- A parts store.

Our training courses are delivered at the Douala Academy and within all our subsidiaries. We also provide training at our customers' sites. Training sessions are made up of a maximum of twelve trainees.

Training service contact:

cfaoacademydouala@cfao.com

Tel : 00 237 655 174 674

Laurent GONIN
Director of CFAO training

André Yves BOKALLY
Training Coordinator & Project Manager

Claudia EYINGA
Training Assistant

Cédric PAKO
SUZUKI Trainer and Expert Support Technician

Eugène EBENE
TOYOTA Trainer and Expert Support Technician

Damas NGUE LAH
TOYOTA Trainer and Expert Support Technician

Brice NECHI
STELLANTIS Trainer and Expert Support Technician

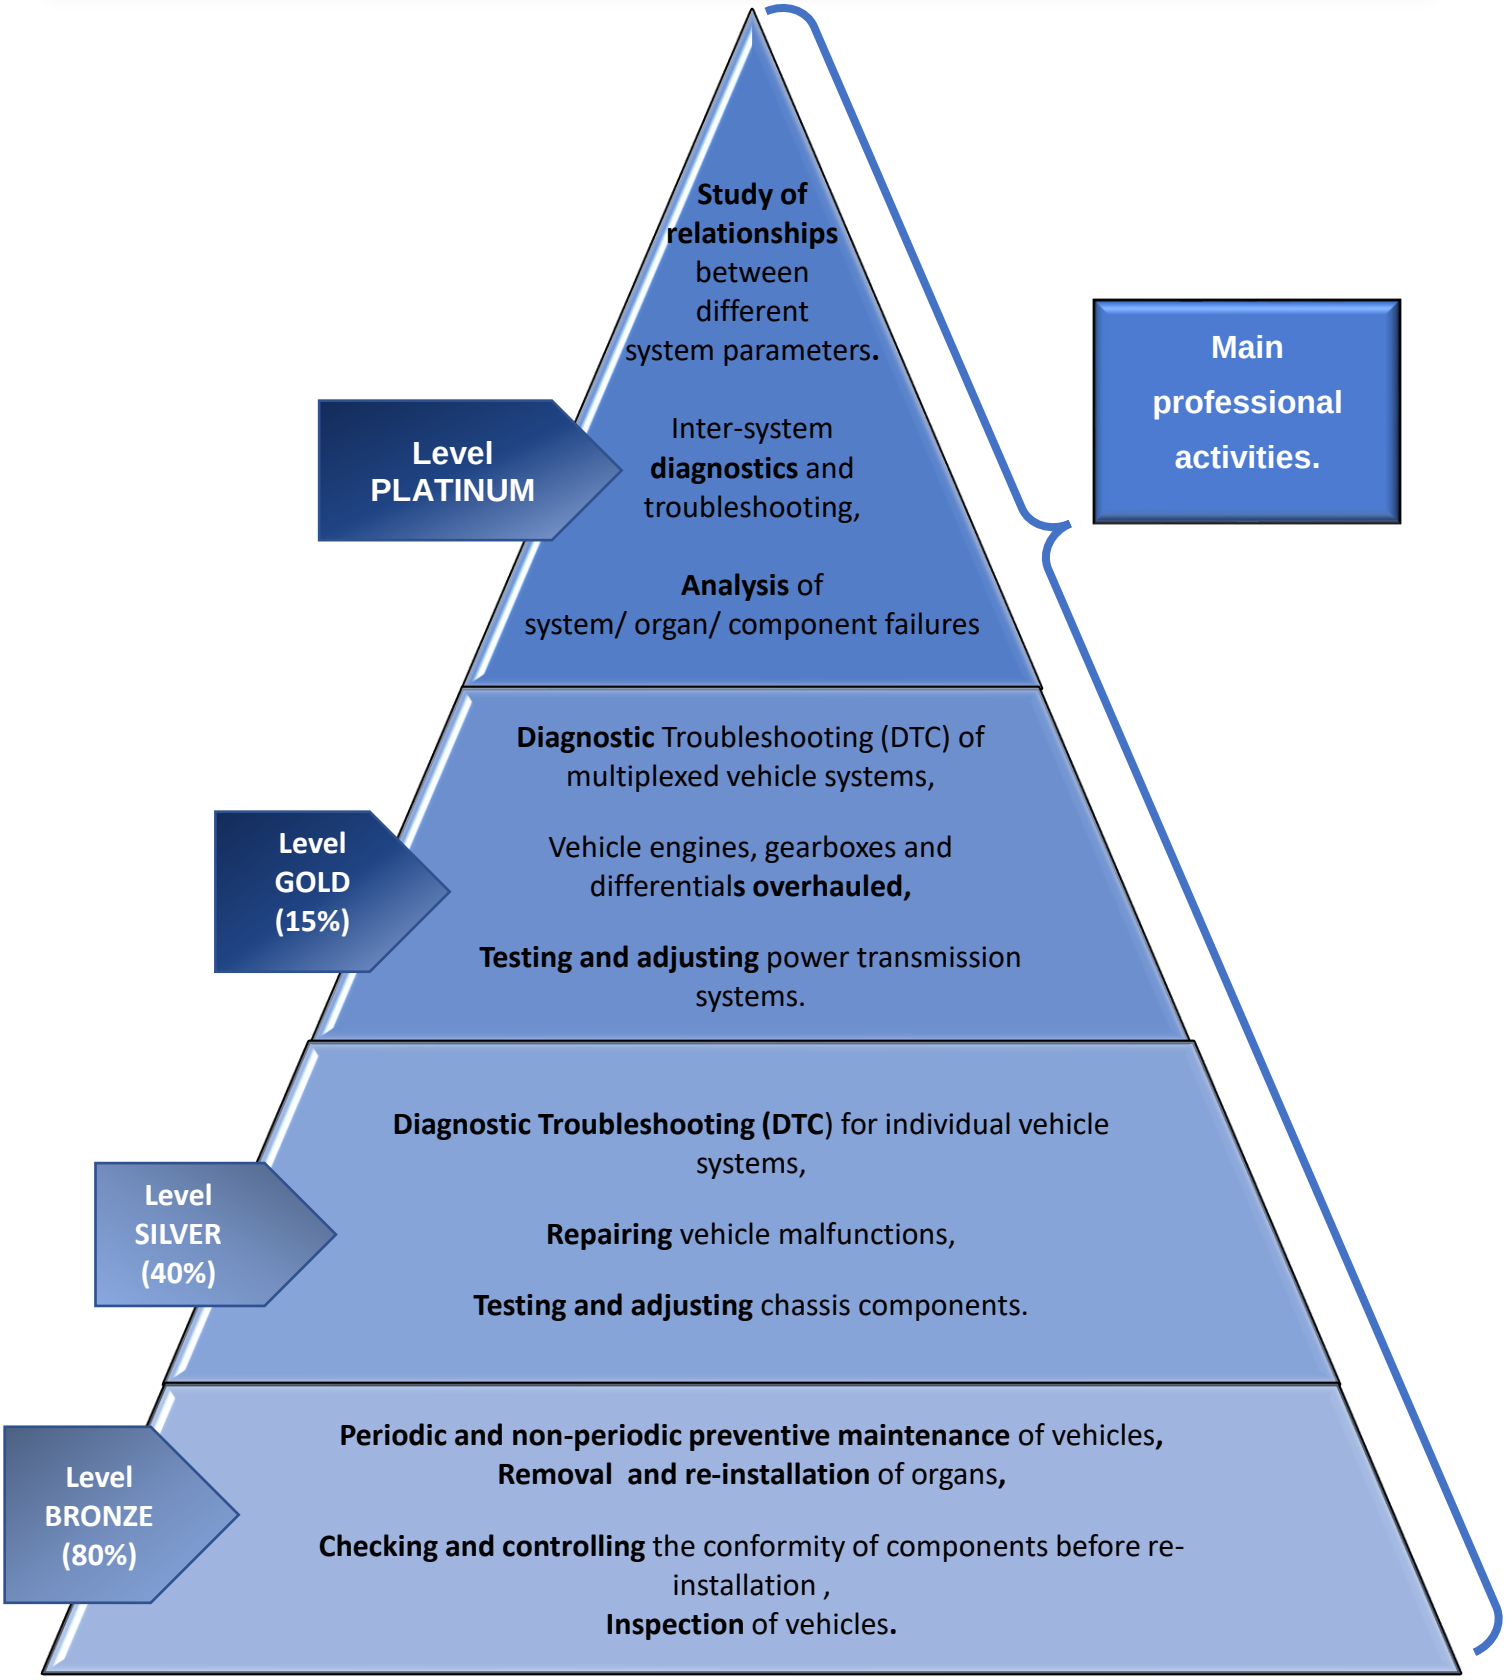

Gérold SADIO
Process SAV and Parts Trainer

Bomba COULIBALY (RCI)
MITSUBISHI Trainer and Expert Support Technician

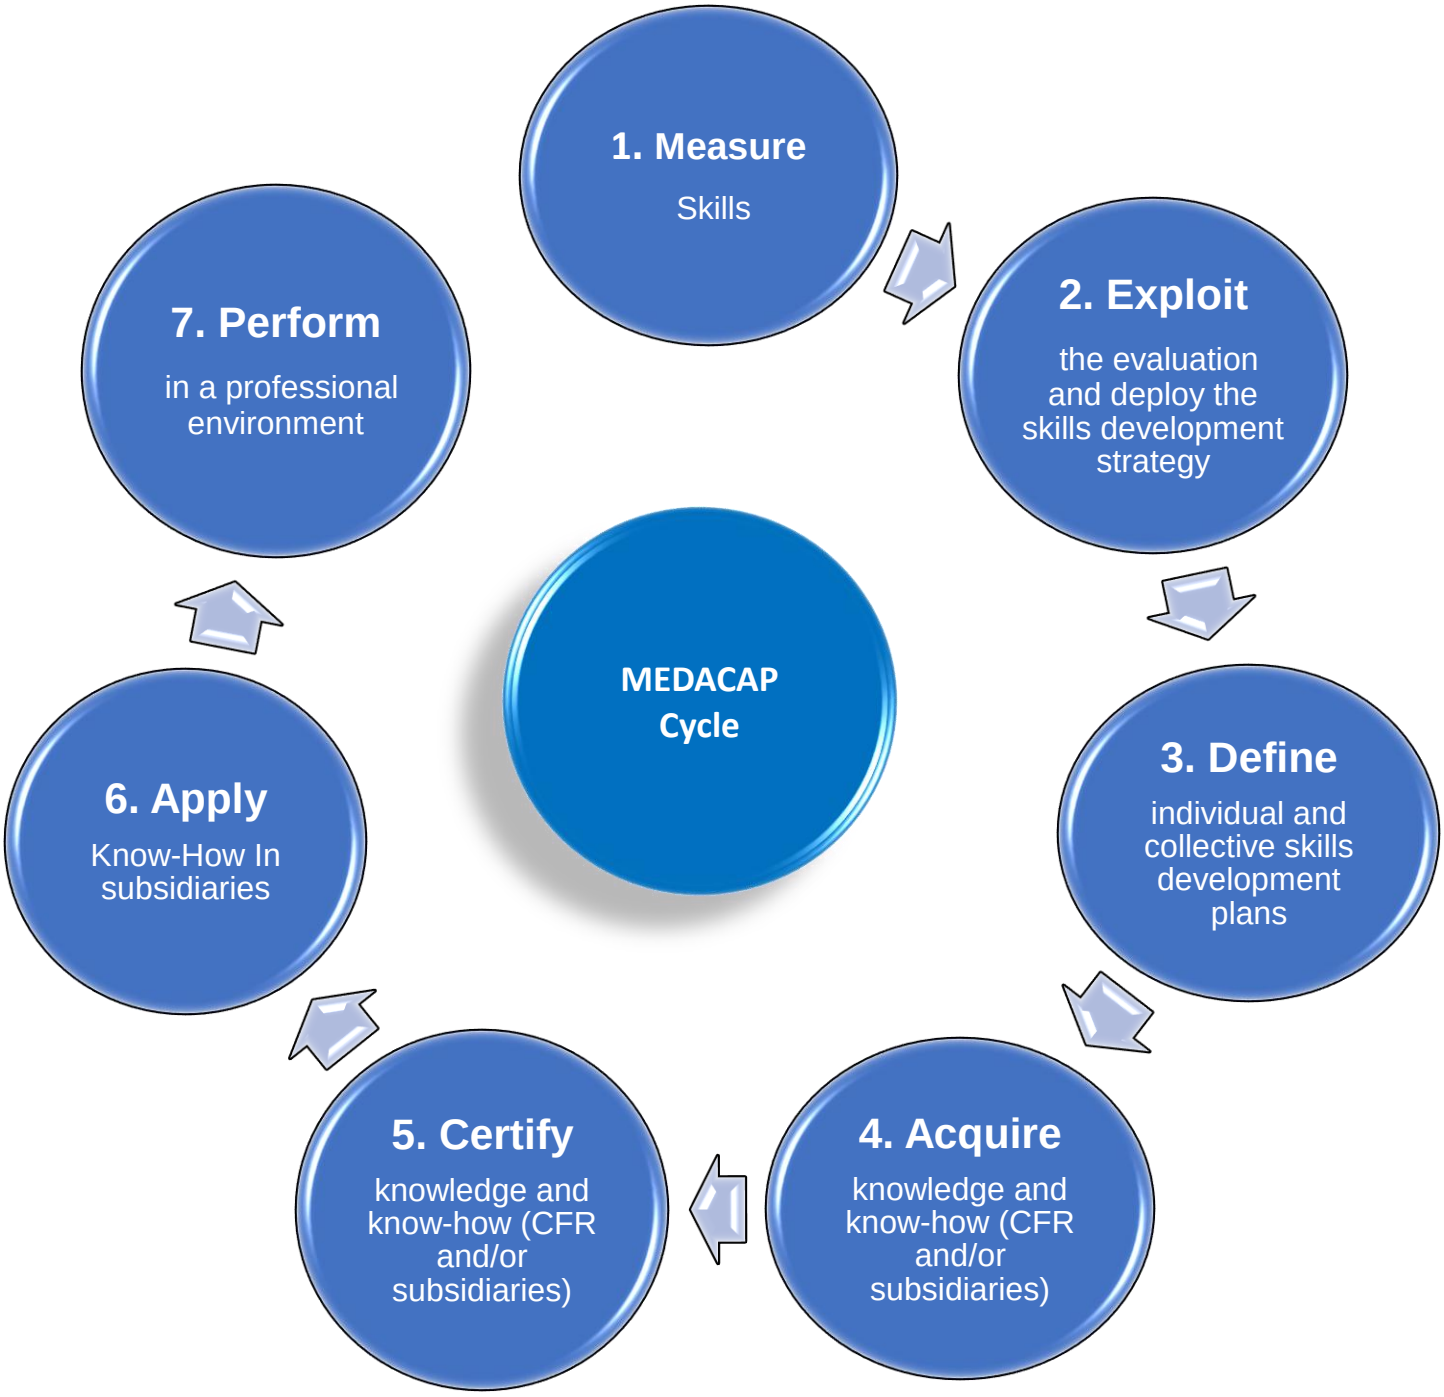

TECHNICIAN SKILL LEVELS

TRAINING BY TECHNICIAN LEVEL

Training level	Online training courses (Knowledge)	Face-to-Face training courses and certifications (know-how)	Duration (days)
PLATINUM	• Study of the mutual relationships between different system parameters. • DTC-free diagnosis by integrating data from all systems. • Other online courses.	✓ **Diagnosis** of interactions between different vehicle technologies (engine, chassis and electrical/electronic). ✓ **Analysis** of vehicle Component / Organ failures, ✓ **Manufacturer's certification** in Diagnosis of interactions between different technologies	05 05 05
Gold	• System diagnostics with DTC, • Study of overall vehicle system control, • Overhaul/repair of powertrain systems, • Study and multiplexing system, • Other online courses	✓ **Diagnosis** of vehicle Multiplexing ✓ **Overhaul** of vehicle petrol engines, ✓ **Overhaul** of vehicle gearboxes, transfer cases and differentials ✓ **Certification** in overhaul and diagnosis of vehicle power transmission systems	05 05 05 05
Silver	• Study and diagnosis of various vehicle organs and components (motorization, transmission, braking, steering, etc.), • -Overhaul/repair of chassis organs, • - Other online courses.	✓ **Diagnosis** of mechanical, electrical and electronic vehicle systems. ✓ **Repair** of vehicle mechanical, electrical and electronic systems. ✓ **Diagnosis** of on-board vehicle systems (Advance) ✓ **Certification** in Diagnostics and Repair of mechanical, electrical and electronic vehicle systems.	05 05 05 05
Bronze	• Study of overall vehicle systems, • Study of overall workshop processes and preventive maintenance operations, • Study of maintenance principles, • Notion of electricity and electronics, • Other online courses.	✓ Periodic and non-periodic preventive **maintenance** of SUZUKI vehicles, ✓ **Certification** in Periodic and non-periodic preventive maintenance for SUZUKI vehicles.	05 05

DEVELOPING THE PROFESSIONAL EXPERTISE OF TECHNICIANS

7	SERVICE	SS01 - BRONZE	Periodic and non-periodic preventive maintenance of SUZUKI vehicles		
8		SS02 - BRONZE	**BRONZE Certification:** Periodic and non-periodic preventive maintenance of SUZUKI vehicles		
9		SS03 - SILVER	Diagnosis of on-board vehicle systems (Advance Training)		
10		SS04 - SILVER	Repair of mechanical, electrical and electronic systems		
11		SS05 - SILVER	**SILVER Certification**: Diagnosis and repair of mechanical, electrical and electronic systems		
12		SS06-GOLD	Diagnosis of the vehicle multiplexing system		
13		SS07 - GOLD	Overhaul of petrol engine		
14		SS08 - GOLD	Overhaul of vehicle gearbox, transfer box and differential		
15		SS09 - GOLD	**GOLD Certification:** Overhaul and Diagnosis of engine, and vehicle powertrain systems		
16		SS-DIAG-01	Using the Diagnostic Tool (SDT-II)		
17		SNM01	The New "GRAND VITARA" Model and Its Technical Specifications.		
18		SNM02	The New "S-PRESSO" Model and Its Technical Specifications.		

SS01 -BRONZE	PERIODIC AND NON-PERIODIC PREVENTIVE MAINTENANCE OF SUZUKI VEHICLES

Level, mode & duration	BRONZE	Face-to-Face	05 days
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Maintain** operational systems (powertrain, chassis, electrical) in accordance with the manufacturer's recommendations, • **Inspect** systems (powertrain, chassis, electrical) in accordance with the manufacturer's recommendations, • **Check-in** SUZUKI customer vehicles.		
Description: **Theory (30%)** **Practical (70%)**	► **Theoretical part :** • History, values and organization of SUZUKI after-sales service, • Principles of SUZUKI vehicle acceptance, • Description of the vehicle's structure and the roles of the various systems, organs and components, • The role of fluids and lubricants, • Different types of maintenance (preventive, curative, others), • Principles of using metrology tools, • Control and inspection procedures, • Precautions to be taken during periodic maintenance operations, ► **Practical part :** • Replace oils and fluids (engine, gearbox, axles, others), • Replenish oils and fluids (engine, gearbox, other), • Removal and re-installation of organs (filters, belts and accessories, brake pads or trims, etc.) in accordance with the manufacturer's recommendations, • Check component conformity (dimensions, voltage, current, etc.) in accordance with the manufacturer's recommendations, • Inspect systems (motorization, chassis, electrical) with the assistance of the SDT-II tool: • Identify vehicle fault codes (DTCs) using the SDT-II tool, • Perform active tests on electronic components using SDT-II.		
Target audience	Workshop technician carrying out preventive maintenance operations		
Prerequisites	E-Learning training with a 100% success rate at BASIC and BRONZE levels		
Language	French		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measuring tools, SDT-II diagnostic kit and Consumables.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

SS02-BRONZE	BRONZE CERTIFICATION: PERIODIC AND NON-PERIODIC PREVENTIVE MAINTENANCE OF SUZUKI VEHICLES

Level, mode & duration	BRONZE	Face-to-Face	05 days
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Evaluate** technical skills in periodic and non-periodic preventive maintenance operations, • **Certify** technicians who have validated periodic and non-periodic preventive maintenance operations.		
Description: **Theory (5%)** **Practical (95%)**	► **Theoretical evaluation themes :** • Powertrain system (fuel, lubrication, ignition, cooling system, etc.), • Chassis system (Clutch, steering, brake, suspension, vehicle movement), • Electrical systems (starting, charging, wiring, HVAC), • Workshop organization (Activities, Advisor, ...). ► **Practical evaluation themes :** • Inspect vehicles, • Removal and re-installation of components (filters, brake pads, etc.), • Check conformity of components before reassembling, • Change circuit fluids/oil. ► **Certification des techniciens ayant validé les évaluations.**		
Target audience	Non-certified Suzuki technicians		
Prerequisites	Completion of the Face-to-Face SSQS Bronze SS01 certification training course		
Language	French / English		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measurement tools, SDT-II diagnostic kit and Consumables.		
Documentation	Training materials + animation videos		

SS03-SILVER	DIAGNOSIS OF ON-BOARD VEHICLE SYSTEMS (ADVANCE TRAINING)

Level, mode & duration	SILVER	Face-to-Face	05 days
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Diagnosis** of engine system faults, • **Diagnosis** of faults relating to vehicle electrical and electronic equipment (Immobilizer, Entry and Start, Multiplexing, Lighting, etc.), • **Diagnosis** of chassis system faults (ABS/ESP, EPS, TCS, VDSC), • **Diagnosis** of vehicle air-conditioning system faults.		
Description: **Theory (50%)** **Practical (50%)**	► **Theoretical part:** • Reading circuit diagrams, • Study of the starting and charging system, • Study of the electronic and mechanical management of the K series engine, • Study of the braking system, ABS and ESP, • SDT-II operation, CAN bus and immobilizer verification, • Study of the clutch system, BVM, BVA, CVT, AMT/AGS, • Study of the retention, steering and HVAC systems. ► **Practical part :** • Using SDT-II (reading, recording and deleting DTCs, active tests, reading, interpreting and recording system parameters). • **Diagnostic steps :** 1. Collect the various symptoms of malfunction / fault and the history of breakdowns and repairs (Customer), 2. Hypothesize the cause of the malfunction/fault, 3. Test and check the conformity of the systems and components of the electronic architecture with regard to the manufacturer's recommendations, 4. Identify the most likely hypothesis based on tests and symptoms, 5. Elaborate recommendations for components to be replaced or repaired.		
Target audience	Bronze and Silver Suzuki technicians		
Prerequisites	E-Learning training via Suzuki Global Training (Module ➔ FRS1104 to FRS4314) with a 100% success rate at SILVER level.		
Language	French / English		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measurement tools, SDT-II diagnostic kit and Consumables.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

SS04-SILVER	REPAIR OF MECHANICAL, ELECTRICAL AND ELECTRONIC SYSTEMS

Level, mode & duration	SILVER	Face-to-Face	05 days
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Removal and re-installation** of vehicle components (braking, suspension, transmission, steering, etc.), • **Disassemble** and **reassemble** vehicle components (braking, suspension, transmission, steering, etc.), • **Check** the conformity of vehicle components in accordance with the manufacturer's recommendations**,** • **Test** and **adjust** vehicle components (braking, suspension, transmission, steering, etc.).		
Description: **Theory (10%)** **Practical (90%)**	► **Theoretical part :** • Procedures for repairing mechanical, electrical and electronic systems, • Precautions to follow when repairing the vehicle's mechanical systems. ► **Practical part :** • Remove vehicle components (brakes, suspension, transmission, steering, etc.), • Disassemble vehicle components (braking, suspension, transmission, steering, other), • Clean vehicle components, • Check components visually and geometrically, • Check components for compliance with manufacturer's specifications, • Replace components not in compliance with manufacturer's specifications, • Reassemble vehicle components, • Re-install components on the vehicle, • Test and adjust vehicle systems.		
Target audience	Bronze-certified Suzuki technicians		
Prerequisites	E-Learning training via Suzuki Global Training (Module ➔ FRS1104 to FRS1215) with a 100% success rate at SILVER level.		
Language	French / English		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measurement tools, SDT-II diagnostic kit and Consumables.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

SS05-SILVER	SILVER CERTIFICATION: DIAGNOSIS AND REPAIR OF MECHANICAL, ELECTRICAL AND ELECTRONIC SYSTEMS

Level, mode & duration	SILVER	Face-to-Face	05 days
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Evaluate** technical skills in vehicle diagnostic and repair operations, • **Certify** technicians who have validated vehicle diagnostic and repair operations.		
Description: **Theory (5%)** **Practical (95%)**	► **Theoretical evaluation themes :** • Basic knowledge of electronics, • Inspection and troubleshooting of electronic circuits, • Diagnosis of system-related symptoms (powertrain, chassis, electrical), • Procedure for carrying out control and inspection operations on electrical and electronic circuits and components, • Precautions to be taken during control and inspection operations on electrical and electronic circuits and components, • Attitude and morality of a SUZUKI technician. ► **Practical evaluation themes :** • Connect diagnostic tool to vehicle, check DTCs, record and analyze data list, • Inspect engine (unstable engine idle, cooling system and starting system), • Dismantle, disassemble, inspect, reassemble and re-install chassis components (suspension arm, strut assembly, axle half-shaft and rear suspension spring). ► **Certification of technicians who have validated the evaluations.**		
Target audience	Bronze-certified Suzuki technicians		
Prerequisites	Completion of Face-to-Face training courses to prepare for SSQS SILVER SS03, SS04 certification.		
Language	French / English		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measurement tools, SDT-II diagnostic kit and Consumables.		
Documentation	Training materials + animation videos		

SS06-GOLD	DIAGNOSIS OF THE VEHICLE MULTIPLEXING SYSTEM

Level, mode & duration	GOLD	Face-to-Face	05 days
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Diagnosis** of signals and vehicle systems, • **Recommend** repair actions.		
Description: **Theory (10%)** **Practical (90%)**	• **Theoretical part :** • Precautions for control and inspection of electrical and electronic circuits, • Procedures for control and inspection of electrical and electronic circuits, • Precautions and procedures to follow for controls and inspections of the multiplexed network, • Diagnosis of multi systems (motorization, chassis, electrical) with and without SDT-II tool. • **Practical part :** • Using SDT-II (reading, recording and deleting DTCs, active tests, reading, interpreting and recording system parameters). • **Diagnostic steps :** 1. Collect the various symptoms of malfunction / fault and the history of breakdowns and repairs (Customer), 2. Hypothesize the cause of the malfunction/fault, 3. Test and check the conformity of the systems and components of the electronic architecture with regard to the manufacturer's recommendations, 4. Identify the most likely hypothesis based on tests and symptoms, 5. Elaborate recommendations for components to be replaced or repaired.		
Target audience	SILVER-certified Suzuki technicians		
Prerequisites	E-Learning training via Suzuki Global Training (Module ➔ FRG1501 to FRG5712) with a 100% success rate at GOLD level.		
Language	French / English		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measurement tools, SDT-II diagnostic kit and Consumables.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

SS07-GOLD	OVERHAUL OF PETROL ENGINE

Level, mode & duration	GOLD	Face-to-Face	05 days
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Dismantle** and **re-install** engine and peripheral components in the engine compartment, • **Disassemble** and **reassemble** vehicle components (petrol engines and other peripheral equipment) in accordance with the manufacturer's recommendations, • **Control** of components (petrol engines and other peripheral equipment), • **Test** and **adjust** vehicle components (petrol engines and other peripheral equipment).		
Description: **Theory (10%)** **Practical (90%)**	► **Theoretical part** (Petrol engine) **:** • Reminder of component operation, • Installation and dismantling procedure, • Disassembly and reassembly procedures, • Use of metrology tools. ► **Practical part:** component Overhaul (Petrol engine) • Start the engine, • Dismantle the component, • Disassemble the component, • Clean the components, • Control the components visually and geometrically, • Check components for conformity with manufacturer's recommendations, • Replace non-compliant components, • Reassemble components, • Re-install the component on the vehicle, • Test and adjust the component on the vehicle.		
Target audience	SILVER-certified Suzuki technicians		
Prerequisites	E-Learning training via Suzuki Global Training (Module ➔ FRG1101 to FRG1120) with a 100% success rate at GOLD level.		
Language	French / English		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measurement tools, SDT-II diagnostic kit, Consumables and Engine on engine test stand.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

SS08-GOLD	OVERHAUL OF VEHICLE GEARBOX, TRANSFER BOX AND DIFFERENTIAL

Level, mode & duration	GOLD	Face-to-Face	05 days
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Remove** and **re-install** vehicle chassis organs (transmission, differential and peripheral organs), • **Disassemble** and **reassemble** vehicle components (gearboxes, differentials) in accordance with manufacturer's recommendations, • **Control** the components (gearboxes, differentials), • **Test** and **adjust** vehicle components (gearboxes, differentials).		
Description: **Theory (10%)** **Practical (90%)**	► **Theoretical part** (gearboxes, differentials) **:** • Reminder of component operation, • Installation and dismantling procedure, • Disassembly and reassembly procedures, • Use of metrology tools. ► **Practical part component Overhaul (gearboxes, differentials):** • Remove the organ, • Disassemble the organ, • Clean the components, • Control the components visually and geometrically, • Check conformity of components according to manufacturer's recommendations, • Replace non-compliant components, • Reassemble components, • Re-install the organ on the vehicle, • Test and adjust the organ on the vehicle.		
Target audience	SILVER-certified Suzuki technicians		
Prerequisites	E-Learning training via Suzuki Global Training (Module ➔ FRG1301 to FRG1426) with a 100% success rate at GOLD level.		
Language	French / English		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measurement tools, SDT-II diagnostic kit, Consumables, FR gearbox and FR differentials.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

SS09-GOLD	GOLD CERTIFICATION: OVERHAUL AND DIAGNOSIS OF ENGINE, AND VEHICLE POWERTRAIN SYSTEMS

Level, mode & duration	GOLD	Face-to-Face	05 days
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Evaluate** the technical skills in overhaul and diagnostic operations, • **Certify** technicians who have validated overhaul and diagnostic operations.		
Description: **Theory (5%)** **Practical (95%)**	► **Theoretical evaluation themes :** • Engine Overhaul procedure, • Gearbox, transfer case and differential overhaul procedure, • Repair of suspension and steering systems, • Diagnosis of system-related symptoms (Engine, CVT, ESP, EPS, HVAC, Airbag and Multiplexed). ► **Practical evaluation themes :** ► **Phase1 : Diagnostic** • Collect the various symptoms of the malfunction/fault and the history of breakdowns and repairs (customer questionnaire, connection of the diagnostic tool to the vehicle, and identification of DTCs), • Hypothesize the cause of the malfunction/fault (record and analyze data list, estimate possible causes), • Test and control the conformity of systems and components of the electronic architecture according to the manufacturer's recommendations (Active testing), • Identify the most likely hypothesis based on tests and symptoms, • Recommend the component(s) to be replaced or repaired. ► **Phase 2 : Engine overhaul** • Dismantle, clean, inspect and re-install camshafts, • Dismantle, clean, inspect and re-install engine timing system, • Dismantle, clean, inspect and re-install cylinder head and valves, • Dismantle, clean, inspect and re-install piston and connecting rod assembly, • Dismantle, clean, inspect and re-install crankshaft. ► **Certification of technicians who have validated the evaluations.**		
Target audience	SILVER-certified Suzuki technicians		
Prerequisites	Face-to-Face training in SS06, SS07, SS08		
Language	French / English		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measurement tools, SDT-II diagnostic kit, Consumables and Engine on test stand.		
Documentation	Training materials + animation videos		

SS-DIAG-01	SS-DIAG-01 USING THE DIAGNOSTIC TOOL (SDT-II)

Level, mode & duration	Intermediate/Advanced	Face-to-Face	05 days
Instructor	**Suzuki Expert Trainer**		
Objectifs	• **Identify** the various components of the SDT-II • **Master** the procedures for connecting, installing, updating, starting, and closing the SDT-II software, and registering remote controls • **Effectively collec**t fault codes (DTCs) • **Analyze** real-time data from vehicle systems • **Interpret** symptoms and establish diagnostic hypotheses • **Perform** active tests to validate component compliance • **Develop** relevant repair recommendations • **Conduct** complex multi-system case studies • **Develop** a structured and reproducible diagnostic methodology		
Description : Théorie (25%) Pratique (75%)	► **Partie théorique :** • Diagnostic fundamentals and theory • Interface and Connecting to the diagnostic tool • Identifying and analyzing DTCs • Gathering information and troubleshooting • Specialized systems and parameter summaries ► **Partie pratiques :** • Troubleshooting connection issues • Multi-DTC analysis • Realistic fault scenarios and diagnosis • Individual and team exercises		
Public visé	Certified Suzuki technicians, Technical team leaders, Workshop managers		
Pré requis	Ability to read wiring diagrams, Basic electronics		
Langue	French / English		
Équipements	Training room, Computers with internet access, Diagnostic interface and vehicle.		
Documentations	Attendance sheet, Satisfaction sheet, Attestation of participation.		

SNM01	THE NEW MODEL "GRAND VITARA" AND ITS TECHNICAL SPECIFICATIONS		
Level, mode & duration	**Aucun**	**Face-to-Face**	**05 days**
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Master** the architecture, maintenance, verification and control procedures associated with each system of the new GRAND VITARA, • **Develop** knowledge on electrical and electronic circuits associated with the new GRAND VITARA, • **Master** the methods, diagnostic procedures and types of failure associated with the various systems of the new GRAND VITARA, • **Master** the operation and analysis of input and output parameters associated with the SHVS 12V system.		
Description: **Theory (50%)** **Practical (50%)**	► **Theoretical part :** • SHVS 12V technology on the new GRAND VITARA, • Electronic vehicle management, • Body, cab and accessories, • Mechanics and engine control for the K15B and K15C series, • Suspension - Transmission - Brakes - ABS/ESP, • Manual transmission - AT transmission, • Steering System - HVAC System - Restraint System. ► **Practical part :** • Using the repair manual, • Use of SDT-II, • Reading circuit diagrams, • Inspection of vehicle starting and charging system, • Check engine system (parameters, valve clearance and selection of new bearings), • Control of vehicle braking, ABS and ESP systems, • Control of the vehicle's CAN communication circuit, • Registration of immobilizer system (keys), • Inspection of heating, ventilation and air-conditioning systems, • Connection to the vehicle's SLDA, • Analysis of SHVS system parameters.		
Target audience	Silver-level technician		
Prerequisites	N/A		
Language	French / English		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measurement tools, SDT-II diagnostic kit and Consumables.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.		

SNM02	THE NEW MODEL "S-PRESSO" AND ITS TECHNICAL SPECIFICATIONS		
Level, mode & duration	**Aucun**	**Face-to-Face**	**05 days**
Instructor	**Suzuki Expert Trainer**		
Objectives	• **Master** the architecture, maintenance, verification and control procedures associated with each system of the new GRAND VITARA, • **Develop** knowledge on electrical and electronic circuits associated with the new GRAND VITARA, • **Master** the methods, diagnostic procedures and types of failure associated with the various systems of the new GRAND VITARA, • **Master** the operation and analysis of input and output parameters associated with the SHVS 12V system.		
Description: **Theory (50%)** **Practical (50%)**	► **Theoretical part :** • SHVS 12V technology on the new GRAND VITARA, • Electronic vehicle management, • Body, cab and accessories, • Mechanics and engine control for the K10C series, • Suspension - Transmission - Brakes - ABS/ESP, • Manual transmission - AT transmission, • Steering System - HVAC System - Restraint System. ► **Practical part :** • Using the repair manual, • Use of SDT-II, • Reading circuit diagrams, • Inspection of vehicle starting and charging system, • Check engine system (parameters, valve clearance and selection of new bearings), • Control of vehicle braking, ABS and ESP systems, • Control of the vehicle's CAN communication circuit, • Registration of immobilizer system (keys), • Inspection of heating, ventilation and air-conditioning systems, • Connection to the vehicle's SLDA, • Analysis of SHVS system parameters.		
Target audience	Silver-level technician		
Prerequisites	N/A		
Language	French / English		
Equipment	Equipped training room, Workshop, Computers, Suzuki vehicle(s) available + associated repair manual(s), Workshop tools, Measurement tools, SDT-II diagnostic kit and Consumables.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation.
