PARTS & SERVICE TRAINING CATALOGUE MOTORS 2026

TOYOTA

OUR COMMITMENT:

TO ASSIST YOU IN DEVELOPING THE COMPETENCE AND PERFORMANCE OF YOUR COLLABORATORS AND YOUR SERVICE.

Version of September 27, 2025

EDITO

Dear Subsidiary,

The Group Academy is pleased to present its catalogue of services for 2026 and to inform you of our commitments for all subsidiaries:

- ✓ **To support you in developing the skills and performance of your employees and your service,**
- ✓ **To support you in resolving technical problems on customer vehicles,**
- ✓ **To standardize and normalize the skill levels of the group's technicians.**

The diversity of brands deployed by CFAO is a real asset for the development of our skills development offers to subsidiaries throughout the company's territories. This diversity challenges us to ensure a high level of service quality within the after-sales service, the parts service, the sales department and the financial and legal service.

To improve the quality of your employees' services, we recommend deploying the following technical skills acquisition cycle:

- ✓ **Measure** the current skills of technicians and teams,
- ✓ **Exploit** the results to guide the skills development strategy,
- ✓ **Define** individual and collective skills development plans,
- ✓ **Acquire** new skills through face-to-face or remote trainings,
- ✓ **Certify** the new skills acquired,
- ✓ **Apply** new skills in a professional environment,
- ✓ **Perform** in a professional environment.

We also offer to **assist** you in **resolving technical problems** that you encounter in your workshops, with **technical support integrated** into the Academy.

The development of new skills is carried out by certified experts each in their areas of expertise, using innovative training methods.

Thank you for your commitment to developing the skills of your employees. We look forward to hearing from you.

Laurent GONIN

TEAM MOTORS

The Douala Academy for the MOTORS is dedicated to the TOYOTA, **SUZUKI, BYD, MERCEDES, MITSUBISHI, PEUGEOT** and **CITROEN** brands
The Academy is equipped with :

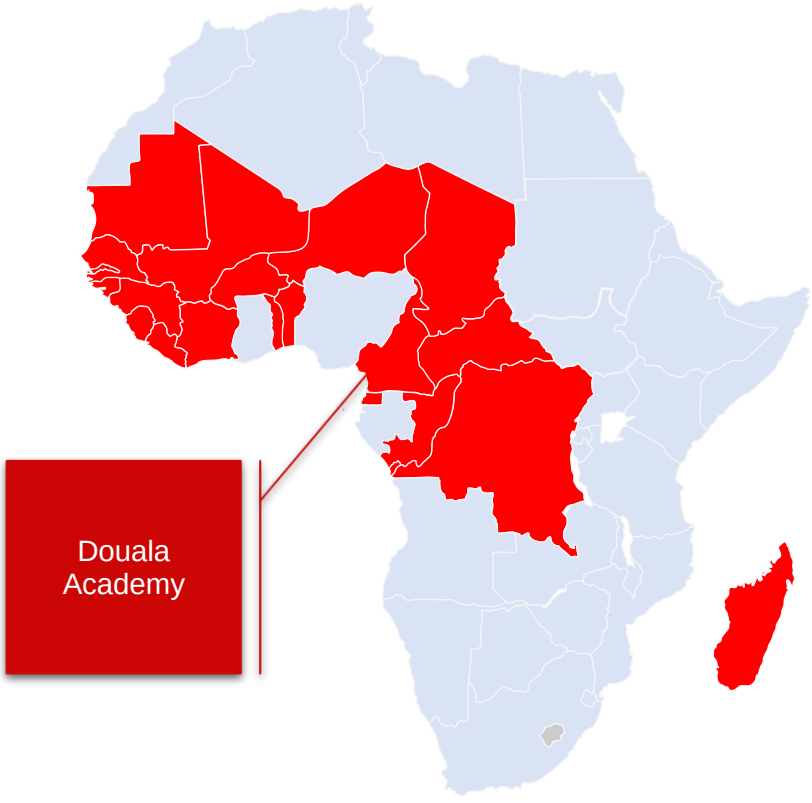

- A reception and a restaurant,
- Three training rooms (whiteboard, video projector, others),
- A 400 m² workshop,
- Teaching equipment for engines, transmissions and others,
- Eight training vehicles,
- A parts store.

Our training courses are provided at the Douala Academy and within all of our subsidiaries. We also deploy training on the sites of our various clients. The training sessions are composed of a maximum of twelve trainees.

Training service contact:

cfaoacademydouala@cfao.com

Tel: 00 237 655 174 674

Laurent GONIN
Director of CFAO training

André Yves BOKALLY
Training Coordinator & Project Manager

Claudia EYINGA
Training Assistant

Cédric PAKO
SUZUKI Trainer and Expert Support Technician

Eugène EBENE
TOYOTA Trainer and Expert Support Technician

Damas NGUE LAH
TOYOTA Trainer and Expert Support Technician

Brice NECHI
STELLANTIS Trainer and Expert Support Technician

Gérold SADIO
Process SAV and Parts Trainer

Bomba COULIBALY (RCI)
MITSUBISHI Trainer and Expert Support Technician

KEY INSTRUCTORS FILIALES

André YOGBA

Key Instructor Douala Cameroun

Jacques MAVILA

Key Instructor RDC

Marcla MAVOUALA

Key Instructor Congo

Moise ABLEFONLIN

Key Instructor Benin

Mamadou KEITA

Key Instructor Mali

Cheikh NDIAYE

Key Instructor Sénégal, Guinée-Bissau & Gambie

Stanislas IDO

Key Instructor Burkina

Joel RAMIARANTSOA

Key Instructor Madagascar

MAHAMAT ELHADJ

Key Instructor Tchad

David NDONG

Key Instructor Guinée-Equatorial

Fall ABDELLAHI

Key Instructor Mauritanie

Kossi AFATSAWO

Key Instructor Togo

Sow OUSMANE

Key Instructor Guinée-Conakry

Ibrahim ALTINE

Key Instructor Niger

Roland BAMBA

Key Instructor RCI

Valentin RAMBENA

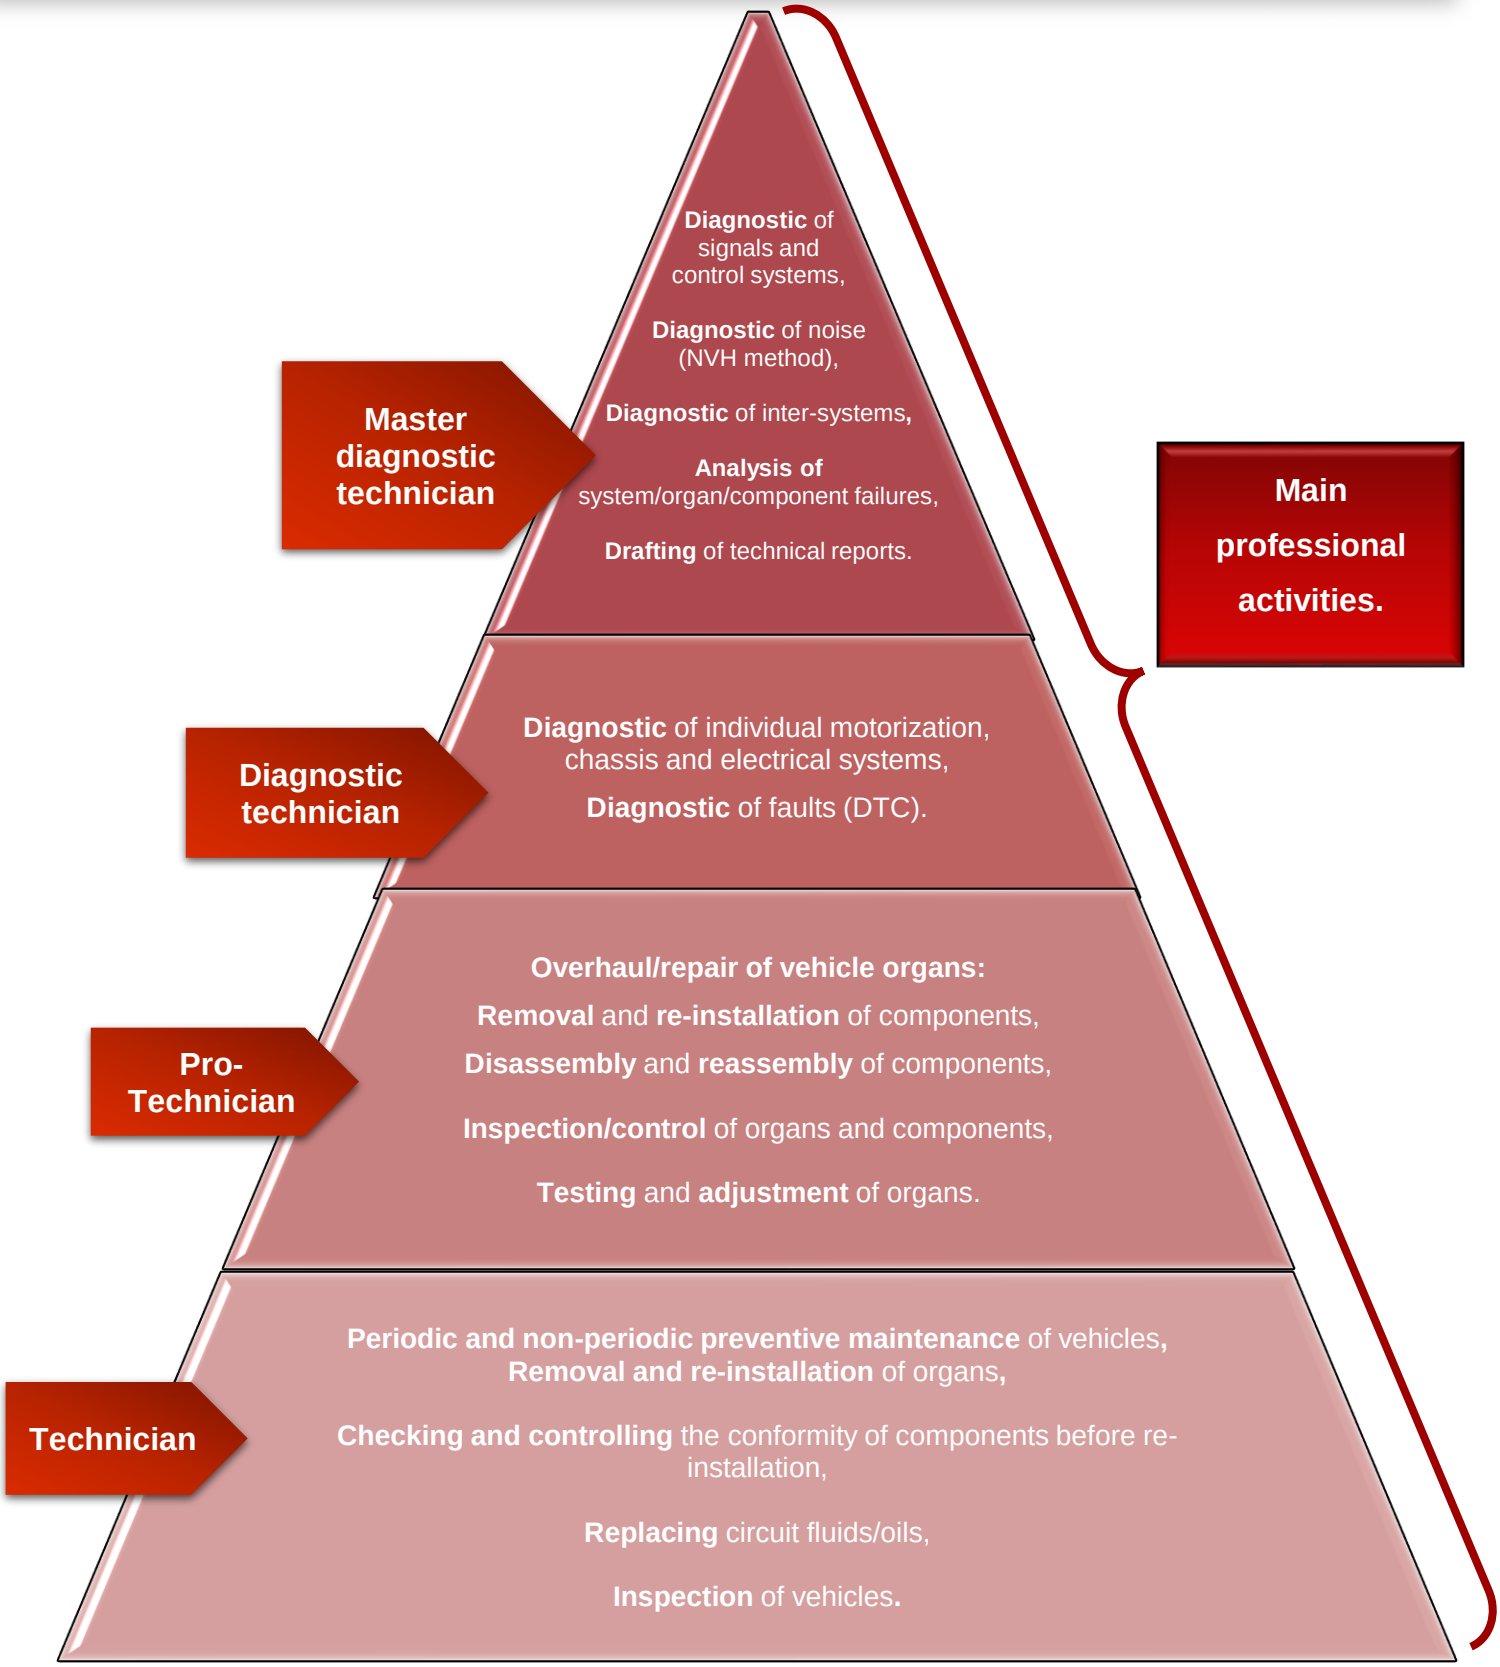

Key Instructor Guinée-Equatorial

Josaphat BONDRAVODE

Key Instructor RCA

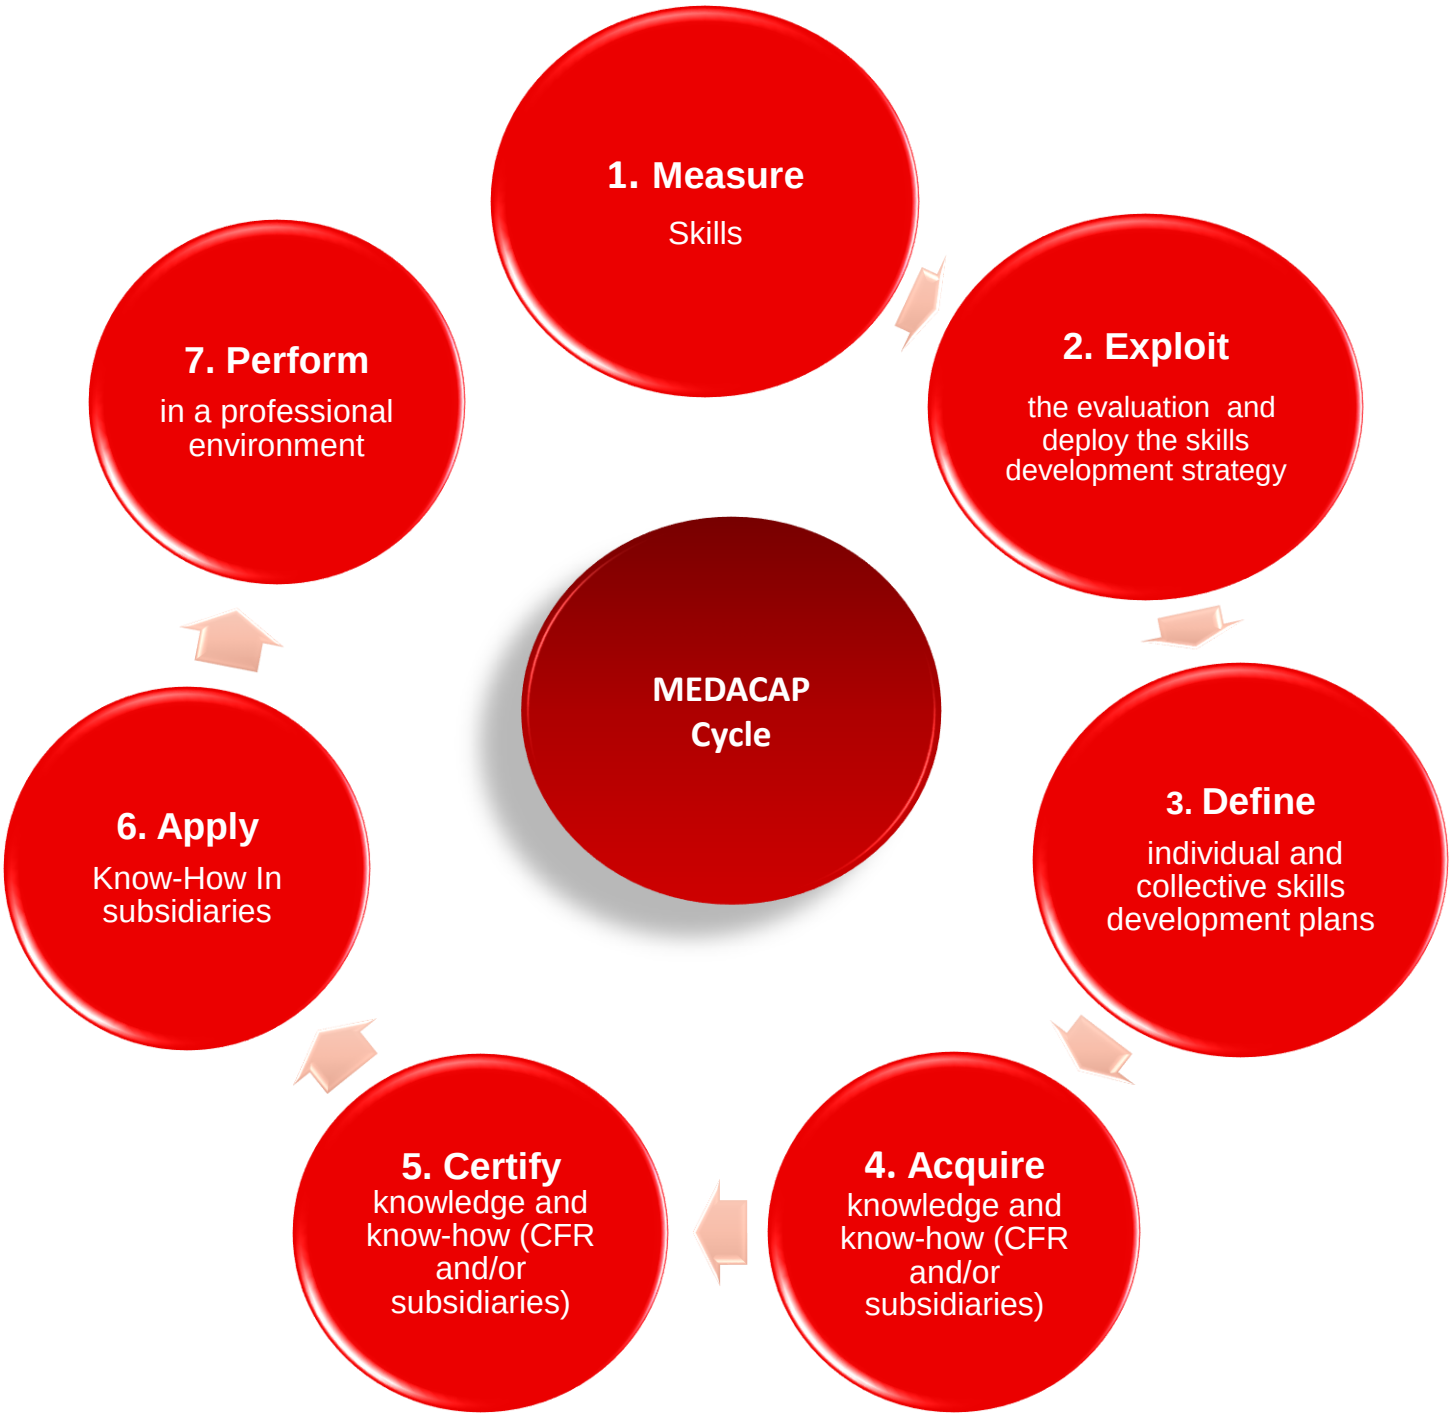

TECHNICAL SKILL LEVELS

TRAINING BY TECHNICIAN LEVEL

Training level	Online training courses (Knowledge)	Face-to-Face training courses and certifications (know-how)	Duration (days)
Master diagnostic technician **G1**	• DTC-free **Diagnosis** by integrating data from all systems. • Noise and vibration **Diagnosis** (NVH) • Others (15 modules).	✓ **Diagnosis** of failures involving interactions between vehicle systems (engine, chassis and electrical/electronic), ✓ **Diagnosis** of mechanical noise in vehicle systems ✓ **Analysis** of failures of vehicle components/organs, ✓ **Certification G1:** Diagnosis of vehicle inter-system noise and failures with and without DTC.	05 05 05 05
Diagnostic technician **G2**	• **Diagnosis** of systems with DTC, • **Study** of the control of all vehicle systems, • **Study** and multiplexing system, • Others (60 modules).	✓ **Diagnosis** of vehicle engine systems, ✓ **Diagnosis** of vehicle chassis systems., ✓ **Diagnosis** of vehicle electrical/electronic systems, ✓ **Diagnosis** of vehicle manual and automatic air conditioning systems, ✓ **G2 Certification:** Diagnosis of vehicle systems with DTC	05 05 05 05 05
Pro-Technician **G3**	• **Study** of various vehicle organs and components (motorization, transmission, braking, steering, etc.), • **Study** of all workshop processes and overhaul and repair operations, • Other (80 modules).	✓ **Overhaul/repair** of petrol and diesel engines of vehicles, ✓ **Overhaul/repair** of vehicle chassis components (gearboxes and differential), ✓ **Overhaul/repair** of vehicle chassis components (brakes, suspension, drive shafts, etc.). ✓ **Overhaul/repair** of vehicle electrical components (starter, alternator, etc.), ✓ **G3 certification:** Overhaul/repair of vehicle electrical components (air-conditioning, alternator, starter and others).	05 05 05 05 05
Toyota Technician **G4**	• **Study** of all vehicle systems, • **Study** of workshop/Maintainance operation processes, • **Study** of Maintainance principles, • Others (129 modules).	✓ Periodic and non-periodic vehicle preventive **Maintainance** of vehicles**,** ✓ **Certification G4:** Periodic and non-periodic preventive Maintainance of vehicles.	05 05

DEVELOPING THE PROFESSIONAL EXPERTISE OF TECHNICIANS

20	SERVICE _ TECHNICAL	TS12 -G2	**G2 Certification** : Diagnosis of vehicle systems with DTC		
21		TS13 -G1	Diagnosis of failures involving interactions between vehicle systems		
22		TS14 -G1	Diagnosis of mechanical noises of vehicle systems		
23		TS15 -G1	Failure analysis and case study of different vehicle systems		
24		TS16 -G1	**G1 Certification** : Diagnosis of noises and inter-system faults of vehicles (with and without DTC)		
25		TSH01	Safety intervention on a TOYOTA hybrid vehicle		

TS01-G4	PERIODIC AND NON-PERIODIC PREVENTIVE MAINTAINANCE OF VEHICLES

Level, mode & duration	G4	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Maintain** the systems (powertrain, chassis, electrical) in operation according to the manufacturer's recommendations, • **Inspect** systems (powertrain, chassis, electrical) in accordance with the manufacturer's recommendations, • **Acceptance** of TOYOTA customer vehicles.		
Description **Theory (30%), Practical (70%)**	► **Theoretical part :** • History, values and organization of TOYOTA's after-sales service, • Principles of TOYOTA vehicle acceptance, • Description of vehicle structure and roles of various systems, organs and components, • The role of fluids and lubricants, • Different types of maintainance (preventive, curative, other), • Principles of using metrology tools, • Control and inspection procedures, • Precautions to be taken during periodic maintainance operations. ► **Practical part :** • Replace oils and fluids (engine, gearbox, axles, other), • Replenish oils and fluids (engine, gearbox, other), • Remove and reinstall components (filters, belts and accessories, brake pads or gaskets, etc.) according to manufacturer's recommendations. • Check component conformity (dimensions, voltage, current, etc.) according to manufacturer's recommendations, • Inspect systems (motorization, chassis, electrical) with the assistance of the SDT-II tool: ○ Identify vehicle fault codes (DTCs) using the SDT-II tool, ○ Perform active tests on electronic components using SDT-II.		
Target audience	Workshop technician performing preventive Maintainance operations		
Prerequisites	E-Learning training with 100% success rate level G4		
Language	French		
Equipment	Equipped training room, Workshop, Computers, TOYOTA vehicle(s) available + associated repair manual(s), Workshop tools, Measuring tools, SDT-II diagnostic kit and Consumables		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS02-G4	G4 CERTIFICATION: PERIODIC AND NON-PERIODIC PREVENTIVE MAINTAINANCE OF VEHICLES

Level, mode & duration	G4	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Evaluate** technical skills in carrying out periodic and non-periodic preventive maintenance operations, • **Certify** technicians having validated the performance of periodic and non-periodic preventive maintenance operations.		
Description **Theory (5%)** **Practical (95%)**	► **Theoretical evaluation themes :** • Powertrain system (fuel, lubrication, ignition, cooling system, etc.), • Chassis system (Clutch, steering, brake, suspension, vehicle movement), • Electrical systems (starting, charging, wiring, HVAC), • Workshop organization (Activities, Advisor, ...). ► **Practical evaluation themes :** • Inspect vehicles, • Remove and reinstall components (filters, brake pads, etc.), • Check conformity of components before reassembly, • Replace circuit fluids/oil. ► **Certification of technicians who have validated the assessments.**		
Target audience	Non-certified TOYOTA technicians		
Prerequisites	E-Learning level G4		
Language	French		
Equipment	Equipped training room, Workshop, Computers, TOYOTA vehicle(s) + associated repair manual(s), Workshop tools, Measuring tools, SDT-II diagnostic kit and Consumables		
Documentation	Training support + animation videos		

TS03-G3	OVERHAUL/REPAIR OF PETROL AND DIESEL ENGINES OF VEHICLES

Level, mode & duration	G3	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Remove and re-install** engine and peripheral organs in the engine compartment, • **Disassemble and reassemble** vehicle organs (petrol and diesel engines and other peripheral equipment) in accordance with the manufacturer's recommendations, • **Control** components (petrol and diesel engines and other peripheral equipment), • **Test and adjust** vehicle components (petrol and diesel engines and other peripheral equipment).		
Description : **Theory (10%)** **Practical (90%)**	► **Theoretical part** (Gasoline and diesel engines)**:** • Reminder of organ operation, • Re-installation and removal procedure, • Disassembly and reassembly procedures, • Use of metrology tools. ► **Practical part:** component overhaul (gasoline and diesel engines) • Starting the engine • Remove organ, • Disassemble organ, • Clean components, • Control components visually and geometrically, • Check components for conformity with manufacturer's recommendations, • Replace non-compliant components, • Reassemble the organ's components, • Re-install organ on vehicle, • Test and adjust the organ on the vehicle.		
Target audience	G4 Technicians		
Prerequisites	E-Learning training for G4 and G3 levels		
Language	French		
Equipment	• Training room Workshop, computers, video projector, blackboard Adapted vehicle(s) available. • Gasoline and diesel engines.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS04-G3	OVERHAUL/REPAIR OF VEHICLE CHASSIS COMPONENTS, PART 1 (GEARBOXES AND DIFFERENTIAL)

Level, mode & duration	G3	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Remove and re-install** vehicle chassis organs (transmission, differential and peripheral components), • **Disassemble and reassemble** vehicle organs (gearboxes, differentials) in accordance with manufacturer's recommendations, • **Control** vehicle organs (gearboxes, differentials), • **Test and adjust** vehicle organs (gearboxes, differentials).		
Description **Theory (10%)** **Practical (90%)**	► **Theoretical Part** (Gearboxes, differentials) **:** • Reminder of organ operation, • Re-installation and removal procedure, • Disassembly and reassembly procedures, • Use of metrology tools. ► **Practical Part:** component overhaul (gearboxes, differentials) • Remove the organ, • Disassemble organ, • Clean components, • Control components visually and geometrically, • Check components for conformity with manufacturer's recommendations, • Replace non-compliant components, • Reassemble the organ's components, • Re-install organ on vehicle, • Test and adjust the organ on the vehicle.		
Target audience	G4 and G3 technicians		
Prerequisites	E-Learning training for G4 and G3 levels		
Language	French		
Equipment	• Training room Workshop, computers, video projector, blackboard Adapted vehicle(s) available. • FF and FR gearboxes, FR and LSD differentials.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS05-G3	OVERHAUL/REPAIR OF VEHICLE CHASSIS COMPONENTS, PART 2 (BRAKING, SUSPENSION, DRIVE SHAFT, STEERING AND OTHERS)

Level, mode & duration	G3	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Remove and re-install** vehicle chassis organs (brakes, suspension, driveshaft, steering, etc.), • **Disassemble and reassemble** vehicle organs (braking, suspension, driveshaft, steering, etc.), • **Control** components (braking, suspension, driveshaft, steering, etc.), • **Test and adjust** vehicle components (braking, suspension, driveshaft, steering, etc.).		
Description **Theory (10%)** **Practical (90%)**	► **Theoretical part** (Braking, suspension, driveshaft, steering, others): • Reminder of organ operation, • Installation and removal procedure, • Disassembly and reassembly procedures, • Use of metrology tools. ► **Practical Part:** component revision (braking, suspension, driveshaft, steering, others) • Remove organ, • Disassemble organ, • Clean components, • Control components visually and geometrically, • Check components' conformity in accordance with manufacturer's recommendations, • Replace non-compliant components, • Reassemble the organ's components, • Re-install the organ on vehicle, • Test and adjust the organ on the vehicle.		
Target audience	G4 and G3 technicians		
Prerequisites	E-Learning training for G4 and G3 levels		
Language	French		
Equipment	• Training room Workshop, computers, video projector, blackboard Adapted vehicle(s) available. • Braking system, suspension, drive shaft, steering, other.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS06-G3	OVERHAUL/REPAIR OF VEHICLE ELECTRICAL COMPONENTS (AIR-CONDITIONING, ALTERNATOR, STARTER AND OTHERS)

Level, mode & duration	G3	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Remove and re-install** vehicle chassis organs (air conditioning, alternator, starter motor, etc.), • **Disassemble and reassemble** vehicle organs (air-conditioning, alternator, starter motor, etc.), • **Control** components (air conditioning, alternator, starter, etc.), • **Test and adjust** vehicle components (air conditioning, alternator, starter, etc.).		
Description **Theory (10%)** **Practical (90%)**	► **Theoretical part** (Air conditioning, alternator, starter and others) **:** • Reminder of organ operation, • Installation and removal procedure, • Disassembly and reassembly procedure, • Principle of use of measuring tools. ► **Practical Part:** component overhaul (air conditioning, alternator, starter, etc.) • Remove the organ, • Disassemble the organ, • Clean the components, • Control the components visually and geometrically, • Check the components' conformity in accordance with the manufacturer's recommendations, • Replace non-compliant components, • Reassemble the organ's components, • Re-install the organ on vehicle, • Test and adjust the organ on the vehicle.		
Target audience	G4 and G3 technicians		
Prerequisites	E-Learning training for G4 and G3 levels		
Language	French		
Equipment	• Training room Workshop, computers, video projector, blackboard Adapted vehicle(s) available. • Air conditioning system or circuit, alternator, starter,		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS07-G3	G3 CERTIFICATION : OVERHAUL/REPAIR OF VEHICLE COMPONENTS AND OTHER SYSTEMS (ENGINES, CHASSIS AND ELECTRICAL)

Level, mode & duration	G3	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Evaluate** the technical skills of overhaul and repair operations, • **Certify** technicians who have validated overhaul and repair operations.		
Description **Practical (100%)**	► **Practical evaluation themes:** • Relieve fuel system pressure (G38001), • Remove and install piston (Evaluation sheet: G38002), • Remove and re-install camshaft (evaluation sheet: G38003), • Measurement task 1 (piston lubrication clearance) (G38004), • Measurement task 2 (controlling the out-of-round) (G38005), • Overhaul disc brake caliper (G38006), • Replace brake hose (G38007), • Inspect brake booster on vehicle (G38008), • Remove and re-install interior and exterior body components (G38009), • Adjust headlight optical axis (G38010), • Remove and re-install components using a press (G38011), • Remove components using an extractor (G38012), • Remove and re-install components using a coil spring compressor (G38013).		
Target audience	Technician with a minimum 70% success rate in the TEAM-GP G3 E-Learning course		
Prerequisites	E-Learning level G3 + training TS01, TS02, TS03 and TS04		
Language	French		
Equipment	• Training room, workshop, computers, video projector, blackboard, adapted vehicle(s) available. • Engine, chassis and electrical systems and tools.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS08-G2	DIAGNOSIS OF VEHICLE POWERTRAIN SYSTEMS

Level, mode & duration	G2	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Diagnose** faults related to the motorization system, • Recommend **repair** actions.		
Description **Theory (30%)** **Practical (70%)**	► **Theoretical part :** • Reminder of the fundamentals of electricity and electronics, • Reading schematics by system type (electrical EWD), • Reading and interpretation of repair manuals (CD and Oasis), • Characteristics of vehicles to be diagnosed (LC300 and NEW RAV4), • System malfunctions (gasoline injection, NEW RAV4, LC300, FORTUNER and diesel injection PRADO, HILUX, LC300), • Diagnostic steps. ► **Practical Part :** 1. Collect the various symptoms of malfunction and the vehicle's breakdown and repair history, 2. Hypothesize the cause of the vehicle malfunction/breakdown, 3. Test or control the conformity of the vehicle's system and components, 4. Identify the most likely hypothesis based on tests and symptoms, 5. Elaborate the recommendation of the components/organisms to be changed or repaired, 6. Repair the component or organ, 7. Test and adjust the system to be repaired.		
Target audience	Technicians performing diagnosis on electronic management systems		
Prerequisites	E-Learning level G3		
Language	French		
Equipment	Training room Workshop, computers, video projector, blackboard Adapted vehicle(s) available, petrol engines, various types of electrical/electronic and electromagnetic simulators		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS09-G2	DIAGNOSIS OF VEHICLE CHASSIS SYSTEMS

Level, mode & duration	G2	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Diagnose** chassis system faults (ABS, EPS, VSC), • Recommend **repair** actions.		
Description **Theory (30%)** **Practical (70%)**	► **Theoretical Part:** • Reminder of the principles of electricity and electronics, • Reading of Schematics by type of system (electrical EWD), • Reading and interpretation of repair manuals (CD and Oasis), • Characteristics of vehicles to be diagnosed (ABS, EPS, VSC), • Malfunctions in electric power steering (EPS), controlled suspension (EMS), braking (ABS) and other systems, • Diagnostic steps. ► **Practical part :** 1. Collect the various symptoms of vehicle malfunction and the history of vehicle breakdowns and repairs, 2. Hypothesize the cause of the vehicle malfunction/ breakdown, 3. Test or control the conformity of the vehicle's system and components, 4. Identify the most likely hypothesis based on tests and symptoms, 5. Elaborate the recommendation of components/organisms to be changed or repaired, 6. Repair the component or organ, 7. Test and adjust the system to be repaired,		
Target audience	Technicians performing diagnosis on electronic management systems		
Prerequisites	E-Learning training G3 and G2		
Language	French		
Equipment	Training room Workshop, computers, video projector, blackboard, various types of electrical/electronic and electromagnetic simulators, and suitable vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS10-G2	DIAGNOSIS OF VEHICLE ELECTRICAL/ELECTRONIC SYSTEMS

Level, mode & duration	G2	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Diagnose** faults related to electrical and electronic equipment on vehicles (immobilizers, Entry and Start, lighting, etc.). • Recommend **repair** actions.		
Description **Theory (30%)** **Practical (70%)**	► **Theoretical Part :** • Reminder of the fundamentals of electricity and electronics, • Reading schematics by system type (electrical EWD), • Reading and interpretation of repair manuals (CD and Oasis), • Characteristics of vehicles to be diagnosed (LC300 and NEW RAV4), • Electrical and electronic system malfunctions, • Diagnostic steps. ► **Practical Part :** 1. Collect the various symptoms of vehicle malfunction and the history of vehicle breakdowns and repairs, 2. Hypothesize the cause of the vehicle malfunction/breakdown, 3. Test or control the conformity of the vehicle's system and components, 4. Identify the most likely hypothesis based on tests and symptoms, 5. Elaborate the recommendation of the components/organisms to be changed or repaired, 6. Repair the component or organ, 7. Test and adjust the system to be repaired.		
Target audience	Technicians performing diagnosis on electronic management systems		
Prerequisites	E-Learning training (level G3)		
Language	French		
Equipment	Training room Workshop, computers, video projector, blackboard Adapted vehicle(s) available, gasoline and diesel engines, various types of electrical/electronic and electromagnetic simulators		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS11-G2	DIAGNOSIS OF VEHICLE MANUAL AND AUTOMATIC AIR CONDITIONING SYSTEM

Level, mode & duration	G2	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Diagnose** faults in vehicle air-conditioning systems, • Recommend **repair** actions.		
Description **Theory (30%)** **Practical (70%)**	► **Theoretical Part :** • Review the principles of manual and automatic air conditioning, • Reading diagrams for each type of air-conditioning system, • Reading and interpretation of repair manuals (CD and Oasis), • Characteristics of vehicles to be diagnosed, • Air-conditioning system malfunctions, • Diagnostic steps. ► **Practical Part :** 1. Collect the various symptoms of vehicle malfunction and the history of vehicle breakdowns and repairs, 2. Hypothesize the cause of the vehicle malfunction/breakdown, 3. Test or control the conformity of the vehicle's system and components, 4. Identify the most likely hypothesis based on tests and symptoms, 5. Elaborate the recommendation of the components/organisms to be changed or repaired, 6. Repair the component or organ, 7. Test and adjust the system to be repaired.		
Target audience	Technicians performing diagnosis on electronic management systems		
Prerequisites	E-Learning training (level G3)		
Language	French		
Equipment	Training room Workshop, computers, video projector, blackboard Adapted vehicle(s) available, gasoline and diesel engines, various types of electrical/electronic and electromagnetic simulators		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS12-G2	G2 CERTIFICATION: DIAGNOSIS OF VEHICLE SYSTEMS WITH DTC

Level, mode & duration	G2	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Evaluate** technical skills in vehicle diagnosis operations, • **Certify** technicians who have validated vehicle diagnosis operations.		
Description **Theory (30%)** **Practical (70%)**	► **Technical skills evaluation themes :** • Fault diagnosis 1 sensor with DTC (G28001), • Fault diagnosis 2 circuit with relay (G28002), • Fault diagnosis 3 lighting system (G28003), • Fault diagnosis 4 gear feedback, air-fuel (G28004), • Fault diagnosis 5 VVTI operation control (G28005), • Fault diagnosis 6 Inverter control (G28006)		
Target audience	Technician with a minimum 70% success rate in TEAM-GP E-Learning training (level G2)		
Prerequisites	Complete TEAM GP E-Learning Level G2 online		
Language	French		
Equipment	Training room Workshop, computers, video projector, blackboard Adapted vehicle(s) available.		
Documentation	Engine, chassis and electrical systems.		

TS13-G1	DIAGNOSIS OF FAILURES INVOLVING INTERACTIONS BETWEEN VEHICLE SYSTEMS

Level, mode & duration	G1	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Use diagnostic tools** and measuring instruments to control information related to vehicle systems which are not controlled during normal Maintainance, • **Know** the procedure and method for troubleshooting inter-systems.		
Description **Theory (30%)** **Practical (70%)**	► **Theoretical part** (ECU Gasoline engine, diesel, ABS, ...)**:** • Description of an electronic management system (ECU, sensors, actuators), • The different types of OBD used for Diagnosis, • Principle of Diagnosis, • DTC detection conditions, • Troubleshooting approach and procedure, • The 7 troubleshooting steps, • Correlation between different ECUs, • Correlation between signals from different systems. ► **Practical part** Inter-system diagnosis**:** • Read DTC from a DTC, • Record DTC, • Analyze list of frozen image data, • Diagnostic mode selection function, • Integrated safety function, • Emergency mode, • Operation in degraded mode.		
Target audience	Technicians level G2, DT		
Prerequisites	Level G2 E-Learning training		
Language	French		
Equipment	Equipped training room, Workshop, Computers, Toyota vehicle(s) available + associated repair manual(s), Workshop tools, Measuring tools, GTS diagnostic tools and Consumables		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS14-G1	DIAGNOSIS OF MECHANICAL NOISE IN VEHICLE SYSTEMS

Level, mode & duration	G1	Face-to-Face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Objectives	• **Use diagnostic** tools and measuring instruments to control information concerning vehicle systems which are not controlled during normal Maintainance, • **Know** the procedure and method for troubleshooting inter-systems.		
Description **Theory (30%)** **Practical (70%)**	► **Theoretical part** (ECU Gasoline engine, diesel, ABS, ...)**:** • Description of an electronic management system (ECU, sensors, actuators), • The different types of OBD used for Diagnosis, • Principle of Diagnosis, • DTC detection conditions, • Troubleshooting approach and procedure, • The 7 troubleshooting steps, • Correlation between different ECUs, • Correlation between signals from different systems. ► **Practical part** Inter-system diagnosis**:** • Read DTC from a DTC, • Record DTC, • Analyze list of frozen image data, • Diagnostic mode selection function, • Integrated safety function, • Emergency mode, • Operation in degraded mode.		
Target audience	Technicians level G2, DT		
Prerequisites	Level G2 E-Learning training		
Language	French		
Equipment	Equipped training room, Workshop, Computers, Toyota vehicle(s) available + associated repair manual(s), Workshop tools, Measuring tools, GTS diagnostic tools and Consumables		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS15-G1	FAILURE ANALYSIS AND CASE STUDY OF DIFFERENT VEHICLE SYSTEMS

Level, mode and duration	G1	Face-to-face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Goals	• **Get**information on the causes of the occurrence of the observed symptom in case this symptom does not occur under normal circumstances, • **Exploit**vehicle data for fault diagnosis, • **Elaborate**a list of questions for a rational and effective control based on the symptom and the information obtained.		
Description **Theory (10%)** **Practical (90%)**	► **Practical Part** • Basic Principles and Processes of Troubleshooting • Description of the questioning for the diagnosis • Description of simulation technique • Determining whether or not a malfunction exists • Estimation of the cause of the malfunction • Finding the cause of the malfunction and preventing recurrences ► **Theoretical part** • Inspect suspected malfunction areas • Using ECU Data : Air-Fuel Ratio Diagnosis • Case Study on Starting Problems : General • Case Study on Starting Problems : Engine Does Not Spin • Case Study on Starting Problems : Unable to Start • Case Study on Engine Malfunction at Rough Idle Speed 1 • Case Study on Engine Malfunction at Rough Idle Speed 2 • Case Study on Engine Malfunction at Abnormal Idle Speed • Case Study on Diesel Engine Idle Malfunction 4		
Target audience	G2, DT level technicians		
Prerequisites	E-Learning training at level G4 and G3		
Language	French		
Equipment	Training room Workshop, Computers, Video projector, whiteboard Adapted vehicle(s) available.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TS16-G1	G1 CERTIFICATION: DIAGNOSIS OF NOISES AND INTER-SYSTEM FAULTS OF VEHICLES (WITH AND WITHOUT DTC)

Level, mode and duration	G1	Face-to-face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**		
Goals	• **Assess** technical skills in vehicle diagnostic operations, • **Certify** technicians who have validated vehicle diagnostic operations.		
Description **Theory (10%)** **Practical (90%)**	► **Technical skills assessment themes :** • Diagnostic questioning 1 (G18101) • Diagnostic questioning 2 (G18102) • Data Use1 (G18201) • Data Use 2 (G18202) • Developing a diagnostic process 1 • Developing a diagnostic process 2 (G18301) • Prevention of recurrence 1 (G18401) • Prevention of recurrence 2 (G18401)		
Target audience	G2, DT level technicians		
Prerequisites	G1 level E-Learning training		
Language	French		
Equipment	• Training room Workshop, Computers, Video projector, whiteboard Adapted vehicle(s) available. • Petrol and diesel engines.		
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation		

TSH01	SAFETY INTERVENTION ON A TOYOTA HYBRID VEHICLE

Mode and Duration	Face-to-face	05 days
Trainer	**TOYOTA EXPERT SUPPORT TECHNICIAN**	
Goals	**Secure** ("Zero volt Inspection") a TOYOTA HYBRID vehicle before any technical interventions (Maintenance, Repair, Diagnosis)	
Description **Theory (60%)** **Practical (40%)**	**THEORETICAL PART** **I. Reminders: Characteristics of hybrid vehicles** - Hybrid Technology & Basic Features - Driving Method & Sounds Specific to Hybrid Vehicles **II. Security** - Hybrid Vehicle Safety Guidelines - Risks of intervention (Electrocutions, Electrifications, Injuries, etc.) - Maintenance Precautions **III. Intervention in the event of an accident/incident on an HV vehicle** - Downloading & Using a Vehicle's Emergency Sheet - Components requiring special attention - Emergency response procedures - Towing Methods **IV. Hybrid Vehicle Maintenance Points** - Use of the preventive maintenance booklet - Important points for working on the HT Circuit - Thermal engine maintenance procedure - Battery Handling Procedure - HT Battery Cooling Circuit Maintenance Procedure - Inverter Cooling Circuit Maintenance Procedure ► PRACTICAL PART - Powering down ("Zero Volt Inspection") a hybrid vehicle - Activating Inspection Mode (GTS+) - Location of components shown on the emergency sheet - Location of the main components as part of preventive and curative maintenance - Powering up a hybrid vehicle	
Target audience	"Key Instructors" and Technicians with the highest level of certification in the subsidiary	
Prerequisites	Complete the E-Learning training courses below on the TEAM-GP training platform: - G41006: Hybrid system description - G41007: Hybrid system characteristics - G41008: Maintenance of a hybrid vehicle 1 - G41009: Maintenance of a hybrid vehicle 2	- G40020: Insulated tools - G30012: Overview of hybrid system operation - G30013: Structure of a hybrid system: hybrid
Language	French	
Equipment	• Training room, Workshop, Computers, Video projector, whiteboard, Hybrid vehicle(s) • TesterelectricToyota / Voltage Absence Tester (VAT) • Specific tools (insulated tools) for work on hybrid vehicles	
Documentation	Attendance sheet, Satisfaction sheet, Attestation of participation
